**Foreword**

The college catalog is published by Washington State Community College every year. This volume contains official information for the academic years 2017-18. The contents are presented for information only and are neither a contract nor an offer to contract.

Students are governed by the rules and regulations set forth in the college policy and procedures manual and published in the catalog and student handbook, including amendments, which are in effect at the time of the student’s enrollment. Washington State reserves the right to repeal, change or amend rules, regulations and fees, as well as withdraw, add to or modify programs described herein without notice. Students are advised to consult with the academic advisor or appropriate college official for current official requirements and program requirements.

**Statement of Non-Discrimination**

Washington State Community College embraces human diversity and is committed to equal employment opportunities, affirmative action, and eliminating discrimination. Discrimination against any individual based upon protected status, which is defined as age, color, disability, gender identity or expression, national origin, race, religion, sex, sexual orientation, or veteran status, is prohibited. Equal access to employment opportunities, admission, educational programs, and all other university activities is extended to all persons.
MISSION

Washington State Community College responds to the education and workforce needs of our community by providing dynamic and affordable associate degree and certificate programs in an atmosphere that promotes student success.

VISION

Our vision is to inspire individual excellence and success.

WE VALUE

In creating an environment of trust and respect for faculty, staff, and students, the WSCC community strives to live by a set of values to be practiced each day and in each encounter.

- **Respect** - To acknowledge the humanity of all individuals through compassionate action.
- **Ethics** - To demonstrate honesty, integrity, responsibility, and accountability.
- **Inspiration** - To provide an atmosphere that encourages our campus community to develop, grow, and succeed as lifelong learners.
- **Inclusion** - To provide an atmosphere that fosters respect and acknowledges, explores, and embraces the diversity and uniqueness of all regional and global cultures.
- **Success** - To enable all students, faculty, and staff to be successful academically, personally, and professionally.
- **Excellence** - To reach our maximum potential as a community college through continuous improvement, institutional growth, excellence in teaching, and community engagement.
- **Teamwork** - To foster a culture of collaboration within the campus community that supports our mission, our students, our employees, and the surrounding area.
- **Stewardship** - To be responsible stewards of college resources: human, fiscal, natural, physical, and virtual.

FALL SEMESTER 2017

- Fall Semester Classes begin: August 21, Monday
- First 8 weeks begins: August 21, Monday
- Last day to register for courses: August 22, Tuesday
- Labor Day-Campus closed: September 4, Monday
- Mid-term exams: October 9-13, Monday-Friday
- First 8 weeks ends: October 13, Friday
- Second 8 weeks begins: October 16, Monday
- Winter Intersession/Spring Advisement/Registration begins: October 30, Monday
- Veteran’s Day observed-Campus closed: November 10, Friday
- Last day to withdraw from Fall Semester: December 1, Friday
- Thanksgiving Break-Campus closed: November 23-24, Thursday-Friday
- Final Exam period: December 6-12, Wednesday-Tuesday
- Second 8 weeks ends: December 12, Tuesday
- Fall Semester ends: December 12, Tuesday
- Final Grades Due: December 15, Friday

ONLINE WINTER INTERSESSION 2018

- Winter Intersession Classes begin: December 19, Tuesday
- Last day to register for Winter Intersession: December 19, Tuesday
- Last Day to withdraw from Winter Intersession: January 2, Tuesday
- Winter Intersession ends: January 11, Thursday
- Final Grades Due: January 12, Friday

SPRING SEMESTER 2018

- Martin Luther King Day-Campus closed: January 15, Monday
- Spring Semester Classes begin: January 16, Tuesday
- First 8 weeks begins: January 16, Tuesday
- Last day to register for courses: January 17, Wednesday
- President’s Day-Campus closed (evening classes meet): February 19, Monday
- Mid-term exams: March 5-9, Monday-Friday
- First 8 weeks ends: March 9, Friday
- Spring Break: March 12-16, Monday-Friday
- Second 8 weeks begins: March 19, Monday
- Summer/Fall Advisement/Registration begins: April 2, Monday
- Last day to withdraw from Spring Semester: April 27, Friday
- Final Exam period: May 8 - 11, Tuesday-Friday
- Second 8 weeks ends: May 11, Friday
- Spring Semester ends: May 11, Friday
- Spring Graduation: May 12, Saturday
- Spring Graduation: May 16, Wednesday
- Final Grades Due: May 16, Wednesday
PROGRAM LISTING

TRANSFER PROGRAMS

Designed to transfer to a four-year college or university as the first two years of a baccalaureate degree.

- Biological Sciences Transfer
- Business Administration Transfer
- Education Transfer
  - Early Childhood
  - Middle Childhood
  - Young Adult
- Engineering Transfer
- Fine Arts Transfer
  - Graphic Design
  - Studio Art
- General Sciences Transfer
- Geosciences Transfer
  - **
- Liberal Arts Transfer
- Mathematics Transfer
- Physical Sciences Transfer
- Social Services Transfer

ENGINEERING AND INDUSTRIAL TECHNOLOGY

- Automotive Technology
- Automotive Service
- Automotive Technician (1-Year Certificate)
- Diesel Truck Systems
- Truck Maintenance (1-Year Certificate)
- Engineering Technologies
  - Instrumentation Control & Electrical
  - Mechanical Engineering
- Industrial Technology
  - Chemical Operator Online (1-Year Certificate)
  - Drafting (1-Year Certificate)
  - Geotechnical Drafting
  - Industrial Technology
  - MultiCraft (1-Year Certificate)
  - Petroleum Industry
- Process Technician
- Welding (1-Year Certificate)

BUSINESS TECHNOLOGIES

- Accounting Technology
- Accounting (1-Year Certificate)
- Business Management
- Digital Technology
  - Computer Graphics
  - Computer Support Technician
  - Computer Systems (1-Year Certificate)
- Office Administrative Services
  - Executive Administrative Assistant
  - Executive Office Support (1-Year Certificate)
  - Medical Administrative Assistant
  - Medical Coding (1-Year Certificate)

HEALTH SERVICES

- Health & Wellness Technology
  - Massage Therapy (1-Year Certificate)
- Pharmacy Technician (1-Year Certificate)
- Massage Therapy (1-Year Certificate)
- Medical Laboratory Technology
- Nursing (Associate Degree)
- Pharmacy Technician (1-Year Certificate)
- Physical Therapist Assistant Technology
- Practical Nursing (1-Year Certificate)
- Radiologic Technology
- Respiratory Therapy Technology

ASSOCIATE OF INDIVIDUALIZED STUDIES

See details in the Online Catalog

ASSOCIATE OF TECHNICAL STUDIES

- Cyber Security & Investigation

PUBLIC SERVICES

- Criminal Justice Technology
- Corrections
- Law Enforcement
- Peace Officer Basic Academy
  - Peace Officer Basic Academy (1-Year Certificate)
  - Social Services Technology

Programs lead to an Associate Degree unless otherwise noted.

* Tuition reciprocity with West Virginia counties: Brooke, Hancock, Jackson, Marshall, Ohio, Pleasants, Ritchie, Roane, Tyler, Wetzel, Wirt and Wood.

**Not accepting new students into this program for 2017-2018.

A variety of certificates of completion (4 to 14 classes in a related area) can be earned – see details in the online catalog.

Updated April 14, 2017
WHAT IS THE ASSOCIATE DEGREE?

Students who complete two-year academic programs at Washington State are awarded an associate degree.

- Associate of Applied Business (A.A.B.) is awarded to Business Technologies graduates.
- Associate of Applied Science degree (A.A.S.) is awarded to graduates in Public Service, Health Sciences, Engineering, and Industrial Technologies.
- Associate of Arts (A.A.) or Associate of Science (A.S.) is awarded to graduates planning to transfer to baccalaureate degree programs.
- Associate of Individualized Studies (A.I.S.) is awarded to graduates of a two-year program tailored to specific educational needs not met by other standard programs.
- Associate of Technical Studies (A.T.S.) is awarded to graduates of a two-year program tailored to an individually planned technical education to respond to needs for specialized technical education not available in the formal degree programs.

The A.A.S. and A.A.B. degrees are designed specifically to lead to career entry or advancement. Applied Degree programs offer courses directly related to the technology major. Students become quickly involved in technical courses and continue to receive advanced education in upper level courses throughout the second year.

New opportunities for transfer with A.A.S and A.A.B are constantly evolving. See an advisor in the Admissions Office for current information.

The A.A. and A.S. degrees are designed specifically for transfer to a four-year college or university. Degree programs are composed of courses normally required during the freshman and sophomore years of a baccalaureate program. Students complete most of the general education requirements during two years at Washington State, adding some program-specific courses during the second year.

The Associate of Individualized Studies (A.I.S.) allows students to tailor their studies to specific educational needs not met by standard programs. In this way, the student can gain up to 40 credit hours of the 60 required by using transfer college credit and life experience credit. Individuals who wish to develop an individualized program of study should contact the appropriate academic division for assistance.

The Associate of Technical Studies (A.T.S.) allows students to tailor their studies to respond to needs for specialized technical education not available in the formal degree programs. The program leading to an A.T.S. must have an area of concentration which is equivalent to 30 semester credit hours in technical studies and clearly identifiable with a career objective. Individuals who wish to develop an individualized technical program of study should contact the appropriate academic division for assistance.

COLLEGE-WIDE ASSOCIATE DEGREE GRADUATION REQUIREMENTS

A candidate for an associate degree from Washington State Community College must have satisfied the following requirements, as well as have earned a minimum of 60 semester hours of credit together with at least a 2.0 grade point average:

A. Residency requirement: A student who wishes to apply credits earned at other colleges toward the degree must successfully complete a total of at least 20 semester hours of credit in graded courses (A,B,C,D) under the supervision of the college, with at least a 2.00 (“C”) GPA.

B. Have completed the requirements of one of the degree program as outlined in the catalog, and its addenda in effect at the time of the beginning of the student’s most recent period of continuous enrollment.

C. The Associate of Arts and Associate of Science degrees require completion of the Transfer Module resulting in a substantial number of additional general education courses.

D. Complete at least 15 of the last 20 credit hours at the college, unless this requirement is waived with the approval of the appropriate academic dean and the Vice President for Academic Affairs.

E. Graduating students are expected to attend commencement exercises. Degrees may be conferred in absentia.
GENERAL EDUCATION GOALS

In addition to preparing graduates for careers or additional education, Washington State seeks to ensure a breadth of knowledge and promote intellectual inquiry for all students. Upon completion of an associate degree program, a Washington State graduate will demonstrate knowledge and skills in five key areas.

1. Communication: Use various forms of communication effectively as a communicator and as an observer.
2. Critical Thinking: Select and use effective approaches to solving a wide variety of problems as demonstrated by the ability to think critically, draw reasonable conclusions, and defend those conclusions rationally.
4. Science and Technology: Use current technology and scientific principles to adapt to a changing world.
5. Understanding Values and Cultures: Demonstrate an awareness of the similarities and differences which express the human experience globally.

These general education goals are integrated into the degree requirements of each associate degree program and achieved through completion of general education courses and courses in the technical major or major concentration.

CATALOG IN EFFECT

The curriculum requirements for graduation are those in effect at the time the student enrolls. Those requirements will govern the student's eligibility to graduate as long as the student remains in continuous enrollment. If the student does not attend class for one semester (excluding summer), the curriculum requirements in effect at the time of re-admission will govern graduation.

Students should save a .pdf copy of this catalog as a reference and guide while enrolled at Washington State Community College.

GENERAL EDUCATION COURSE REQUIREMENTS FOR APPLIED DEGREES (A.A.B., A.A.S., A.I.S., & A.T.S.)

The AAB, AAS, AIS and ATS will be composed of not less than 30 credit hours of general education and non-technical (basic) studies and not more than 35 hours of technical courses. None of these degrees will exceed a total of 65 semester hours unless approved by the college’s Vice President for Academic Affairs in order to meet a special requirement of the program’s professional accrediting agency.

Non-Technical studies will include a component of general education with the following minimum requirements. All general education courses will be Transfer Module except where noted.

ENGLISH COMPOSITION AND MATHEMATICS (minimum of 6 credit hours):

- English Composition 3 hours
- Mathematics 3 hours (TM course recommended)

NINE CREDIT HOURS IN THREE OF THE FOUR AREAS:

- Speech Communication or a second English Composition 3 hours (recommended)
- Social and Behavioral Sciences (anthropology, economics, geography, history, political science, psychology, sociology) 3 hours
- Arts and Humanities (art, foreign language, literature, philosophy, humanities, music, theater) 3 hours
- Natural Sciences (biology, chemistry, geology, physics, astronomy) 3 hours (TM course recommended)

The same course cannot count toward both the social and behavioral sciences requirement and the arts and humanities requirement. Courses meeting the requirement in the arts or humanities may include studio courses and special topics courses.

NON-TECHNICAL (BASIC) (15 credit hours):

- Three credit hours in computer skills such as PC Applications or similar course. (Recommended - Exception may be made for programs that embed significant computer skills within their curriculum.)
- Twelve additional credit hours in basic and related coursework appropriate to the degree.
ASSOCIATE OF APPLIED BUSINESS COURSE DISTRIBUTION REQUIREMENTS

The Associate of Applied Business (A.A.B.) is awarded to students who successfully complete one of the prescribed curricula in business technologies. The degree is designed to prepare technicians and para-professionals for immediate entry into the workforce upon graduation. Both technical and non-technical courses are required for the A.A.B.

A.A.B. Non-technical Course Requirements

The A.A.B. degree requires 30 semester credits of non-technical studies. Courses may be in two categories:

1. General education requirements consisting of courses in written communication, oral communication, social and behavioral sciences, and arts and humanities. These requirements also include courses in the natural sciences and in mathematics.

2. Basic related courses include a core of courses basic to the technical field and closely related to the specialty.

Since the non-technical course requirements vary with each program, the student should check the courses required in each program or major.

A.A.B. Technical Course Requirements

For graduation, 30-35 credit hours in technical courses clearly identified with the technical skills, proficiency, and knowledge required for career competency, as prescribed by the academic program. A minimum of 60 up to a maximum of 65 total credit hours is required for graduation depending upon the specific requirements of each degree program.

ASSOCIATE OF APPLIED SCIENCE COURSE DISTRIBUTION REQUIREMENTS

The Associate of Applied Science (A.A.S.) is awarded to students who successfully complete one of the prescribed curricula in industrial, engineering, health or public service. The degree is designed to prepare technicians and para-professionals for immediate entry into the workforce upon graduation. Both technical and non-technical courses are required for the A.A.S.

A.A.S. Non-technical Course Requirements

The A.A.S. requires a minimum 30 semester credits of non-technical studies. Courses may be in two categories:

1. General Education requirements consisting of courses in written communication, oral communication, social and behavioral sciences, and arts and humanities. These requirements also include courses in the natural sciences and in mathematics.

2. Basic Related Courses include a core of courses basic to the technical field and closely related to the specialty.

Since the non-technical course requirements vary with each program, the student should check the courses required in each program or major.

A.A.S. Technical Course Requirements

For graduation, 30-35 credit hours in technical courses clearly identified with the technical skills, proficiency, and knowledge required for career competency, as prescribed by the academic program. A minimum of 60 up to a maximum of 65 total credit hours is required for graduation depending upon the specific requirements of each degree program.

ASSOCIATE OF ARTS DEGREE COURSE DISTRIBUTION REQUIREMENTS

The Associate of Arts (A.A.) degree is awarded to students who successfully complete the requirements for the degree with a concentration in arts, humanities, business or education, or other areas. The degree is designed for students wishing to complete the first two years of a Bachelor of Arts degree, as well as those desiring two years of a general education with emphasis in the arts, social sciences or humanities. To earn an A.A., a total of 60-65 credit hours of work must be completed, including the 36-40 hours earned in the Transfer Module.

