

Washington State
COMMUNITY COLLEGE

Associate of Science – General Sciences Transfer

PROGRAM GOALS: The General Science Transfer program is designed to provide preparation to transfer to a four-year college or university in order to be able to pursue a baccalaureate degree in a science or science-related field.

Graduates of the program will:

1. Propose, consider, analyze, and evaluate scientific phenomena.
2. Formulate questions, collect and record qualitative and quantitative data, implement solutions and communicate the results.
3. Know and apply basic scientific principles.