General Education Course Requirements for the A.A. (includes Transfer Module)

- Communication Skills: Two Transfer Module courses in English composition, plus a minimum of one course in speech communication for a total of 9 semester hours.
- Mathematics and Computer Science: At least one course in mathematics that meets Transfer Module criteria of building on three years of college preparatory or equivalent mathematics. In addition, a minimum of one course in computer science (Transfer Module or Non-Transfer Module), either a microcomputer applications or a computer programming course to total at least 6 semester hours.
- Natural Sciences: A minimum of 6 Transfer Module credit hours, including at least one laboratory course.
- Social and Behavioral Sciences: A minimum of 9 Transfer Module credit hours, selected from at least two subject areas.
- Arts and Humanities: A minimum of 9 Transfer Module credit hours selected from at least two areas.
- Additional electives to make up 36-40 total hours of Transfer Module Courses.

Updated April 14, 2017
ASSOCIATE OF ARTS DEGREE COURSE DISTRIBUTION REQUIREMENTS (CONTINUED)

Major Concentration Requirement for the A.A.
Students in an A.A. program must take at least 12 credit hours in an area of major concentration other than science, engineering, or mathematics, as prescribed by the chosen curriculum and approved by the student’s academic advisor.

Recommended Electives for the A.A. Degree
The remaining courses to meet the 60-65 credit hours required for the degree should be selected based on the chosen curriculum, the academic requirements of the institution to which the student plans to transfer, and the approval of the academic advisor. One to three credits in physical activity/recreation courses may be applied to the degree.

Based on foreign language courses completed in high school and requirements of the chosen program at the transfer institution, students may choose to complete one year of foreign language at Washington State.

ASSOCIATE OF INDIVIDUALIZED STUDIES COURSE DISTRIBUTION REQUIREMENTS

The Associate of Individualized Study (A.I.S.) is awarded to students who successfully complete an individually designed curricula prescribed to meet specific career goals. Students must satisfactorily complete a minimum of 60 semester credit hours in a well-planned, unique program to serve an educational objective that could not be served through another degree program at the college.

General Education Requirements for the A.I.S.
The five general education goals will be included in each individually-designed curriculum, for a minimum of 30 semester credits of general and basic related course work including the general education course requirements.

Major Concentration Requirement for the A.I.S.
The program leading to the A.I.S. must contain an area of concentration consisting of a minimum of 30 up to a maximum of 35 semester credit hours formed either by:

1. An intra-college, interdisciplinary, but coherent combination of courses drawn from a minimum of two and a maximum of four instructional areas of study; or

2. Up to 45 semester credit hours awarded by the college for documentable educational experiences or courses completed at another college judged by Washington State to be of college level; or

3. An unusual but academically coherent combination of technical and general studies courses.

Upon petitioning for acceptance into the A.I.S. program, a representative of Enrollment Management, the student’s committee, and the student will determine the remaining required courses. Once students are accepted into the program, they must complete at least 20 credit hours within the approved A.I.S. program with at least half in the area of the approved concentration. Students with less than 30 credit hours remaining toward a degree must have the approval of the Vice President for Academic Affairs to enroll in the program.
ASSOCIATE DEGREE REQUIREMENTS

ASSOCIATE OF SCIENCE DEGREE COURSE DISTRIBUTION REQUIREMENTS

The Associate of Science (A.S.) degree is awarded to students who successfully complete the requirements for the degree with a concentration in mathematics, science or engineering. The degree is designed for students wishing to complete the first two years of a Bachelor of Science degree, as well as those desiring two years of a general education with emphasis in natural science or mathematics. For a student to earn an A.S. degree, a total of 60-65 credit hours of work must be completed, including the 36-40 hours earned in the Transfer Module. Total course requirements for the A.S. degree are described below.

General Education Course Requirements for the A.S. Degree (includes Transfer Module)

- Communication Skills: Two Transfer Module courses in English composition, plus a minimum of one course in speech communication for a total of 9 semester hours.
- Mathematics and Computer Science: At least one course in mathematics that meets Transfer Module criteria of building on three years of college preparatory or equivalent mathematics. In addition, a minimum of one course in computer science (Transfer Module or Non-Transfer Module), either a microcomputer applications or a computer programming course to total at least 6 semester hours.
- Natural Sciences: A minimum of 6 Transfer Module credit hours, including at least one laboratory course.
- Social and Behavioral Sciences: A minimum of 9 Transfer Module credit hours, selected from at least two subject areas.
- Arts and Humanities: A minimum of 9 Transfer Module credit hours selected from at least two areas.
- Additional electives to make up 36-40 total hours of Transfer Module Courses.

Major Concentration Requirement for the A.S. Degree

Students in an A.S. program must take at least 12 credit hours in an area of major concentration in science, engineering, or mathematics, as prescribed by the chosen curriculum and approved by the student’s academic advisor.

Recommended Electives for the A.S. Degree

The remaining courses to meet the 60-65 credit hours required for the degree should be selected based on the chosen curriculum, the academic requirements of the institution to which the student plans to transfer, and the approval of the academic advisor. One to three credits in physical activity/recreation courses may be applied to the degree.

Based on foreign language courses completed in high school and requirements of the chosen program at the transfer institution, students may choose to complete one year of foreign language at Washington State.

ASSOCIATE OF TECHNICAL STUDIES DEGREE REQUIREMENTS

The Associate of Technical Studies (A.T.S.) is awarded to students who successfully complete a minimum of 60 semester credit hours of an individually planned technical education program designed to respond to needs for specialized technical education not currently available in the formal degree programs available at the college. The program leading to an Associate of Technical Studies must have an area of concentration which is equivalent to 30 semester credit hours in technical studies and clearly identifiable with a career objective. The actual degree awarded must contain the name of the area of concentration, e.g., Associate of Technical Studies in Cyber Security and Investigation. Both technical and non-technical courses are required for the A.T.S.

A.T.S. Non-technical Course Requirements

The A.T.S. degree requires 30 semester credits of non-technical studies. Courses may be in two categories:

1. General education requirements consisting of courses in written communication, oral communication, social and behavioral sciences, and arts and humanities. These requirements also include courses in the natural sciences and in mathematics.

2. Basic related courses include a core of courses basic to the technical field and closely related to the specialty.

A.T.S. Technical Course Requirements

For graduation, 30-35 credit hours in technical courses clearly identified with the technical skills, proficiency, and knowledge required for career competency, as prescribed by the academic program. A minimum of 60 up to a maximum of 65 total credit hours is required for graduation depending upon the specific requirements of each degree program.

Graduates of the A.T.S. program who wish to extend their studies to baccalaureate-level programs may need to complete a substantial amount of lower division coursework at the transfer institution. Students satisfactorily completing this degree must assume that four-year institutions may evaluate their credits on a course-by-course basis.
ADVANCED PLACEMENT

The State of Ohio, working through the University System of Ohio, has initiated policies to facilitate the ease of transition from high school to college as well as between and among Ohio’s Public colleges and universities.

1. Students obtaining an Advanced Placement (AP) exam score of 3 or above will be awarded the aligned course(s) and credit(s) for the AP exam area(s) successfully completed.
2. General Education courses and credits received will be applied towards graduation and will satisfy a general education requirement if the course(s) to which the AP area is equivalent fulfill a requirement.
3. If an equivalent course is not available for the AP exam area completed, elective or area credit will be awarded in the appropriate academic discipline and will be applied towards graduation where such elective credit options exist within the academic major.
4. Additional courses or credits may be available when a score of 4 or 5 is obtained. Award of credit for higher score values varies depending on the institution and academic discipline.
5. In academic disciplines containing highly dependent sequences (Mathematics, Sciences, etc.) students are strongly advised to confer with the college/university advising staff to ensure they have the appropriate foundation to be successful in advanced coursework within the sequence.

A complete listing of credit awarded for an AP score of 3 or above for all University System of Ohio colleges and universities can be found at www.ohiohighered.org/transfer/advancedplacement

CREDIT ALTERNATIVES

College Level Examination Program
Washington State Community College participates in the nationally recognized College Level Examination Program (CLEP), offered by the College Entrance Examination Board, a testing program which permits students to earn college credits by demonstrating knowledge equal to a particular college-level course.

Proficiency Testing
The faculty of the College offer proficiency credit by examination for some courses. Through testing, students may demonstrate proficiency in a course and receive appropriate credit. Specific information about proficiency credit can be obtained through the academic divisions of the College.

There are a number of procedures that should be followed when seeking proficiency credit.

1. The student must show evidence of successful completion of all prerequisites to the course for which the proficiency examination is being requested.
2. Proficiency examinations are conducted during the first five days of any academic term. An “Application for Proficiency,” the proficiency fee according to the schedule of fees, and the examination must be completed and results submitted to the records office by the end of the fifth day in the academic term.
3. A proficiency examination can be administered only by departmental faculty specifically responsible for the course subject area requested for proficiency.
4. Failed proficiency exams may not be repeated.
5. A student may not request a proficiency examination for any course in which they have received an F or from which he or she has withdrawn.
6. A student who has taken a lower numbered course in a sequential series of courses will not be permitted to take a proficiency examination in a higher numbered course in that same series of courses.
7. A student who has received credit for a higher numbered course in a sequential series of courses will not be permitted to take a proficiency examination in a lower numbered course in that same series.

To apply for proficiency examination, the following procedures need to be followed.

1. Request proficiency examination from the academic department.
2. Obtain the Application for Proficiency form from the records office, fill out the form, and pay all fees.
3. Present the completed form to the academic department and arrange for a testing date. A score of 85 percent or more is required for successful proficiency.

Successful proficiency will result in transcript credit for the course, and the course will apply toward degree requirements. The records office will notify the student of the results. Students earning proficiency credit should be aware that credits earned by means of proficiency are seldom transferable to any other institution.

Assessment of Credit for Life/Work Experience
Students can receive credit for prior relevant college-level learning acquired either through formal schooling or some types of occupational experience. Each student works with an advisor to define his or her program of study, giving careful consideration to high school background, test results, interests, talents, attitudes and goals.
Credit may be granted for satisfactory performance on examinations, and appropriate work experience. The student contacts the student services office, then meets with an advisor to determine if the life experience evaluation is appropriate to his or her educational program.

The student must submit a portfolio which consists of all documentation he or she considers relevant.

Required are:

1. A cover letter stating the number of credits requested, the areas in which the credit is being requested, and names, titles, addresses and phone numbers of persons to be consulted regarding each experience;
2. A detailed description of each experience for which credit is requested; and
3. A letter from on-site supervisors or employers confirming the nature, duration and quality of the work.
4. The student then has a personal interview with a committee of faculty/staff members consisting of the appropriate academic dean and faculty appropriate to the subject area, if needed.

As documentation, the applicant may be asked to:

1. Complete written and/or performance tests; up to 40 credit hours may be from outside sources such as National Auto Mechanics Tests, CLEP Examinations, or College Board Advanced Placement tests which can be utilized to demonstrate an appropriate level of ability or knowledge.
2. Complete in-house tests such as placement and/or proficiency examinations prepared by faculty members at WSCC.

In summary, the primary assessment techniques for life experience credit are documents, reports and testimony from external sources along with faculty evaluation at WSCC. The committee will decide how many credits will be awarded and in what particular areas the credit will be granted. The student will be notified of the committee’s decision as soon as possible; however, the credit is not actually awarded until the student has successfully completed a minimum of 12 semester hours at WSCC.

The cost to the student includes the cost of any tests from outside sources.

The transfer of Life Experience Credit to another college is determined by the receiving institution. Each college has a policy which determines the transfer of credit.

A candidate for a Certificate of Completion must have satisfactorily completed all courses required for the certificate with a C or better. At least 75% of the courses must be taken at Washington State.

A candidate for a one-year certificate from Washington State must have earned 30 credit hours or more based on the requirements listed in the student’s certificate program. A transfer student must have earned at least 10 semester hours of credit with at least 2.00 (C) cumulative grade point average under the supervision of the college, and have been officially registered in the college during the final semester.

Students who wish to pursue more than one major in a degree program must consult with the appropriate department chair or dean and must meet the following requirements:

1. All degree requirements for both majors must be met.
2. A minimum of 12 semester hours of credit must be earned in addition to the requirements for the first major.

Students who have earned an associate degree from Washington State and wish to earn an associate degree in a second program must consult with the appropriate department chair or dean and must meet the following requirements:

1. A minimum of 18 semester hours of credit must be earned in addition to the total compiled for the first degree.
2. All requirements for the second degree must be met.
3. An additional degree will not be granted in the same program in which the first degree was earned, but an additional major may be earned in the same degree program.

Washington State and West Virginia University at Parkersburg have an agreement that permits some West Virginia residents to pay Ohio resident tuition fees, instead of the out-of-state charge. Residents of Jackson, Pleasants, Ritchie, Roane, Tyler, Wirt and Wood Counties are eligible for this low in-state tuition when they enroll at Washington State in any of the following programs:

- Automotive Service Technology
- Diesel Truck Systems Technology
- Geosciences Transfer
- Geotechnical Drafting Technology
- Industrial Technology
- Massage Therapy Certificate
- Medical Laboratory Technology
- Physical Therapist Assistant Technology
- Radiologic Technology
- Respiratory Therapy Technology

WEST VIRGINIA RECIPROCITY AGREEMENT

As documentation, the applicant may be asked to:

1. Complete written and/or performance tests; up to 40 credit hours may be from outside sources such as National Auto Mechanics Tests, CLEP Examinations, or College Board Advanced Placement tests which can be utilized to demonstrate an appropriate level of ability or knowledge.
2. Complete in-house tests such as placement and/or proficiency examinations prepared by faculty members at WSCC.

In summary, the primary assessment techniques for life experience credit are documents, reports and testimony from external sources along with faculty evaluation at WSCC. The committee will decide how many credits will be awarded and in what particular areas the credit will be granted. The student will be notified of the committee’s decision as soon as possible; however, the credit is not actually awarded until the student has successfully completed a minimum of 12 semester hours at WSCC.

The cost to the student includes the cost of any tests from outside sources.

The transfer of Life Experience Credit to another college is determined by the receiving institution. Each college has a policy which determines the transfer of credit.

As documentation, the applicant may be asked to:

1. Complete written and/or performance tests; up to 40 credit hours may be from outside sources such as National Auto Mechanics Tests, CLEP Examinations, or College Board Advanced Placement tests which can be utilized to demonstrate an appropriate level of ability or knowledge.
2. Complete in-house tests such as placement and/or proficiency examinations prepared by faculty members at WSCC.

In summary, the primary assessment techniques for life experience credit are documents, reports and testimony from external sources along with faculty evaluation at WSCC. The committee will decide how many credits will be awarded and in what particular areas the credit will be granted. The student will be notified of the committee’s decision as soon as possible; however, the credit is not actually awarded until the student has successfully completed a minimum of 12 semester hours at WSCC.

The cost to the student includes the cost of any tests from outside sources.

The transfer of Life Experience Credit to another college is determined by the receiving institution. Each college has a policy which determines the transfer of credit.
COLLEGE TECH PREP

College Tech Prep is a nationally recognized program that partners two-year colleges with area high schools to prepare young people for the technical jobs of the future. College Tech Prep high school students:

1. Learn college preparatory academics in applied, real-world contexts that make the content more meaningful and accessible to them;
2. Develop technological literacy, including the basics of computer usage; and,
3. In grades 11 and 12, immerse themselves in the occupational skills needed to enter and succeed in a two-year college technical program.

At the end of high school, College Tech Prep graduates are ready to enter an advanced skills College Tech Prep associate degree program at a community or technical college. They also can enter the world of work with an array of stronger basic and occupational skills than graduates of general education programs.

Others who wish to enroll in a College Tech Prep associate degree program, but who did not participate in the high school program, may be required to complete several bridge courses first.

In our area, the Washington-Morgan-Meigs College Tech Prep Consortium works with the Washington County Career Center, Meigs High School, Morgan High School and their associate schools to prepare students for College Tech Prep associate degree programs at Washington State.

Current College Tech Prep associate degree programs at Washington State:

- Nursing: Associate Degree Nursing
- Automotive and Diesel Truck Systems
- Business Management Technology
- Digital Technology - Computer Graphics
- Electrical Engineering Technology
- Medical Laboratory Technology
- Digital Tech. - Computer Support Technician
- Physical Therapist Assistant Technology
- Nursing: Practical Nursing
- Radiologic Technology
- Respiratory Therapy Technology

Additional programs may be implemented. For information contact the college’s Outreach Center or local high school counselors.

THE WSCC HONORS PROGRAM

The WSCC Honors Program nurtures the talents of our most academically gifted and motivated students. With emphasis placed on collaboration with faculty and peers, intellectual advancement, and service learning, the students develop as creative and critical thinkers in the 21st Century, and prepare to become leaders in this community and beyond.

Acceptance into the WSCC Honor’s Program involves a competitive admissions process.

Initially, interested students submit the WSCC Honors application packet, which includes a completed application form (with an essay component), ACT scores, two letters of recommendation, and transcripts. The Honors Committee will then review each application packet, and students selected for the final phase of the admission process will be invited to campus for an interview with the committee. Those chosen for admission into the Honors Program will be notified within two weeks of the interview.

Minimum requirements for admission include a 3.0 GPA and an ACT score of 18.

Minimum requirements to become a WSCC Honors Program graduate include the following:

- Students who begin the program in their second year at WSCC must take 2 – 4 Honors courses (6 – 12 credit hours)
- Students who begin the program in their first year at WSCC must take 4 – 6 Honors courses (12 – 18 credit hours)

Other requirements include service learning and attendance at special Honors lectures.
BACCALAUREATE TRANSFER PROGRAMS

In many cases, the career needs of Washington State students can only be met by a four-year bachelor’s degree. For these, the college offers transfer programs in addition to its career-oriented technical education programs. The transfer programs at Washington State enable the student to complete the majority of freshman and sophomore college course requirements close to home.

Degree programs designed for transfer to a baccalaureate program fall into two categories: Associate of Arts (AA) degree and Associate of Science (AS) degree.

**Associate of Arts (AA)**
- Business Administration Transfer
- Education Transfer
- Fine Arts
- Liberal Arts Transfer
- Social Services Transfer

**Associate of Science (AS)**
- Biological Sciences Transfer
- Engineering Transfer
- General Science Transfer
- Geoscience Transfer*
- Mathematics Transfer
- Physical Science Transfer

*The Geoscience Transfer program is not accepting new students for the 2017-18 year.

ARTICULATION AGREEMENTS

To assist students in transfer, articulation agreements continue to be developed with nearby public and private colleges and universities. The articulation agreements clearly indicate which courses offered by Washington State will be accepted by the receiving institution. Articulation agreements have been developed or are in progress with the following:

- Cincinnati College of Mortuary Science
- Franklin University
- Herzing University
- Marietta College
- Muskingum University
- Ohio University
- Ohio Valley University
- West Virginia University at Parkersburg
- Western Governors University

INSTITUTIONAL TRANSFER

The Ohio Department of Higher Education in 1990, following a directive of the 118th Ohio General Assembly, developed the Ohio Articulation and Transfer Policy to facilitate students’ ability to transfer credits from one Ohio public college or university to another in order to avoid duplication of course requirements. A subsequent policy review and recommendations produced by the Articulation and Transfer Advisory Council in 2004, together with mandates from the 125th Ohio General Assembly in the form of Amended Substitute House Bill 95, have prompted improvements of the original policy. Additional legislation from the 125th Ohio General Assembly also initiated the development of a statewide system for articulation agreements among state institutions of higher education for transfer students pursuing teacher education programs.

Action by the 126th Ohio General Assembly led to the establishment of criteria, policies, and procedures for the transfer of technical courses completed through a career-technical education institution; and standards for the awarding of college credit based on Advanced Placement (AP) test scores.

Legislation from the 130th Ohio General Assembly required public institutions of higher education to: use baseline standards and procedures in the granting of college credit for military training, experience, and coursework; establish an appeals process for resolving disputes over the awarding of credit for military experience; provide specific assistance and support to veterans and service members; adopt a common definition of a service member and veteran; and establish a credit articulation system in which adult graduates of public career-technical institutions who complete a 900 clock-hour program of study and obtain an industry-recognized credential approved by the Chancellor shall receive 30 college technical credit hours toward a technical degree upon enrollment.

While all public colleges and universities are required to follow the Ohio Articulation and Transfer Policy, independent colleges and universities in Ohio may or may not participate in the Transfer Policy. Therefore, students interested in transferring to independent institutions are encouraged to check with the college or university of their choice regarding transfer agreements. In support of improved articulation and transfer processes, the Ohio Department of Higher
Education has established an articulation and transfer clearinghouse to receive, annotate, and convey transcripts among public colleges and universities. This system is designed to provide standardized information and help colleges and universities reduce undesirable variability in the transfer credit evaluation process.

**ACCEPTANCE OF TRANSFER AND ARTICULATED CREDIT**

To recognize courses appropriately and provide equity in the treatment of incoming transfer students and students native to the receiving institution, transfer credit will be accepted for all successfully completed college-level courses completed in or after Fall 2005 from Ohio public institutions of higher education. Students who successfully completed Associate of Arts (AA) or Associate of Science (AS) degrees prior to Fall 2005 with a 2.0 or better overall grade-point average would also receive credit for all college-level courses they have passed. While this reflects the baseline policy requirement, individual institutions may set equitable institutional policies that are more accepting.

Pass/Fail courses, credit-by-examination credits, experiential learning courses, and other non-traditional credit courses that meet these conditions will also be accepted and posted to the student record.

**APPLICATION OF TRANSFER AND ARTICULATED CREDIT**

Application of credit is the decision process performed by the receiving institution to determine how the credits it has accepted and recorded on the student’s official academic transcript will or will not apply toward program and degree requirements. While the receiving institution makes this decision, it will do so within the parameters of this Policy.

The following guidelines and requirements shall govern the application of transfer and articulated credit:

**OHIO TRANSFER MODULE**

The Ohio Department of Higher Education’s Articulation and Transfer Policy established the Ohio Transfer Module, which may be a subset or the entire set of a public higher education institution’s general education curriculum in Associate of Arts (AA), Associate of Science (AS) and baccalaureate degree programs. Students in applied associate degree programs may complete some individual Ohio Transfer Module courses within their degree program or continue beyond the degree program to complete the entire Transfer Module. The Ohio Transfer Module contains 36-40 semester or 54-60 quarter hours of course credit in English composition (minimum of 3 semester or 5 quarter hours); mathematics, statistics and logic (minimum of 3 semester or 3 quarter hours); arts and humanities (minimum of 6 semester or 9 quarter hours); social and behavioral sciences (minimum of 6 semester or 9 quarter hours); and natural sciences (minimum of 6 semester or 9 quarter hours). Oral communication and interdisciplinary areas may be included as additional options. Additional elective hours from among these areas make up the total hours for a completed Ohio Transfer Module. Courses for the Ohio Transfer Module should be 100- and 200-level general education courses commonly completed in the first two years of a student’s course of study. Each public university and technical and community college is required to establish and maintain an approved Ohio Transfer Module.

Ohio Transfer Module course(s) or the full module completed at one college or university will automatically meet the requirements of individual Ohio Transfer Module course(s) or the full Ohio Transfer Module at another college or university once the student is admitted. Students may be required, however, to meet additional general education requirements at the institution to which they transfer. For example, a student who completes the Ohio Transfer Module at Institution S (sending institution) and then transfers to Institution R (receiving institution) is said to have completed the Ohio Transfer Module portion of Institution R’s general education program. Institution R, however, may have general education courses that go beyond its Ohio Transfer Module. State policy initially required that all courses in the Ohio Transfer Module be completed to receive its benefit in transfer. However, subsequent policy revisions have extended this benefit to the completion of individual Ohio Transfer Module courses on a course-by-course basis.

**TRANSFER ASSURANCE GUIDES**

Transfer Assurance Guides (TAGs) comprise Ohio Transfer Module courses and additional courses required for an academic major called TAG courses. A TAG is an advising tool to assist Ohio university and community and technical college students in planning for specific majors and making course selections that will ensure comparable, compatible, and equivalent learning experiences across Ohio’s public higher education system. A number of area-specific TAG pathways in meta-majors including the arts, humanities, business, communication, education, health, mathematics, sciences, engineering, engineering
technologies, social sciences, and foreign languages have been developed by faculty teams.

TAGs empower students to make informed course selection decisions and plans for their future transfer. Advisors at the institution to which a student wishes to transfer should also be consulted during the transfer process. Students may elect to complete the full TAG or any subset of courses from the TAG. Because of specific major requirements, early identification of a student’s intended major is encouraged.

**CAREER-TECHNICAL ASSURANCE GUIDES**

Collaboration among the Ohio Department of Higher Education, the Ohio Department of Education, and other key stakeholders led to the development of policies and procedures to create statewide career-technical discipline specific articulation agreements and further ensure that students completing coursework at an adult or secondary career-technical institution can articulate and transfer agreed-upon technical courses/programs to any Ohio public institution of higher education and among Ohio public institutions of higher education “without unnecessary duplication or institutional barriers.”

Career-Technical Assurance Guides (CTAGs) are statewide articulation agreements that guarantee the recognition of learning which occurs at public adult and secondary career-technical institutions and have the opportunity for the award of college credit toward technical courses/programs at any public higher education institution. CTAGs serve as advising tools, identifying the statewide content guarantee and describing other conditions or obligations (e.g., program accreditation or industry credential) associated with the guarantee.

**MILITARY TRANSFER ASSURANCE GUIDES**

In response to the legislative requirement (Ohio Revised Code 3333.164) to create a military articulation and transfer assurance guide for college-level learning that took place through military training, experience, and coursework, college credit will be granted to students with military training, experience, and/or coursework that is recognized by the American Council on Education (ACE) or a regionally accredited military institution, such as Community College of the Air Force.

In order to streamline the awarding, transferability, and applicability of college credit, service members and veterans are guaranteed to earn certain types of credit(s) or course(s) as specified in the Military Transfer Assurance Guides (MTAGs), which are based on the endorsed baseline standards and procedures by the Chancellor. Equivalent course(s), credits for courses, or block of credit is to be awarded and applied towards general education and/or major course requirements at the receiving institution in accordance with the MTAG guarantee. There is some training, experience, and coursework that the receiving institution may be able to award college credit only toward general or free electives.

In addition, public institutions of higher education shall ensure that appropriate equivalent credit is awarded for military training, experience, and coursework that meet the baseline standards and procedures according to the Ohio Revised Code 3333.164. This requirement goes beyond credit/course awarded based on the MTAG alignment process.

**APPRENTICESHIP PATHWAY PROGRAMS**

The Apprenticeship Pathways initiative advocates for individuals completing apprenticeships by incorporating their learning into academic credit, thereby saving them time and money and encouraging them to advance their academic credentials to contribute to a strong, educated workforce.

Ohio apprenticeship programs partner with public two-year institutions to provide technology-specific statewide articulation agreements that recognize non-traditional prior learning. College credit is awarded toward a technical associate degree. Each agreement simplifies student advising by outlining how apprenticeship training in a certain pathway applies to an applied associate degree and lists remaining courses required to complete the degree. The application of the credit toward a technical associate degree in these agreements is guaranteed at the participating receiving institutions.

**ADVANCED PLACEMENT (AP) EXAMS**

The State of Ohio, working with public institutions of higher education, has initiated policies to facilitate the ease of transition from high school to college, as well as between and among Ohio’s public colleges and universities.

Beginning in the Fall term 2009:

1. Students obtaining an Advanced Placement (AP) exam score of 3 or above will be awarded the aligned course(s) and credits for the AP exam area(s) successfully completed.

2. General Education courses and credits received will be applied towards graduation and will satisfy a general education requirement if the course(s)
to which the AP area is equivalent fulfill(s) a requirement.

3. If an equivalent course is not available for the AP exam area completed, elective or area credit will be awarded in the appropriate academic discipline and will be applied towards graduation where such elective credit options exist within the academic major.

4. Additional courses or credits may be available when a score of 4 or 5 is obtained. Award of credit for higher score values varies depending on the institution and academic discipline.

In academic disciplines containing highly dependent sequences (Sciences, Technology, Engineering and Mathematics – STEM) students are strongly advised to confer with the college/university advising staff to ensure they have the appropriate foundation to be successful in advanced coursework within the sequence.

ONE-YEAR OPTION CREDIT AWARD

The One-Year Option builds upon Ohio’s articulation and transfer system to help more adults accelerate their preparation for work by earning a technical associate degree. Consistent with the philosophy of the Career-Technical Assurance Guides (CTAGs), the One-Year Option guarantees that college credit will be awarded for college-level learning that occurs through adult programs at public career-technical institutions.

Adults who complete a career-technical education program of study consisting of a minimum of 900 clock-hours and achieve an industry-recognized credential approved by the Chancellor shall receive thirty (30) semester hours of technical course credit toward a standardized Associate of Technical Study Degree (ATS) upon matriculation at a public institution of higher education that confers such a degree. The 30 semester hours will be awarded as a block of credit rather than credit for specific courses. Proportional credit is to be awarded toward the ATS degree for adults who complete a program of study between 600 and 899 clock hours and achieved an industry-recognized credential approved by the Chancellor.

The credit earned through the One-Year Option will be applied to ATS degrees bearing the following standardized degree titles:

1. Associate of Technical Study in Building and Industrial Technology
2. Associate of Technical Study in Business Technology
3. Associate of Technical Study in Health and Allied Health Technology
4. Associate of Technical Study in Information Technology
5. Associate of Technical Study in Services Technology

CONDITIONS FOR TRANSFER ADMISSION

1. Graduates with associate degrees from Ohio’s public institutions of higher education and a completed, approved Ohio Transfer Module shall be admitted to a public institution of higher education in Ohio, provided their cumulative grade-point average is at least 2.0 for all previous college-level courses. Further, these students shall have admission priority over graduates with an out-of-state associate degree and other transfer students with transferable and/or articulated college credit.

2. Associate degree holders who have not completed the Ohio Transfer Module from an Ohio public institution of higher education will be eligible for preferential consideration for admission as transfer students as long as the institution’s admission criteria, such as the minimum academic standards, space availability, adherence to deadlines, and payment of fees, are fairly and equally applied to all undergraduate students.

3. In order to encourage completion of the baccalaureate degree, students who are not enrolled in or who have not earned a degree but have earned 60 semester/90 quarter hours or more of credit toward a baccalaureate degree with a cumulative grade-point average of at least a 2.0 for all previous college-level courses will be eligible for preferential consideration for admission as transfer students as long as the institution’s admission criteria, such as the minimum academic standards, space availability, adherence to deadlines, and payment of fees, are fairly and equally applied to all undergraduate students.

4. Students who have not earned an associate degree or who have not earned 60 semester/90 quarter hours of credit with a grade-point average of at least a 2.0 for all previous college-level courses will be eligible for admission as transfer students on a competitive basis.

5. Incoming transfer students admitted to a college or university shall compete for admission to selective programs, majors, and units on an equal basis with students native to the receiving institution.
The admission of transfer students by an institution, however, does not guarantee admission to any majors, minors, or fields of concentration at the institution. Some programs have additional academic and non-academic requirements beyond those for general admission to the institution (e.g., background check, a grade-point average higher than a 2.0, or a grade-point average higher than the average required for admission to the institution). Once admitted, transfer students shall be subject to the same regulations governing applicability of catalog requirements as native students. Furthermore, transfer students shall be accorded the same class standing and other privileges as native students on the basis of the number of credits earned. All residency requirements must be completed at the receiving institution.

Responsibilities of Students
To maximize transfer credit application, prospective transfer students must take responsibility for planning their course of study to meet both the academic and non-academic requirements of the institution to which they desire to articulate or transfer credit as early as possible. The student is responsible to investigate and use the information, advising, and other available resources to develop such a plan. Students should actively seek program, degree, and transfer information; meet with an advisor from both the current and receiving institutions to assist them in preparing a course of study that meets the academic requirements for the program/degree to which they plan to transfer; use the various electronic course/program transfer and applicability database systems, including Ohio Transfer to Degree Guarantee web resources; and select courses/programs at their current institution that satisfy requirements at the receiving institution to maximize the application of transfer credit. Specifically, students should identify early in their collegiate studies an institution and major to which they desire to transfer. Furthermore, students should determine if there are foreign language requirements or any special course requirements that can be met during the freshman or sophomore year. This will enable students to plan and pursue a course of study that will better articulate with the receiving institution’s major.

APPEALS PROCESS
Following the evaluation of a student transcript from another institution, the receiving college institution will provide the student with a Statement of Transfer and Articulated Credit Applicability (Degree Audit Report). A student disagreeing with the application of transfer and/or articulated credit by the receiving institution must file his/her appeal in writing within ninety (90) days of receipt of the Statement of Transfer and Articulated Credit Applicability. The institution shall respond to the appeal within thirty (30) days of the receipt of the appeal at each appeal level.

STUDENT COMPLAINTS FOLLOWING TRANSFER APPEALS AT THE RECEIVING INSTITUTION
After a student exhausts the appeals process at the receiving institution and chooses to pursue further action, the Ohio Department of Higher Education (ODHE) responds to formal written complaints related to Ohio Articulation and Transfer Policy against public, independent non-profit, and proprietary institutions of higher education in Ohio. While the ODHE has limited authority over colleges and universities and cannot offer legal advice or initiate civil court cases, staff will review written complaints submitted through its established process and work with student complainants and institutions.

REVERSE TRANSFER
Reverse Transfer is a process to award associate degrees to students who earned credits that satisfied residency requirements at Washington State Community College, did not earn their associate degree, and transferred to a four-year institution where they are currently enrolled, regardless if the four-year institution is public, private, or across state lines. Eligible students can receive a first associate degree that accurately reflects their educational attainment and allows them to compete more successfully in higher education and the workforce. The process is standardized, streamlined, and technologically enhanced to enable four and two-year institutions to transfer student credits more efficiently, securely, and successfully through the National Student Clearinghouse. There will be no fees for the service; even transcripts are sent with no charge to the student or institution. Eligible students must provide consent to the four-year institution for academic records to be shared with the two-year institution. When the student reaches a specified number of credit hours (indicating eligibility for an associate degree) the two-year institution will be notified and will evaluate the student’s academic record for completion of associate degree requirements. For more information on Reverse Transfer, visit reversetransfer.org.

WASHINGTON STATE TRANSFER MODULE
The Washington State transfer curricula are designed around the Ohio Transfer Module (OTM). This module provides the foundation of the Ohio Articulation and Transfer Policy adopted by the Ohio Department of Higher Education. All colleges and universities have a general education requirement which comprises much of the freshman and sophomore years. The college’s Transfer Module contains courses which satisfy many of these requirements at any state university in Ohio.
The purpose of this module is to ease transfer to any of Ohio's state universities if the student takes the courses as prescribed in the module. The OTM at Washington State consists of a core of 36-40 credit hours in English composition, mathematics, natural sciences, arts and humanities, and social and behavioral sciences.

Responsibilities of Students
Washington State offers the courses to fulfill the requirements of the Transfer Module. It is the responsibility of the student to be familiar with the requirements of the module and to follow them exactly. Any deviation from the requirements of the Transfer Module will require that the student's transfer take place on a course–by–course basis at the discretion of the receiving institution.

It is also the responsibility of the student to make choices about baccalaureate majors and four-year institutions to which he or she wishes to transfer.

Academic advising decisions concerning course selections are made based on the student's anticipated major and the institution he or she will attend. Therefore, it is important that the student make these decisions and communicate them to his or her academic advisor as early as possible.

The following distribution of courses will fulfill the requirements of the Transfer Module. Descriptions, including credit hours and prerequisites, are included in the course descriptions section of this catalog.

- **English Composition** – a minimum of 6 credit hours is required in English composition.
- **Mathematics** – a minimum of 3 credit hours is required in mathematics.
- **Natural Sciences** – a minimum of 6 credit hours is required in biology, geology, chemistry, or physics. One course must include a lab component.
- **Arts and Humanities** – a minimum of 9 credit hours is required in art, music, literature, philosophy, humanities, or theatre. Courses must be taken in at least two subject areas.
- **Social and Behavioral Sciences** – a minimum of 9 credit hours is required in anthropology, geography, sociology, political science, psychology, economics, or specified history courses. Courses must be taken in at least two subject areas.
- **Transfer Module Electives** – a minimum of 3 credit hours selected from approved Transfer Module courses in any of the above categories, or from the approved list of interdisciplinary and elective courses.

Each of these requirements is detailed in the following sections. Credit hours for each course are in parentheses.

## ARTS AND HUMANITIES

Nine credit hours are required in Arts and Humanities. Courses should be taken from at least two of the subject areas listed.

### Art
- ARTS 1000 Art Appreciation (3)
- ARTS 2010 Art History I (3)
- ARTS 2020 Art History II (3)
- ARTS 2050 American Art (3)
- ARTS 2090 History of Photography (3)
- ARTS 2340 Pre-Columbian Art (3)

### Humanities
- HUMN 1200 Introduction to Film (3)
- HUMN 1300 Survey of Mythology (3)
- HUMN 2480 Science of Science Fiction (3)
- HUMN 120H Introduction to Film Honors (3)

### Literature
- LITR 2010 Introduction to Fiction (3)
- LITR 2020 Introduction to Poetry (3)
- LITR 2030 Introduction to Drama (3)
- LITR 2040 Introduction to World Literature I (3)
- LITR 2050 Introduction to World Literature II (3)
- LITR 2100 Survey of American Literature I (3)
- LITR 2110 Survey of American Literature II (3)
- LITR 2200 Survey of British Literature I (3)
- LITR 2210 Survey of British Literature II (3)
- LITR 2620 Adolescent Literature (3)
- LITR 2700 Introduction to Shakespeare (3)

### Music
- MUSC 1200 Music Appreciation (3)
- MUSC 1250 Survey of American Music (3)

### Philosophy
- PHIL 1010 Introduction to Philosophy (3)
- PHIL 1200 Principles of Reasoning (3)
- PHIL 1300 Introduction to Ethics (3)

### Theatre
- THEA 1200 Introduction to the Theatre (3)

## COMMUNICATION SKILLS

The student should place an emphasis on written composition. At a minimum, a student must complete English Composition I plus one course from the approved list. Speech (SPCH 1510) may not count as a written communication course but may serve as a Transfer Module elective.

- ENGL 1515 Technical Writing (3)
- ENGL 1513 Business Writing (3)
- ENGL 1510 English Composition I (3)
- ENGL 1520 English Composition II (3)
- ENGL 1530 English Composition III (3)
- SPCH 1510 Speech (3)
- ENGL 151H English Composition I Honors (3)
- ENGL 152H English Composition II Honors (3)
At least one course in mathematics must be taken. Mathematics courses for the Transfer Module build on three years of college preparatory mathematics or the equivalent.

- MATH 2110 Principles of Statistics (3)
- MATH 2120 Trigonometry (3)
- MATH 2130 College Algebra (4)
- MATH 2150 Precalculus (5)
- MATH 2173 Survey of Math I (4)
- MATH 2175 Survey of Math II (3)
- MATH 2250 Elementary Linear Algebra (3)
- MATH 2260 Introduction to Calculus (3)
- MATH 2263 Analytic Geometry and Calculus I (4)
- MATH 2264 Analytic Geometry and Calculus II (4)
- MATH 2265 Analytic Geometry and Calculus III (4)
- MATH 2270 Differential Equations (3)

Six credits or more should be taken in the natural sciences. One course must be a laboratory course which includes at least one laboratory meeting per week.

Courses should be taken from at least two of the subject areas listed.

**Biology**
- BIOL 1010 Principles of Biology (3)
- BIOL 101L Principles of Biology Lab (1)
- BIOL 1100 General Biology I (3)
- BIOL 110L General Biology I Lab (1)
- BIOL 1110 General Biology II (3)
- BIOL 111L General Biology II Lab (1)
- BIOL 1310 Anatomy and Physiology I *(2)
- BIOL 131L Anatomy and Physiology I Lab* (1)
- BIOL 1320 Anatomy and Physiology II *(2)
- BIOL 132L Anatomy and Physiology II Lab * (1)
- BIOL 2010 Basic Microbiology (2)
- BIOL 201L Basic Microbiology Lab (1)
- BIOL 2110 Environmental Biology (3)
- BIOL 211L Environmental Biology Lab (1)
- BIOL 2310 Human Anatomy & Physiology I** (3)
- BIOL 231L Human Anatomy & Physiology I Lab ** (1)
- BIOL 2320 Human Anatomy & Physiology II** (3)
- BIOL 232L Human Anatomy & Physiology II Lab ** (1)
- BIOL 2600 Introduction to Ecology (3)
- BIOL 260L Introduction to Ecology Lab (1)
- BIOL 110H General Biology I Honors (3)

*This anatomy and physiology series is recommended for non-science majors and students in Practical Nursing.

**This human anatomy and physiology series is recommended for health and science majors only.

**Chemistry**
- CHEM 1210 Principles of Chemistry I* (3)
- CHEM 121L Principles of Chemistry I Lab* (1)
- CHEM 1220 Principles of Chemistry II (3)
- CHEM 122L Principles of Chemistry II Lab* (1)
- CHEM 1510 Fundamentals of Chemistry I** (3)
- CHEM 151L Fundamentals of Chemistry I Lab** (1)
- CHEM 1520 Fundamentals of Chemistry II (3)
- CHEM 152L Fundamentals of Chemistry II Lab (1)

*This principles of chemistry is for technical education students and others pursuing programs requiring only one year of chemistry.

**This fundamentals of chemistry series is for students planning to pursue a major in biological sciences, chemistry, physics, pre-professional studies, or mechanical and chemical engineering.

**Geology**
- GEOL 2310 Environmental Geology (3)
- GEOL 231L Environmental Geology Lab (1)

**Physics/Astronomy**
- PHYS 1100 Principles of Physical Science I (3)
- PHYS 110L Principles of Physical Science I Lab (1)
- PHYS 1200 Principles of Physical Science II (3)
- PHYS 120L Principles of Physical Science II Lab (1)
- PHYS 1210 Survey of Astronomy (3)
- PHYS 121L Survey of Astronomy Lab (1)
- PHYS 2010 Introduction to Physics I* (3)
- PHYS 201L Introduction to Physics I Lab* (1)
- PHYS 2030 Introduction to Physics II (3)
- PHYS 203L Introduction to Physics II Lab (1)
- PHYS 2510 General Physics I** (4)
- PHYS 251L General Physics I Lab** (1)
- PHYS 2530 General Physics II (4)
- PHYS 253L General Physics II Lab (1)
- PHYS 251H General Physics I Honors (3)

*This introduction to physics series is for arts, humanities, social sciences, and technology majors.

**This general physics series is for science & engineering majors.
SOCIAL AND BEHAVIORAL SCIENCE

Nine credit hours are required in the social and behavioral sciences. Courses should be taken from at least two of the subject areas listed.

Anthropology
• ANTH 1510 Cultural Anthropology (3)

Economics
• ECON 2120 Principles of Macroeconomics (3)
• ECON 2130 Principles of Microeconomics (3)

Geography
• GEOG 1210 Cultural Geography (3)

History
• HIST 1010 Civilization I Early World Culture (3)
• HIST 1020 Civilization II Early Modern Period (3)
• HIST 2110 American History to 1828 (3)
• HIST 2120 American History 1828 to Present (3)

Political Science
• POLS 1020 American National Government (3)
• POLS 1030 State and Local Government (3)

Psychology
• PSYC 1010 General Psychology (3)
• PSYC 2100 Social Psychology (3)
• PSYC 2320 Abnormal Psychology (3)
• PSYC 2700 Developmental Psychology (3)
• PSYC 2750 Educational Psychology (3)

Sociology
• SOCI 1010 Sociology (3)
• SOCI 2010 Social Problems (3)
• SOCI 2200 Sociology of the Family (3)
• SOCI 2250 The Sociology of Race and Ethnicity in America (3)
• SOCI 101H Introduction to Sociology Honors (3)

Prerequisites are required for some courses. Evening courses may be required to complete this program.

## ASSOCIATE OF SCIENCE DEGREE FOR TRANSFER

The Biological Sciences Transfer program provides the foundation courses needed to transfer into four-year science-related programs in fields such as biological sciences, environmental sciences, medicine, microbiology, and pharmacy.

The Biological Sciences Transfer curriculum leads to the Associate of Science degree, and meets the transfer module requirements for transfer to Ohio state colleges and universities.

If prerequisite courses in mathematics and science are not already completed, the necessary courses may be taken at Washington State, but more time may be required to complete the degree.

**Graduates of the program will be able to:**

- Transfer to four-year bachelor’s degree programs with junior status.
- Demonstrate knowledge and understanding regarding the structure and function of cells, the molecular basis of heredity, biological evolution, interdependence among organisms, energy and the organization of living things, and the behavior of organisms.
- Construct full-scale scientific investigations, including: formulate questions to be answered; design approaches that incorporate appropriate variables and controls; implement solutions; and collect and record qualitative and quantitative data.
- Problem solve, think critically, and communicate effectively using both written and oral form.
- Develop a working knowledge of the relationships among sciences and society.

Updated April 14, 2017
**ASSOCIATE OF ARTS DEGREE FOR TRANSFER**

The Business Administration Transfer program is designed to provide basic coursework that will enable transfer to baccalaureate programs in business administration, accounting, finance, management, and marketing. The program allows the flexibility needed to transfer into the four-year institution of their choice. The emphasis is on completion of general education requirements and courses in economics, accounting, and mathematics to prepare for work in a chosen major at the four-year institution.

If you plan to transfer to a baccalaureate program in business (including accounting, management, marketing, finance and other related areas) you should be aware of significant differences between course requirements and the application of transfer credits at the various institutions in this region.

Students should work closely with an academic advisor, department chair and/or the director of advising and transfer to tailor the academic programs for transfer to the institution of choice.

The Business Administration Transfer curriculum leads to the Associate of Arts degree and meets the transfer module requirements for transfer to Ohio state colleges and universities.

**Graduates of the program will be able to:**
- Goal 1: Demonstrate that basic requirements for transferring to a bachelor’s program have been met.
- Goal 2: Problem solve, think critically and communicate effectively through the use of accounting practice sets, business simulations, and presentations.
- Goal 3: Communicate an understanding of basic economic events that occurred during US history.
- Goal 4: Analyze business data and forecasts through the use of technology.

**ASSOCIATE OF ARTS DEGREE FOR TRANSFER**

The Education Transfer - Early Childhood curriculum provides for a major concentration in early childhood (three to eight years old) that will transfer to a variety of institutions offering four- and five-year degree programs that lead to teacher licensure. Graduates of Washington State’s education transfer program have successfully transferred to Marietta College, West Virginia University-Parkersburg, Ohio University, Ohio Valley University, The Ohio State University, Muskingum University, and many other institutions. To increase the likelihood that smooth transfer occurs, students should work closely with their academic advisors to select specific courses which meet the requirements of the teacher education program they intend to pursue.

To complete degree and/or certification requirements in middle school, adolescent/young adult, or K–12 art, music, physical education, or special education, consult with an academic advisor to meet the requirements of the selected four-year institution. The Education Transfer curriculum leads to the Associate of Arts degree and meets the Transfer Module requirements for transfer to Ohio state colleges and universities. A group of education transfer program courses have been approved to meet the Ohio Transfer Assurance Guide (TAG) for education.

**Graduates of the program will be able to:**

- Meet the general education requirements of the college.
- Be prepared to pass the Praxis CORE Academic Skills for Educators Test.
- Gain knowledge of the historical and philosophical foundations of education, school structure, government, and effective school operation in a pluralistic society.
- Investigate career expectations and current educational issues.
- Participate in and begin to make personal decisions concerning the appropriateness of a career in education.
- Demonstrate the ability to develop and execute a detailed lesson plan.
- Gain knowledge about the characteristics, identification, and needs of exceptional individuals and how to adapt instruction to meet their needs.
- Work with exceptional individuals in a school or agency setting to see how theory is put into practice.
- Learn how to operate and implement technology in the classroom and in instructional planning.
- Have the opportunity to begin in-depth study in selected areas of concentration.

---

ASSOCIATE OF ARTS DEGREE FOR TRANSFER
The Education Transfer program is designed to provide the general education courses needed to transfer into four and five-year programs in teacher education. The Middle Years program prepares you to teach children nine to 13 years old. In addition to general education courses and a core of professional education courses, students enrolled in this program should begin taking courses in two areas of concentration chosen from language arts, sciences, mathematics, and/or social studies.

The goals of the Education Transfer program at Washington State focus on providing instruction and experience that will allow graduates to successfully transfer to four– and five–year institutions offering degrees that lead to teacher licensure at the early years, middle years, or young adult levels. Graduates of Washington State’s Education Transfer program have successfully transferred to Marietta College, West Virginia University-Parkersburg, Ohio University, Ohio Valley University, The Ohio State University, Muskingum University, and many other institutions. To increase the likelihood that smooth transfer occurs, students should work closely with their academic advisors to select specific courses which meet the requirements of the teacher education program they intend to pursue.

To complete degree and/or certification requirements in middle school, adolescent/young adult, or K–12 art, music, physical education, or special education, consult with an academic advisor to meet the requirements of the selected four-year institution. The Education Transfer curriculum leads to the Associate of Arts degree and meets the Transfer Module requirements for transfer to Ohio state colleges and universities. A group of education transfer program courses have been approved to meet the Ohio Transfer Assurance Guide (TAG) for education.

Graduates of the program will be able to:
- Meet the general education requirements of the college.
- Be prepared to pass the Praxis CORE Academic Skills for Educators Test.

**ASSOCIATE OF ARTS DEGREE FOR TRANSFER**

The Education Transfer program is designed to provide the general education courses needed to transfer into four and five-year programs in teacher education. The Adolescent/Young Adult program prepares you to teach those 12 to 21 years old. In addition to general education courses and a core of professional education courses, students enrolled in this program should begin taking courses in an area of concentration chosen from language arts, sciences, mathematics, and/or social studies.

The goals of the Education Transfer program at Washington State focus on providing instruction and experience that will allow graduates to successfully transfer to four- and five-year institutions offering degrees that lead to teacher licensure at the early years, middle years, or young adult levels. Graduates of Washington State’s Education Transfer program have successfully transferred to Marietta College, West Virginia University-Parkersburg, Ohio University, Ohio Valley University, The Ohio State University, Muskingum University, and many other institutions. To increase the likelihood that smooth transfer occurs, students should work closely with their academic advisors to select specific courses which meet the requirements of the teacher education program they intend to pursue.

To complete degree and/or certification requirements in middle school, adolescent/young adult, or K–12 art, music, physical education, or special education, consult with an academic advisor to meet the requirements of the selected four-year institution. The Education Transfer curriculum leads to the Associate of Arts degree and meets the Transfer Module requirements for transfer to Ohio state colleges and universities. A group of education transfer program courses have been approved to meet the Ohio Transfer Assurance Guide (TAG) for education.

**Graduates of the program will be able to:**

- Meet the general education requirements of the college.
- Be prepared to pass the Praxis CORE Academic Skills for Educators Test.
- Know the historical and philosophical foundations of education, school structure, government, and effective school operation in a pluralistic society.
- Investigate career expectations and current educational issues.
- Participate in and begin to make personal decisions concerning the appropriateness of a career in education.
- Develop and execute a detailed lesson plan.
- Gain knowledge about the characteristics, identification, and needs of exceptional individuals and how to adapt instruction to meet their needs.
- Work with exceptional individuals in a school or agency setting to see how theory is put into practice.
- Operate and implement technology in the classroom and in instructional planning.
- Begin in-depth study in selected areas of concentration.

Prerequisites are required for some courses. Evening courses may be required to complete this program.
### ASSOCIATE OF SCIENCE DEGREE FOR TRANSFER

The Engineering Transfer program provides the basic core requirements for transfer into a university or college engineering baccalaureate program. Program emphasis is on completion of mathematics and science sequences, as well as humanities, social, and behavioral electives.

In order to facilitate the transfer process to a four-year college or university, consultation with an advisor, department chair or the director of advising and transfer is recommended during the first academic year. Seeking the necessary information and advice from both the transfer and the prospective receiving institution is encouraged. Prerequisite courses in mathematics or science may need to be completed before attempting prescribed courses required for the transfer degree. This coursework is necessary for success and may increase the time required to earn the associate’s degree.

Completion of the Associate of Science Degree in Engineering Transfer meets the requirements in completing the Ohio Transfer Module. This guarantees the application of a minimum of 57 hours to the general education requirements of all state supported institutions in Ohio. Receiving institutions are encouraged to award preferential consideration for admission to students completing the module.

Graduates of the program will be able to:

- Apply mathematics, physics, and reasoning skills to solve problems.
- Use, apply, and program a computer.
- Analyze and adopt a defensible position on historical or current issues.
- Articulate into a Bachelor of Science Degree in Engineering with the necessary background in Calculus and Physics.
- Successfully apply methods of engineering mechanics.

ASSOCIATE OF ARTS DEGREE FOR TRANSFER

The Graphic Design major leads to the Associate of Arts degree in Fine Arts Transfer. This degree provides a foundation for students to pursue further study in the visual arts, including studio art, graphic art, computer graphics, game design, and industrial design.

Students should be aware that to transfer as a true junior into a baccalaureate program in fine arts may require more than two years of preparation. Therefore, they should work closely with their academic advisor, department chair, or the director of advising and transfer to tailor their program for transfer to the institution of their choice, and should consult that institution’s catalog requirements early in their program.

The goals of the Fine Arts Transfer program at Washington State focus on providing instruction and experience that will allow graduates to successfully transfer to institutions that offer either the four-year Bachelor of Arts or the five-year Bachelor of Fine Arts degree.

Graduates of the program will be able to:

- Meet the general education requirements of the college and be prepared to transfer as a junior in their area of concentration.
- Apply a system or methodology for art making.
- Define, explain, and apply the perceptual and conceptual skills used in art making.
- Possess analytical skills necessary for problem solving, critical thinking, and art making.
- Make, communicate, and defend critical judgments based on knowledge of historical and contemporary practice.
- Demonstrate development toward a personal image, i.e., artwork containing a personal or unique point of view.

## ASSOCIATE OF ARTS DEGREE FOR TRANSFER

The Studio Art major leads to the Associate of Arts degree in Fine Arts Transfer. This degree provides a foundation for further study in visual art, including studio art, graphic art, computer graphics, game design, and industrial design.

To transfer as a true junior into a baccalaureate program in fine arts may require more than two years of preparation. Therefore, students should work closely with an academic advisor, department chair, or the director of advising and transfer to tailor their program for transfer to the institution of choice, and should consult that institution’s catalog requirements early in the program.

The goals of the Fine Arts Transfer program at Washington State focus on providing instruction and experience that will allow graduates to successfully transfer to institutions that offer either the four-year Bachelor of Arts or the five-year Bachelor of Fine Arts degree.

Graduates of the program will be able to:

- Meet the general education requirements of the college and be prepared to transfer as a junior in their area of concentration.
- Apply a system or methodology for art making.
- Define, explain, and apply the perceptual and conceptual skills used in art making.
- Possess analytical skills necessary for problem solving, critical thinking, and art making.
- Make, communicate, and defend critical judgments based on knowledge of historical and contemporary practice.
- Demonstrate development toward a personal image, i.e., artwork containing a personal or unique point of view.
ASSOCIATE OF SCIENCE DEGREE FOR TRANSFER

If a career in medicine, veterinary medicine, dentistry or zoology is in your future, then Washington State’s General Sciences Transfer might be the right option for you. This program meets the Transfer Module requirements for transfer to any Ohio state college or university.

If prerequisite courses in mathematics and science are not already completed, the necessary courses may be taken at Washington State, but more time may be required to complete the degree.

The General Sciences Transfer program curriculum leads to the Associate of Science degree and meets the Transfer Module requirements for transfer to Ohio state colleges and universities. This program provides the foundation courses needed to transfer into a four-year program in science and science-related fields such as medicine, dentistry, pharmacy, astronomy, meteorology, and environmental science.

Graduates of the program will be able to:

• Transfer to an accredited college or university with junior status.
• Propose, consider, analyze, and evaluate alternative explanation to scientific phenomena.
• Conduct scientific investigations, formulate questions, and design approaches that incorporate appropriate variables and controls.
• Implement solutions, collect and record qualitative and quantitative data, and communicate the results.
• Know and apply the concepts, principles, and processes of technological design.

Prerequisites are required for some courses. Evening courses may be required to complete this program.
## ASSOCIATE OF INDIVIDUALIZED STUDIES

### GENERAL & BASIC COURSES
- English Elective 3
- English Elective 3
- Speech Elective 3
- Social/Behavioral Science Elective 3
- Arts & Humanities Elective 3
- Computer Applications Elective 3
- Math Elective 3
- Natural Sciences Elective 3
- General Education Elective 3
- General Education Elective 3

Credit Hours 30

### MAJOR CONCENTRATION COURSES
- Major Concentration Elective 3
- Major Concentration Elective 3
- Major Concentration Elective 3
- Major Concentration Elective 3
- Major Concentration Elective 3
- Major Concentration Elective 3
- Major Concentration Elective 3
- Major Concentration Elective 3
- Major Concentration Elective 3

Credit Hours 30

Total Credit Hours 60-65

The Associate of Individualized Studies (A.I.S.) is awarded to students who successfully complete an individually designed curricula prescribed to meet specific career goals.

Students must satisfactorily complete a minimum of 60 semester credit hours in a well-planned, unique program to serve an educational objective that could not be served through another degree program at the college.

Five general education goals will be included in each individually-designed curricula, for a minimum of 30 semester credits of general and basic related course requirements.

The program leading to the A.I.S. must contain an area of concentration consisting of a minimum of 30 to maximum of 35 semester credit hours formed either by:

- An intra-college, interdisciplinary, but coherent combination of courses drawn from a minimum of two and maximum of four instructional areas of study; or
- Up to 35 semester credit hours awarded by the college for documentable educational experiences or courses completed at another college judged by WSCC to be of college level; or
- An unusual but academically coherent combination of technical and general studies courses.

Upon petitioning for acceptance into the A.I.S. program, a representative of Enrollment Management, the student’s committee, and the student will determine the remaining required courses. Once students are accepted into the program, they must complete at least 20 credit hours within the approved A.I.S. program with at least half in the area of the approved concentration. Students with less than 30 credit hours remaining toward a degree must have the approval of the Dean of Arts & Sciences to enroll in the program.

Prerequisites are required for some courses. Evening courses may be required to complete this program.

## ASSOCIATE OF ARTS DEGREE FOR TRANSFER

Employers today demand workers who can integrate knowledge from a variety of areas and communicate complex ideas effectively. As a result they are looking more and more for candidates with strong liberal arts backgrounds. Businesses, industries, and public and private agencies are hiring liberal arts graduates because these graduates learn quickly, think critically and independently, communicate effectively, and easily adapt to the global workplace. A Liberal Arts Transfer degree is so diverse that graduates can fill positions from finance to public administration, government to recreation, administration to education and beyond.

The Liberal Arts Transfer program leads to the Associate of Arts degree in Liberal Arts. A minimum of 16 credits is required for a major concentration, with recommended areas of study including: art, business, history, literature, music, mathematics, philosophy, political science, sciences, sociology, and Spanish. Other major concentrations may be possible but are subject to the approval of the Dean of Arts & Sciences. Washington State Liberal Arts graduates have successfully transferred to Marietta College, West Virginia University – Parkersburg, Ohio University, The Ohio State University, Muskingum University, and many other institutions.

You should work closely with an academic advisor and/or department chair to tailor an academic program for transfer to the institution of your choice. If studying liberal arts, you should strongly consider taking foreign languages through the 2130 level. For transfer to most bachelors programs, four years of the same foreign language in high school or four semesters of the same foreign language in college is recommended or required for graduation. The liberal arts transfer curriculum meets the Transfer Module requirements for transfer to Ohio state colleges and universities.

**Graduates of the program will be able to:**

- Meet the general education requirements of Washington State Community College and be prepared to transfer to a four-year institution as a junior.
- Demonstrate specific knowledge of Liberal Arts through analysis, evaluation, and communication of information.
- Demonstrate methods for critically acquiring and evaluating information, drawing conclusions, and defending those conclusions rationally in effective oral and written communications.
- Apply decision-making processes by synthesizing ideas, data collection, research, and analysis.
- Demonstrate an understanding of the world beyond their immediate experience.
ASSOCIATE OF SCIENCE DEGREE FOR TRANSFER

If you like mathematical analysis and applications, spatial relations and data analysis, or are interested in teaching mathematics, then Washington State’s Mathematics Transfer program might be the right option for you. Career opportunities include but are not limited to: teacher, professor, computer scientist, actuary, finance manager, financial advisor, pharmacist, and statistics/data analyst.

The Mathematics Transfer program provides preparation for transfer to four-year colleges and universities to pursue a baccalaureate degree in an area of mathematics or computer science. The Mathematics Transfer curriculum leads to the Associate of Science degree, and meets the Transfer Module requirements for transfer to Ohio state colleges and universities. The required math courses are part of the transfer assurance guide (TAG). If prerequisite courses in mathematics and science are not already completed, the necessary courses may be taken at Washington State, but more time may be required to complete the degree.

Graduates of the program will be able to:

- Demonstrate competency in mathematics through Calculus III.
- Problem solve, think critically, and communicate effectively.
- Use technology (graphing calculator) to analyze equations, data and graphs.
- Show that they have fulfilled the requirements of the program by completing the degree audit sheet for an Associate of Science Degree.

Prerequisites are required for some courses. Evening courses may be required to complete this program.
The Physical Sciences Transfer program provides the foundation courses needed to transfer into a four-year college or university for a bachelor's degree in chemistry or physics. Also, the program can prepare for transfer into such fields as: medicine, dentistry, pharmacy, astronomy, meteorology, and environmental science.

Successful completion of the physical sciences transfer program leads to the Associate of Science degree and meets the Transfer Module requirements for transfer to Ohio state colleges and universities. If prerequisite courses in mathematics and science are not already completed, the necessary courses may be taken at Washington State, but more time may be required to complete the degree.

Graduates of the program will be able to:
- Transfer to an accredited college or university with junior status.
- Demonstrate basic competency in a science field through CHEM 1520, and/or MATH 2265, and/or PHYS 2530.
- Solve problems, think critically, and communicate effectively in both written and oral forms.
- Effectively use various types of technology related to science, including but is not limited to: Mathematica software, graphing calculators, computers, Microsoft Excel, graphics analysis, and word processing programs.
- Evaluate and interpret results of experiments, calculations, and technological devices.

- MATH 2265 | Analytical Geometry & Calculus III | 4
- MATH 2270 | Differential Equations | 3
- PERS 1060 | Personal Career Development | 3

Prerequisites are required for some courses. Evening courses may be required to complete this program.
ASSOCIATE OF ARTS DEGREE FOR TRANSFER

The Social Service Transfer program leads to the Associate of Arts Degree with a social service major for transfer. A minimum of 12 credits in specific Social Service courses are required for a major concentration. There are 24 credits in natural science, mathematics, arts & humanities and social/behavioral science; some of these courses require prerequisites. No practicum field work courses are required. There are fewer social service courses in this option since the goal is not immediate entry into direct employment.

You should work closely with an academic advisor to structure a program for transfer into a social or behavioral science, human services, or social work bachelors program. For transfer to most bachelors programs, four years of the same foreign language in high school or four semesters in college is recommended. The Social Service Transfer curriculum meets the Transfer Module requirements for transfer to Ohio state colleges and universities.

Graduates of the program will be able to:

- Meet the general education requirements of Washington State Community College and be prepared to transfer to a four-year institution as a junior.
- Demonstrate specific knowledge within their discipline of study through analysis, evaluation, and communication of information from within the discipline.
- Critically acquire and evaluate information, drawing conclusions between and among various disciplines, and defending those conclusions rationally in effective oral and written communications.
- Apply decision-making processes by synthesizing ideas drawn from broad areas of knowledge.
- Demonstrate an understanding of the world beyond their immediate experience.

**ASSOCIATE OF APPLIED BUSINESS DEGREE**

Accounting ranks as one of the top career opportunities in business.

The Accounting Technology curriculum prepares students for various accounting positions such as:

- Bookkeeper
- Payroll Specialist
- Accounts Receivable/Payable Clerk
- Tax Preparer
- Governmental Accounting Clerk
- Cost Accountant
- Inventory Specialist

Manual and computerized accounting systems are employed in the study of accounting principles.

The Accounting Technology program is designed to provide a concentration of financial and managerial accounting with related business and computer courses, plus general courses to succeed in the accounting profession or transfer to a four-year college. Successful completion of the program leads to the Associate of Applied Business degree.

**Graduates of the program will be able to:**

- Prepare and maintain books for business and industry, including financial statement preparation.
- Apply theory and practical application of job order costing, process costing, standard costing, and activity based costing methods.
- Develop and present reliable financial statement analysis.
- Apply knowledge of current computer technology to the business environment.
- Demonstrate proficient ability to use manual and computerized accounting systems.

---

Prerequisites are required for some courses. Evening and/or online courses may be required to complete this program.
ASSOCIATE OF APPLIED BUSINESS DEGREE

In business today, the effective manager understands all phases of the company's operation and elicits the performance needed to maintain the organization. In short, managers are key to the survival and growth of business. There are a large number of career opportunities in business management, for the qualified individual. College graduates are prime candidates for management training programs and jobs that lead to middle management.

Washington State Community College's Business Management Technology program provides students with a general business background. They receive instruction in all phases of business operations, including: management, communication, economics, entrepreneurship, business law, marketing, finance, international business and accounting. The curriculum leads to the Associate of Applied Business Degree. The Business Management courses are offered in a variety of formats - day, night, and online.

Graduates of the program will be able to:

- Demonstrate technologies basic to the field of business management including:
  - Management
  - Accounting
  - Computer applications
  - Quantitative methods of analysis
  - Principles of economics
  - Marketing
  - Entrepreneurship
  - Finance
  - Business ethics
- Know applicable federal and state laws.
- Demonstrate, through role play, the ability to take the text and lecture information and apply it to management areas: job selection, interview, discipline, and discharge.
- Write and produce product advertisements and advertisements for company job openings.
- Gather, organize, interpret, write, and present research on a current topic related to marketing.
- Be aware of the importance of confidentiality that is necessary for the field of management.
- Demonstrate effective written, oral, and nonverbal communication with employees, coworkers, and the public.
- Think independently, clarify values, understand fundamental theory, and develop critical thinking skills.
- Interact with coworkers, subordinates, and customers in a manner that provides the desired psychological and social support including the recognition of cultural and socioeconomic differences.
- Demonstrate awareness in the importance of international understanding in an increasingly interdependent global community.

CYBER SECURITY & INVESTIGATION

ASSOCIATE OF TECHNICAL STUDIES

The Associate of Technical Studies in Cyber Security combines the education and skills training of both criminal investigation and computer support technology to prepare students for entry-level positions in cyber security and investigations, computer network infrastructure and security, managing networks and operating systems, and IT criminal investigation.

The core course work required in the computer support curriculum includes work with operating systems, such as Windows 7, Windows 10, Windows Server 2008, 2012, 2016, Linux, and the Cisco IOS. Students work with networking hardware including copper and fiber optic media, switches, routers, firewalls, and wireless access points. Additional course work directly relates to the Cisco Academy, network security, and computer forensics.

The computer support course work is enhanced by select criminal justice course work in criminal investigation, criminal evidence and procedures, criminal law, and computer forensics training.

Washington State’s Cyber Security program features practical hands-on learning in computer diagnostics and networking. These team-based lab exercises will put your skills to work out in the field during practicum or internship assignments.

The goal of this program is to prepare students for entry level positions in the cyber security field. Students are encouraged to prepare for CompTIA certification exams, including A+, Network+, Linux+, and Security+ certifications, and Cisco CCENT Certification.

Successful completion of the cyber security curriculum leads to an Associate of Technical Studies for pursuit of direct employment or advanced degree studies. The program can be completed in four (4) semesters. High School students in College Tech Prep may complete the program in less time if they have taken equivalent courses.

Prerequisites are required for some courses. Evening courses may be required to complete this program.

**ASSOCIATE OF APPLIED BUSINESS DEGREE FOR DIRECT EMPLOYMENT**

Graphics are an integral part of designing for the Internet/Intranet/World Wide Web and print industries. The Digital Technology - Computer Graphics program will help to develop your technical ability to design for all of these mediums.

The purpose of the Computer Graphics program is to respond to the needs of local businesses by supplying a pool of qualified candidates who can design for multiple mediums. The program offers hands-on computer experience with state-of-the-art software so that the students can acquire the best possible position upon graduation. Recognizing the ever-changing environment in the graphics field, the program’s technology and curriculum is continually evaluated.

Successful completion of the Digital Technology - Computer Graphics program leads to the Associate of Applied Business degree and prepares the graduate to achieve employment in a graphics position in advertising, newspaper, magazine, and/or Web design/development industries.

**Graduates of the program will be able to:**

- Understand and apply the emerging technologies basic to the field of computer graphics including:
  - Web page design/development
  - Vector and raster graphics
  - Page layout/desktop publishing/picture editing
  - Digital video/audio fundamentals
- Effectively operate in a graphics position on either Windows or Macintosh platforms.
- Produce a portfolio consisting of print and Web design examples.
- Determine and design interface for products.
- Demonstrate effective written and oral communication with employees, co-workers, and the public.
- Think independently, clarify values, understand fundamental theory and design principles, and further develop critical thinking skills.
- All Adobe courses include certification exams including Adobe Certified Associate, Photoshop, Illustrator, and InDesign.

---

Prerequisites are required for some courses.
Evening courses may be required to complete this program.

Updated April 14, 2017
ASSOCIATE OF APPLIED BUSINESS DEGREE FOR DIRECT EMPLOYMENT

Do you enjoy working on computers? Are you the “go to” person all your friends and family turn to for help with their computers and home networks? The Computer Support Technician major is your chance to perfect these skills, pursue your interests in working with technology, and begin a new career.

Successful completion of the Computer Support Technician program leads to the Associate of Applied Business degree and prepares the graduate to obtain employment as a PC support technician, a network support technician, or network administrator. Course work prepares students to take the CompTIA A+, Network+, Linux+, and Security+ certification exams, and the Cisco CCENT certification exam.

Computer Support Technician majors complete a 315 hour practicum site placement. Students gain experience working in their chosen field while being mentored by a local IT professional. Internship placements may also be available.

The Computer Support Technician major has articulation agreements with well known colleges and universities to seamlessly allow students to earn a Bachelor’s Degree.

### ASSOCIATE OF APPLIED BUSINESS DEGREE FOR DIRECT EMPLOYMENT

Graduates with the skills and poise to cope with the rapid pace of today’s office will find careers as administrative executives, administrative assistants, secretaries, receptionists, word processing specialists, or office managers.

Washington State’s Office Administrative Services Technology (OAST) - Executive Administrative Assistant program emphasizes administrative skills essential to any professional office, with a strong emphasis on current software packages, voice recognition, business editing and proofreading, and records management. Students explore the areas of communication and business law to round out their education.

Practicums provide students the opportunity to gain hands-on experiences with local employers. Students will utilize skills and knowledge to build the bridge from classroom to profession. The office setting emphasizes the importance of an administrative assistant as an integral part of the office team.

Students holding current Microsoft Office Specialist (MOS) certification may be eligible for advanced placement. Successful completion of the Office Administrative Services Technology program leads to an Associate of Applied Business degree. A certificate in Executive Office Support is available to those who complete a one-year program.

**Graduates of the program will be able to:**
- Demonstrate keyboarding skills necessary to secure employment in an executive office environment.
- Create and compile documents which demonstrate proficiency in Microsoft Word, Excel, Access, PowerPoint, and Windows software.
- Effectively use office technology including but not limited to: scanners, digital cameras, and fax machines.
- Adapt to professional work ethic habits such as: attendance, performance, preparedness, and teamwork.
- Discuss job search skills and techniques necessary for employment in an executive office environment.
- Explain awareness of global/cultural issues as related to today’s world.

---

Prerequisites are required for some courses. Evening Courses may be required to complete this program.

### ASSOCIATE OF APPLIED BUSINESS DEGREE FOR DIRECT EMPLOYMENT

The administrative assistant in a medical setting requires special understanding of medical terminology, medical office procedures, coding, and electronic health records. Emphasis is also placed on current software packages and voice recognition. Program graduates will find careers in a wide variety of medical settings including: physicians’ offices, hospitals, rest homes, emergency care facilities, and clinics.

Practicums provide students the opportunity to gain hands-on experiences with local employers. Students will utilize skills and knowledge to build the bridge from classroom to profession. The office setting emphasizes the importance of an administrative assistant as an integral part of the office team.

Students holding current Microsoft Office Specialist (MOS) certification may be eligible for advanced placement. The Medical Administrative Assistant curriculum leads to the Associate of Applied Business degree. A certificate in Medical Coding is also available to those who complete a one-year program. Consult an advisor for curriculum requirements.

Graduates of the program will be able to:

- Demonstrate keyboarding skills necessary to secure employment in a medical office environment.
- Create and compile documents which demonstrate proficiency in Microsoft Word, Excel, PowerPoint, Windows, and electronic health records.
- Create and compile a variety of medical documents which include medical and pharmacological terminology.
- Effectively use office technology including but not limited to: scanners, digital cameras, fax machines.
- Adapt to professional work ethic habits such as: attendance, performance, preparedness, and teamwork.
- Discuss job search skills and techniques necessary for employment in a medical office environment.
- Explain awareness of global/cultural issues as related to today’s world.

Evening courses may be required to complete this program.

ASSOCIATE OF APPLIED SCIENCE DEGREE FOR DIRECT EMPLOYMENT

Today’s automotive technicians are skilled in all aspects of vehicle service and maintenance, as well as the business operations of current service facilities. Employers in the automotive field are looking for well-trained employees with management and mechanical skills.

Job opportunities in automotive technology include automotive technician, field-test technician, repair and maintenance of natural gas compressor stations and electrical generator sets, service technician, parts manager, service manager, or technical trainer. There are even possibilities in sales and engineering for qualified technicians.

Washington State’s Automotive Service Excellence (ASE) certified Automotive Service major features a large laboratory for practical, hands-on experience. The entire program is reinforced with business management skills, including the use of the microcomputer in the service and parts area. The program follows the task list in the ASE certification manual. The curriculum leads to the Associate of Applied Science degree.

Graduates of the program will be able to:

• Demonstrate professional work habits such as punctuality, productivity, verbal and written communication skills, cooperation with coworkers and customers, and perform operations in a safe manner.
• Diagnose and repair electrical and mechanical problems using the appropriate service information.
• Diagnose, repair, and rebuild automatic transmissions, manual transmissions, and drive lines with a live chassis dyno.
• Measure engine parts using proper measuring instruments.
• Perform complete brake service, including anti lock brake systems.
• Diagnose and repair steering and suspension problems, including alignment procedures.
• Perform duties of a service writer and service technician.
• Disassemble, inspect, and rebuild gas engines using the appropriate service information.
• Demonstrate the ability to adapt to new technology and pass ASE certification tests.
• Perform duties in a 100 hour practicum experience.

### ASSOCIATE OF APPLIED SCIENCE DEGREE FOR DIRECT EMPLOYMENT

Today’s diesel truck technicians are skilled in all aspects of vehicle service and maintenance as well as the business operations of current service facilities. Employers in the automotive and diesel truck fields are looking for well trained employees with management as well as mechanical skills.

Job opportunities in diesel technology include diesel technician, field-test technician, repair and maintenance of natural gas compressor stations and electrical generator sets, service technician, parts manager, service manager, or technical trainer. There are even possibilities in sales and engineering for qualified technicians.

Washington State’s Diesel Truck Systems major features a large laboratory with state-of-the-art equipment for practical, hands-on experience. Successful completion of the diesel truck systems program leads to the Associate of Applied Science degree.

### Graduates of the program will be able to:
- Demonstrate professional work habits such as: punctuality, productivity, verbal and written communication skills, cooperation with co-workers and customers, and perform operations in a safe manner.
- Diagnose and repair electrical and mechanical problems using the appropriate service information.
- Diagnose and repair manual transmissions and drive lines.
- Measure engine parts using proper measuring instruments.
- Perform complete brake service, including anti-lock brake systems.
- Diagnose and repair steering and suspension problems.
- Perform duties of a service writer and service technician.
- Disassemble and inspect diesel engines using the appropriate service information.
- Adapt to new technology and pass Automotive Service Excellence (ASE) Certification tests.
- Perform duties in a 100 hour practicum experience.
## FIRST SEMESTER
- **ELET 1110** DC Circuits 3
- **ELET 1310** Digital I 4
- **ENGR 1010** Fundamentals of Engineering 3
- **MECH 2150** Instrumentation I 3
- **ENGL 1510** English Composition I 3

| Credit Hours | 16 |

## SECOND SEMESTER
- **ELET 1130** AC Circuits 3
- **ELET 1330** Digital II 3
- **ENGL 1515** Technical Writing 3
- **MATH 1104** Technical Math 3
- **MECH 2170** Instrumentation II 3
- **INDT 1350** Commercial Wiring and Prints 2

| Credit Hours | 17 |

## THIRD SEMESTER
- **ELET 2210** Electronics I 4
- **ELET 2410** Programmable Logic Controllers I 3
- **ELET 2110** Rotating Machinery 3
- **_____** Speech Elective 3
- **_____** Social/Behavioral Sciences Elective 3

| Credit Hours | 16 |

## FOURTH SEMESTER
- **DRFT 1430** Advanced CAD 3
- **PHYS 1010** Applied Physics 2
- **PHYS 101L** Applied Physics Lab 1
- **ELET 2230** Electronics II 3
- **ELET 2130** P&I Drawings & Motor Control 2
- **MECH 1230** Hydraulics & Pneumatics 3
- **ELET 1000** Internship 1-6

| Credit Hours | 15-20 |

| **Total Credit Hours** | 64-69 |

---

**ASSOCIATE OF APPLIED SCIENCE DEGREE FOR DIRECT EMPLOYMENT**

### The EET ICE Program
- To design, operate and maintain power and control systems, employers need electrical engineering technicians.
- Persons with an Associate of Applied Science degree in Electrical Engineering Technology, Instrumentation, Control, and Electrical Major, (EET ICE), find careers in instrumentation, power plant operation, quality control, electrical maintenance, and electronic troubleshooting.
- Washington State’s EET program prepares students for entry-level positions, to install, operate, or service electrical equipment in the manufacturing, power, polymer, metallurgical, oil & gas, and other industries.
- The job market is wide open for the technician with dedication and initiative!

**Graduates of the EET/ICE program will be able to:**
- Apply circuit analysis methods to solve D.C. and A.C. networks.
- Use multi meters and oscilloscopes to measure various D.C. and A.C. circuit parameters.
- Design and troubleshoot basic analog and digital electronic devices and circuits.
- Design, test, install, and troubleshoot single phase and three phase motor control circuits.
- Determine A.C. single phase and three phase line characteristics (voltages, current, average, apparent, and reactive power).
- Read, and interpret piping and instrumentation diagrams (P&IDs).
- Read, and create on CAD, the major types of electrical drawings and schematics.
- Describe the major process control instruments and explain their operation.
- Explain the concepts of process dynamics and feedback control.
- Tune simple control loops and document actions and results.
- Set up an instrument calibration and complete a five-point check.
- Apply computer software including word processing, spreadsheet, and presentation applications.
- Produce and present both oral and written technical reports.
- Work and brainstorm in a team environment.
- Appreciate the similarities and differences pertaining to the values and characteristics of various cultures.
GEOSCIENCES TRANSFER*

**FIRST SEMESTER**
- ENGL 1510  English Composition I  3
- MATH 2120  Trigonometry  3
- GEOG 1210  Cultural Geography  3
- CHEM 1510  Fundamentals of Chemistry I  3
- CHEM 151L  Fundamentals of Chemistry I Lab  1
- GEOS 1010  Physical Geography  4

**SECOND SEMESTER**
- ENGL 1520  English Composition II or  3
- ENGL 1530  English Composition III  3
- MATH 2130  College Algebra  4
- GEOS 2510  Introduction to Mapping & GIS  3
- Arts & Humanities Elective  3
- Social/Behavioral Science Elective  3

**THIRD SEMESTER**
- GEOS 2520  GIS Application Capstone  3
- Social/Behavioral Science Elective  3
- BIOL 2110  Environmental Biology  3
- BIOL 211L  Environmental Biology Lab  1
- SPCH 1510  Speech or  3
- SPCH 2060  Interpersonal Communication  3
- Arts & Humanities Elective  3

**FOURTH SEMESTER**
- GEOS 2410  Introduction to Meteorology  3
- BUSM 1600  PC Applications  3
- GEOL 2500  Petroleum Geology  3
- GEOL 2310  Environmental Geology  3
- GEOL 231L  Environmental Geology Lab  1
- Arts & Humanities Elective  3

**ASSOCIATE OF SCIENCE DEGREE FOR TRANSFER**

This two-year associate’s degree program has multiple exit avenues for potential graduates. The Geosciences Transfer program is designed to give students a fundamental knowledge base of advanced earth sciences, as well as equip them with some of the latest skills used in Geosciences today. The Geosciences curriculum contains a good mix of hands-on, “in-the-field” work, as well more traditional classroom work. Students will learn important workplace skills such as map reading, basic surveying techniques, surveying systems, aerial photography interpretation, Global Positioning Systems (GPS), and Geographic Information Systems (GIS).

Included in the Geosciences Transfer degree program is the GIS Certificate. In this three-course certificate program, students will learn ArcGIS 10, the industry standard mapping software. Students will use ArcGIS to create professional, poster-sized maps depicting a myriad of geographic information.

Geosciences graduates will be excellent candidates for entry level positions in the oil and gas business, government agencies, surveying companies, and other land-based organizations. Graduates will also be able to seamlessly transition into a geology, geography, or environmental science baccalaureate program elsewhere if they so choose. Successful completion of the Geosciences Technology degree program leads to an Associate of Applied Science Degree for transfer.

**Graduates of the program will be able to:**
- Read, listen, and think critically.
- Work well with others in a team-oriented environment.
- Demonstrate a general computer literacy, including the use of MS Word, Excel, PowerPoint, and Access.
- Communicate effectively.
- Describe and explain the physical world around them in basic geological terms.
- Recognize, read, and effectively interpret different types of maps, aerial photography, and surveys.
- Utilize GPS technology effectively.
- Utilize ArcGIS to open, create, and manipulate complex maps and mapping projects.
- Give insightful critiques of maps.
- Articulate into a Bachelor of Science Degree in geography, geology, environmental science, or similar field, or to a job in the Geosciences.

Prerequisites are required for some courses. Evening courses may be required to complete this program.

*Not accepting new students into this program for 2017-2018.
ASSOCIATE OF APPLIED SCIENCE DEGREE FOR DIRECT EMPLOYMENT

This two-year Industrial Technology program is designed to provide local industries with job applicants who have a solid science background, good problem solving skills, and specific training related to manufacturing. This is the enterprise concerned with converting raw materials into finished products. It also includes classes with up-to-date technology for the worker that is trying to upgrade his/her skills for advancement on the job.

With a mix of “hands-on” and theory classes, this curriculum prepares graduates to work with engineering personnel and production people. Team problem solving skills, communication skills, and computer competencies make the industrial technology graduate highly competitive in today’s job market.

The Industrial Technology associate degree provides students with a strong foundation of technical skills and experience working on state-of-the-art equipment. Graduates report that the mix of classes they took prepared them for the workplace and contributed to their success. Job placement rates are high and salaries reported are above average. Successful completion of the industrial technology program leads to the Associate of Applied Science degree.

Graduates of the program will be able to:

- Follow prescribed strategies to recognize technical problems, identify direct causes, and make corrections when they are indicated.
- Perform appropriate mathematical functions and apply them to technical projects.
- Be accomplished with the use of industrial computerized numerical control (CNC) equipment.
- Apply basic scientific principles in learning new techniques and procedures.
- Utilize a variety of communication skills (verbal, written and graphics) to communicate effectively.
- Work effectively with engineering and production personnel in the operation of a manufacturing facility.
- Work in a team environment to develop a collective hypothesis on the causes and solutions to problems.
- Demonstrate computer literacy and use word processing and presentation applications.

Prerequisites are required for some courses.
Evening courses may be required to complete this program.
INDUSTRIAL TECHNOLOGY-GEOTECHNICAL DRAFTING*

ASSOCIATE OF APPLIED SCIENCE DEGREE FOR DIRECT EMPLOYMENT

The recent increase in shale exploration in the region is resulting in an increased demand for many related technical disciplines. Horizontal drilling and fracturing technology has opened new fields of expertise for our community, creating many new job possibilities. The Geotechnical Drafting major is designed to fill the needs of those companies that must plan locations of well sites, roadways, pipelines, drainage, and utilities. Students in this program will learn computer drafting, civil design, surveying, geographic information systems (GIS), and environmental design.

Washington State Community College’s Geotechnical Drafting major provides a unique blend of design drafting and geoscience courses to prepare students for an array of jobs relating to shale exploration and development. The program builds on a solid foundation of basic design drafting and engineering skills, as well as physical and cultural geography, environmental biology, and geology. Students will apply this knowledge through experiences in civil drafting, surveying, computer-aided drafting (CAD), and geographic information systems (GIS). The Geotechnical Drafting curriculum leads to the Associate of Applied Science degree.

Graduates of the program will be able to:

- Utilize both two- and three-dimensional CAD commands to design and display engineering and civil design models, using an appropriate projection technique.
- Produce professional quality working drawings using conventional symbology to represent design features, dimensioning sizes, and locations.
- Perform appropriate mathematical functions and apply them to various design problems.
- Produce technical reports, both orally and written, and present results.
- Interpret engineering and construction drawings and apply the information to the actual situation.
- Identify different types of maps, map elements, and map scales.
- Use CAD and GIS to create a variety of topologies.
- Load and incorporate GPS data into GIS and CAD.
- Discuss and evaluate geological processes and how they relate to environmental systems.

Prerequisites are required for some courses. Evening courses may be required to complete this program.

*Not accepting new students into this program for 2017-2018.
INDUSTRIAL TECHNOLOGY—PETROLEUM TECHNOLOGY*

ASSOCIATE OF APPLIED SCIENCE DEGREE FOR DIRECT EMPLOYMENT

The recent increase in shale exploration in the region is resulting in an increased demand of many related technical disciplines. Horizontal drilling and fracturing technology has opened new fields of expertise for our community, creating many new job possibilities.

Petroleum technicians provide support to scientists and engineers in exploring and extracting natural resources, such as minerals, oil, and natural gas.

Washington State Community College’s Petroleum Technology program provides a wide range of oil, gas, industrial, and engineering technology courses as well as geoscience courses to prepare students for an array of jobs relating to shale exploration and development. The program builds on a solid foundation of basic petroleum and engineering skills as well as being able to apply this knowledge through experiences in civil drafting, surveying, computer-aided drafting (CAD), and geographical information systems (GIS).

Graduates of the program will be able to:

• Identify the steps of problem-solving as they relate to engineering and evaluate problems using these steps.
• Apply word processor, spreadsheet, and presentation software to engineering applications and use dimensional metrology in the process of engineering analysis.
• Differentiate the different facets of oil and natural gas industry from the formation of hydrocarbons, and their products being marketed.
• Illustrate common drilling practices including setup, moving, evaluating, and factors that affect drilling problems and apply legal regulations to land use in petroleum exploration.
• State the types of surface facilities, equipment, systems, fields, and pipelines and contrast methods of lift including natural, gas, and sucker rod.
• Evaluate processes of refining petroleum products and pricing and marketing each.
• Differentiate between the different types of casing designs and uses of drill bits.
• Apply the concepts of directional planning including tools, measurements, and methods.
• Examine the common issues of drilling fluids and types of mud and their environmental aspects.
• State the types of cementing programs and formation evaluations.
• Examine oil well test results to determine their implications on production.
• Explain the processes used in gas, hydraulic, and sucker-rod lifting systems.
• Interpret the results of measurements done while drilling and producing oil and gas.
• Summarize the principles, tools, and techniques used in the exploration of natural gas.
• Differentiate between the different philosophies of drill site selection.
• Examine physical and chemical properties of petroleum and their relation to petroleum formation.

FIRST SEMESTER
- GEOS 1010 Physical Geography 4
- ENGR 1010 Fundamentals of Engineering 3
- INDT 1020 Intro to the Petroleum Industry 3
- INDT 1150 Machining Processes 3
- ENGL 1510 English Composition I 3

Credit Hours 16

SECOND SEMESTER
- DRFT 2530 Engineering Drafting 3
- DRFT 2610 Civil Drafting 3
- CHEM 1200 Chemistry Concepts 3
- INDT 1250 SMAW I 3
- GEOS 2510 Intro to Mapping & GIS 3

Credit Hours 15

THIRD SEMESTER
- MECH 2150 Instrumentation I 3
- SPCH 1510 Speech 3
- ENGL 1515 Technical Writing 3
- INDT 1220 OSHA Safety 2
- MATH 1104 Technical Math 3

Credit Hours 17

FOURTH SEMESTER
- MECH 2170 Instrumentation II 3
- INDT 2180 Manufacturing Processes 3
- GEOS 2520 GIS Applications Capstone 3
- GEOL 2500 Petroleum Geology 3
- GEOG 1210 Cultural Geography 3

Credit Hours 15

Total Credit Hours 63

*Not accepting new students into this program for 2017-2018.
### FIRST SEMESTER
- **INDT 1010** Intro to Chemical Operator  
- **INDT 1210** Industrial Safety/Hazmat  
- **INDT 2210** Process Control  
- **CHEM 1200** Chemistry Concepts  
- **MATH 1104** Technical Math  
- **Credit Hours**: 15

### SECOND SEMESTER
- **INDT 1340** Team Concepts & Practices  
- **INDT 1330** Industrial Electricity  
- **ENGL 1510** English Composition I  
- **MECH 1100** Engineering Materials  
- **ELET 2410** Programmable Logic Controls  
- **PHYS 1010** Applied Physics  
- **PHYS 101L** Applied Physics Lab  
- **Credit Hours**: 18

### THIRD SEMESTER
- **INDT 2300** Process Troubleshooting  
- **BUSM 1600** PC Applications  
- **MECH 2060** Statistical Quality Control  
- **POLS 2050** Global Issues  
- **SPCH 1510** Speech  
- **Credit Hours**: 14

### FOURTH SEMESTER
- **INDT 2180** Manufacturing Processes  
- **INDT 2280** Management & Supervision  
- **INDT 2800** Capstone Seminar  
- **ENGL 1515** Technical Writing  
- **Arts & Humanities Elective**: 3  
- **Credit Hours**: 15

**Total Credit Hours**: 62

---

**ASSOCIATE OF APPLIED SCIENCE DEGREE FOR DIRECT EMPLOYMENT**

If using science, engineering and mathematics to solve technical problems sounds exciting, then Washington State’s Process Technician program might be the right option for you. This program, designed in conjunction with local industries, will provide you with the skills and education needed to be considered for employment. Training on up-to-date computers with the latest software, and training on modern machine tools, will help you succeed in the workplace.

Process technicians inspect and maintain equipment, take samples, troubleshoot problems and analyze products on a routine basis, as well as maintain regulatory and environmental standards. Chemical operators work in control rooms to monitor and maintain the safe manufacture of all kinds of products. Plants may use batch and/or the continuous manufacture process. Process technicians and chemical operators may find jobs in many industries including, but not limited to: plastics, pharmaceutical, petroleum, paint, electrical power plants, cosmetics, etc.

Successful completion of the Process Technician program leads to an Associate of Applied Science degree. A Chemical Operator one-year certificate is also available through a two-semester program. All courses are offered face-to-face or online.

**Graduates of the program will be able to:**

- Work effectively with engineering and production personnel in the operation of a chemical plant.
- Work in a team environment to develop a collective hypothesis on the causes of problems and meet project deadlines.
- Assist in the design and implementation of a comprehensive Safety Program.
- Be computer literate and accomplished on word processing and PowerPoint programs to produce technical reports and present results.

---

*Prerequisites are required for some courses. Evening and/or online courses may be required to complete this program.*
## MECHANICAL ENGINEERING TECHNOLOGY

### FIRST SEMESTER
- **ENGR 1010** Fundamentals of Engineering 3
- **MATH 2120** Trigonometry 3
- **ENGL 1510** English Composition I 3
- **INDT 1150** Machining Processes 3
- **CHEM 1200** Chemistry Concepts 3
- **INDT 1020** Intro to Petroleum Industry 3
- **Credit Hours** 18

### SECOND SEMESTER
- **PHYS 1010** Applied Physics 2
- **PHYS 101L** Applied Physics Lab 1
- **INDT 1170** Comp. Num. Controls 3
- **DRFT 2530** Engineering Drafting 3
- **MECH 1100** Engineering Materials 4
- **MATH 2130** College Algebra 4
- **Credit Hours** 17

### THIRD SEMESTER
- **ENGR 2210** Statics 4
- **ENGL 1515** Technical Writing 3
- **MECH 2150** Instrumentation I 3
- **MECH 2060** Statistical Quality Control 2
- **Social/Behavioral Science Elective** 3
- **Credit Hours** 15

### FOURTH SEMESTER
- **SPCH 2060** Interpersonal Communication or Speech 3
- **ENGR 2220** Strength of Materials 3
- **MECH 1230** Hydraulics & Pneumatics 3
- **MECH 2170** Instrumentation II 3
- **MECH 1000** Internship 1
- **INDT 1330** Industrial Electricity 2

Prerequisites are required for some courses. Evening and/or online courses may be required to complete this program.

## ASSOCIATE OF APPLIED SCIENCE DEGREE FOR DIRECT EMPLOYMENT

Washington State’s Mechanical Engineering Technology program prepares students to support mechanical engineering activities with practical applications and experience utilizing hands-on learning, as well as provides experiences in working together on teams.

The overall curriculum is designed to provide students with the ability to apply a basic knowledge of mathematics, scientific and engineering principles, current engineering practice and methods, in combination with technical skills, in support of engineering activities. Laboratory courses and student projects are an integral component of this program and curriculum is driven by local industry.

Successful completion of the Mechanical Engineering Technology program leads to the Associate of Applied Science degree and provides recipients with the skills necessary to succeed as an engineering technologist in an industrial environment. Students are also well versed in general and basic courses to meet employers’ expectations.

**Graduates of the program will be able to:**
- Communicate effectively through speaking, writing, and graphics.
- Use a computer for spreadsheet application, word processing, data analysis, research, performing rote mathematical calculations, and to retrofit experimental or actual data.
- Work as a team member in a variety of environments and contribute to brainstorming sessions for problem solving.
- Prepare and interpret mechanical drawings using AutoCAD.
- Identify, analyze and solve practical problems making use of appropriate technology in a simple and logical manner.
- Use knowledge of a material’s properties and performance in the selection of design components.
- Solve structural engineering problems.
- Understand professional, societal, and global issues as well as awareness and respect for diverse cultures.
- Demonstrate a commitment of life-long learning.

Because of the accreditation and licensing requirements and limited enrollment capacities, admission to health science programs at Washington State Community College is on a selective basis. Prospective students are encouraged to review all admissions requirements to the program they are interested in and apply early for acceptance.

Always contact the Admissions Office at 740.568.1900 for the most up-to-date and detailed information for applying to WSCC Health Sciences programs.

PROGRAM ACCREDITATIONS

The Medical Laboratory Technology program is fully accredited by:
National Accrediting Agency for Clinical Laboratory Sciences (NAACLS)
5600 N. River Road
Suite 720
Rosemont, IL 60018-5119
PHONE: 773.714.8880

The Radiologic Technology program is fully accredited by:
Joint Review Committee on Education in Radiologic Technology (JRCERT)
20 North Wacker Drive
Suite 2850
Chicago, IL 60606-3182
PHONE: 312.704.5304
demail@jrcert.org
www.jrcert.org

The Respiratory Therapy Technology program is fully accredited by:
Committee on Accreditation for Respiratory Care (CoARC)
1248 Hardwood Road
Bedford, TX 76021-4244
PHONE: 817.283.2835
www.coarc.com

The Physical Therapist Assistant Technology program is fully accredited by:
Commission on Accreditation in Physical Therapy Education (CAPTE)
1111 North Fairfax Street
Alexandria, VA 22314
PHONE: 703.706.3245
www.capteonline.org

The Associate Degree Nursing program has been granted full approval by:
Ohio Board of Nursing
17 South High Street, Suite 400
Columbus, OH 43215-7410
PHONE: 614.466.3947

The Practical Nursing Program has been granted full approval by:
Ohio Board of Nursing
17 South High Street, Suite 400
Columbus, OH 43215-7410
PHONE: 614.466.3947

The Massage Therapy program is recognized by the State of Ohio and a “school of good standing” with the Ohio Medical Board.
Ohio State Medical Board
30 East Broad St., 3rd Floor
Columbus, OH 43215
PHONE: 614.466.3934
HEALTH & WELLNESS TECHNOLOGY

ASSOCIATE OF APPLIED SCIENCE DEGREE FOR DIRECT EMPLOYMENT

The Health and Wellness Technology program provides a broad knowledge in health and wellness management and its effects on health, first aid and emergency procedures, as well as a specialization in one or more health care skills.

Students are required to select one or more specialization areas (Fitness & Exercise, Pharmacy Technician, Medical Coding, Massage Therapy, Nursing, Radiologic Technology, Respiratory Therapy, Physical Therapist Assistant, Medical Laboratory Technology) in addition to the general education and health core major courses.

Many of the specialization areas have national certification or state licensure. Students who complete these specialization area requirements will be eligible to sit for the appropriate certification or licensure examination. Successful completion of the Health and Wellness Technology program leads to an Associate of Applied Science degree.

Graduates of the program will be able to:

- Demonstrate knowledge of the structure and function of the human body.
- Use appropriate medical terminology.
- Describe how nutrients are utilized by the body for proper body functioning.
- Provide first aid and CPR for injuries or sudden illness.
- Demonstrate a knowledge of basic computer functions and applications.
- Use various forms of communication more effectively as a communicator and an observer.
- Use appropriate and effective problem-solving tools.
- Think critically by evaluating information from multiple perspectives, drawing reasonable conclusions, and defending them rationally.
- Show competency in a selected area of specialization.

**ONE-YEAR FULL-TIME CERTIFICATE FOR DIRECT EMPLOYMENT**

Massage Therapy is a one-year, three semester education program. All of the courses listed in the curriculum must be successfully completed in order to earn a Massage Therapy certificate and to be eligible to take the Massage & Bodywork Licensing Examination (MBLEx).

Graduation and passing the test will then allow the student to apply for an Ohio, and/or West Virginia license. Massage therapists licensed in Ohio are able to practice in accordance with the Ohio Medical Board rules and regulations for massage therapists.

The Massage Therapy program is in good standing with the Ohio Medical Board. For gainful employment disclosure information, go online to [www.wscc.edu/programs/gainful-employment.html](http://www.wscc.edu/programs/gainful-employment.html).

**Graduates of the program will be able to:**

- Provide safe, competent, intentional and systematic manipulation of the soft tissues of the human body to treat disorders as deemed in the Ohio Practice Act for Massage Therapy, and to promote a more holistic, rounded approach to wellness.
- Demonstrate appropriate and effective written, verbal and non-verbal communication, which will reflect your sensitivity to your patient's individual and cultural differences.
- Perform data collection techniques including health history, observation and palpation of soft tissues of the human body, to provide a basis for soft tissue mobilization of the human body.
- Demonstrate personal and professional development, reflecting competencies and conduct expectations as outlined by the American Massage Therapy Association (AMTA) and the Ohio Medical Board’s Code of Ethics.

Prerequisites are required for some courses. Evening courses may be required to complete this program.
**PHARMACY TECHNICIAN**

**FIRST SEMESTER**
- BIOL 1330  Survey of Anatomy & Physiology 2
- BUSM 1600  PC Applications 3
- ENGL 1510  English Composition I 3
- HLTH 1810  Medical Terminology I 2
- HLTH 1840  Pharmacy Technician I 2
- HLTH 184L  Pharmacy Technician I Lab 1
- HLTH 2310  Principles of Reimbursement 3
- MATH 1105  Math for Pharmacy Technicians 3

Credit Hours 19

**SECOND SEMESTER**
- BIOL 1340  Survey of Anatomy & Physiology II 2
- HLTH 1830  Pharmacy Terminology 3
- HLTH 1850  Pharmacy Technician II 3
- HLTH 1860  Pharmacy Technician Directed Practice 2
- HLTH 1870  Pharmacy Technician Ethics 2
- SPCH 2060  Interpersonal Communication 3

Credit Hours 15

Total Credit Hours 34

Prerequisites are required for some courses. Evening courses may be required to complete this program.

**ONE-YEAR FULL-TIME CERTIFICATE FOR DIRECT EMPLOYMENT**

Pharmacy Technicians work in pharmacies under the direction of a pharmacist. Their main responsibility is assisting the pharmacist in filling prescriptions according to doctors’ orders. Pharmacy Technicians prepare medications for dispensing to patients. This generally includes retrieving drugs in the correct dosage form and strength, measuring the appropriate amount of drug, and producing a prescription label. Pharmacy Technicians work with drugs to be administered orally, topically, for the eye, nose, etc. Depending upon the practice setting, a Pharmacy Technician is also involved in the admixture of drugs for intravenous use. Other duties include the following:

- Checking inventories & ordering supplies
- Pricing and filling prescriptions
- Assisting customers & maintaining patient profiles
- Keeping pharmacy work areas clean
- Completing insurance forms

**Employment & Education**

Pharmacy Technicians may work in retail pharmacies, mail order pharmacies, home infusion pharmacies, long-term care facilities, hospitals, clinics, and large industrial complexes - working under the supervision of a licensed pharmacist.

**Educational Requirements**

A high school diploma or GED is required and high school Algebra or MATH 0940 or MATH 0955.

The Pharmacy Technology lab prepares the student for the directed practice provided the second semester. Directed practice is in the hospital half the semester, and retail pharmacy the other half of the semester.

**Pharmacy Technician Certification Program**

This certificate will prepare students to enter the pharmacy field and to take the Pharmacy Technician Certification Board Examination.

Course content includes medical terminology specific to the pharmacy, reading and interpreting prescriptions, and defining drugs by generic and brand names. Students will learn dosage calculations, I.V. flow rates, drug compounding, dose conversions, dispensing of prescriptions, inventory control, and billing and reimbursement.

For national certification eligibility requirements, please visit www.ptcb.org or www.nationaltechexam.org.
# Medical Laboratory Technology

## Associate of Applied Science Degree for Direct Employment

Graduates of the Medical Laboratory Technology (MLT) program are eligible to take the American Society for Clinical Pathology (ASCP) Board of Certification examination. They find careers in hospital laboratories, clinics, independent labs, industrial and environmental labs, and with manufacturers of medical and laboratory products.

The MLT program will prepare entry-level medical laboratory technicians who have the ability to provide accurate results of diagnostic laboratory tests in accordance with established laboratory procedures and professional standards of practice.

The program curriculum leads to the Associate of Applied Science degree. The Medical Laboratory Technology program is fully accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS), which can be contacted at 5600 North River Road, Suite 720, Rosemont, IL 60018, phone number 773.714.8880.

Graduates of the program will be able to:

- Apply their knowledge in laboratory medicine to real-life situations.
- Completely perform diagnostic laboratory tests according to established procedures.
- Accept and react appropriately to the responsibilities of their profession.
- Effectively use various forms of communication with patients, laboratory personnel, other health care professionals, and with the public.
- Think critically as demonstrated by evaluating information from multiple perspectives, drawing reasonable conclusions, and defending them rationally.
- Behave in a manner which reflects positively upon their profession.

Evening courses may be required to complete this program.
ASSOCIATE OF APPLIED SCIENCE DEGREE FOR DIRECT EMPLOYMENT

Associate Degree Nursing program graduates are known for their competence and caring in providing safe, effective nursing services in a variety of health care settings. Students value their small classes, highly-prepared faculty, and strong preparation in the sciences. The program also provides a rich variety of clinical settings, including acute care hospitals, long-term care facilities, clinics or selected community health settings.

The capstone (preceptor) clinical experience is designed to ease the transition in juggling the multiple responsibilities of a registered nurse, and involves final semester students pairing with a registered nurse in clinical practice.

The program may be completed in four semesters by licensed practical nurses (LPN) who have met all advanced placement requirements*, or in five semesters for traditional students. All students have the option of completing most non-nursing courses prior to admission to the program, in consultation with their pre-ADN program advisor.

After earning the Associate of Applied Science degree, graduates are eligible to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN), which can lead to licensure as a registered nurse (RN). Once licensed, graduates may practice in a wide variety of nursing positions. The Associate Degree Nursing program provides an excellent foundation for a Bachelor of Science in Nursing degree.

The Associate Degree Nursing program operates under full approval of the Ohio Board of Nursing, 17 South High Street, Suite 400, Columbus Ohio, 43215, phone number 614.466.3947.

*Three semesters by Washington State Practical Nursing program graduates, directly transferring to the ADN program, who have met all the requirements and who have been accepted.

NOTE: Practical nurses should contact the program director for specific details of the advanced placement program.

Graduates of the program will be able to:

- Utilize the nursing process, incorporate health patterns to promote, maintain, and restore client health.
- Make decisions concerning nursing care based upon client values, as well as cultural and spiritual beliefs.
- Demonstrate legal and ethical accountability for nursing care given by self and/or delegated to others.
- Exercise clinical judgment, using evidence-based practice, to integrate increasingly complex knowledge, skills, and technologies as they relate to the client.
- Use critical thinking in adjusting priorities for nursing interventions as client situations change.
- Plan and deliver nursing care to a group of clients in collaboration with another registered nurse.
- Demonstrate caring behavior towards the client, significant support person(s), peers, and other members of the health care team.
- Apply principles of therapeutic communication to develop effective relationships with clients, peers, families, significant support persons, and agencies within the community.
- Develop, implement, evaluate, and modify teaching plans that are specific to the client’s level of development,

Prerequisites are required for some courses. Evening courses may be required to complete this program.

Knowledge, learning needs, and resources.
- Practice nursing within the parameters of individual knowledge and experience, while enlarging practice with continuing education and discovery learning.
- Utilize the role of the nurse as coordinator of nursing care, delegating aspects of client care to assistive personnel.
- Serve as a positive role model within health care settings and the community at large.
- Participate in life long learning which enhances professional development.
- Utilize awareness of interdependent global patterns of illness, and related implications in promoting, maintaining and restoring clients’ health.

Updated April 14, 2017
ONE-YEAR FULL TIME DAY CERTIFICATE FOR DIRECT EMPLOYMENT

The health care industry is growing, and along with it is the need for qualified Practical Nurses. Whether in a hospital, extended care facility, or home health, employers look for skilled, compassionate people to handle one of the most important aspects of client care – bedside nursing. As a Practical Nurse, your primary role will be bedside nursing, as well as assisting physicians and Registered Nurses in client care. You are an important part of the health care team and your skills have a direct effect on the client’s health and well-being.

During the program, your studies will include both classroom and clinical experiences. Your classroom instruction will be enhanced by concurrent clinical experiences at Marietta Memorial Hospital, Selby General Hospital, and Harmar Place Rehabilitation & Extended Care and will culminate with a preceptorship as the student is paired with a name in the clinical setting. You will also gain experience through observational time at nursery schools, and physicians’ offices. Upon successful completion of the program, the graduate will be eligible to sit for the National Council Licensure Examination for Practical Nurses (NCLEX-PN) and become a licensed nurse.

The Practical Nursing - Day education curriculum is a 12-month, full-time day course of study. All of the courses listed in the curriculum must be successfully completed in order to earn the practical nursing certificate and to be eligible to take the licensing examination. After successfully passing the NCLEX-PN, graduates of Washington State’s Practical Nursing education program may consider enrolling in an Associate of Applied Science degree in Nursing (ADN) program. For gainful employment disclosure information, go online to www.wscc.edu/programs/gainful-employment.html.

The Practical Nursing education program is fully approved by the Ohio Board of Nursing and accredited by the Commission on Institutions of Higher Education of the North Central Association of Colleges and Schools.

Graduates of the program will be able to:

- Recognize optimal health and normal function for self and individuals across the lifespan, practicing and teaching this knowledge to family and community members.
- Collect and record objective and subjective data.
- Perform basic nursing skills with dexterity, competency, insight and safety.
- Develop communication and listening skills which can assist clients across the lifespan to cope with problems which affect health and rehabilitation.
- Contribute to the evaluation of the effectiveness of nursing actions and to establishing a new nursing approach as needed.
- Communicate effectively with clients and co-workers both orally and in writing.
- Develop skills which promote appropriate interpersonal relationships, effective communication and mental health.
- Develop an appreciation for the dignity and integrity of human beings which leads to respect for the individuality of the client and other health team members.
- Demonstrate a code of behavior based on ethical principles and an understanding of the legal scope for the practical nurse.
- Demonstrate motivation to learn through assignments, participation in conferences, and self-evaluation.

**TWO-YEAR PART-TIME EVENING CERTIFICATE FOR DIRECT EMPLOYMENT**

The health care industry is growing, and along with it is the need for qualified Practical Nurses. Whether in a hospital, extended care facility, or home health, employers look for skilled, compassionate people to handle one of the most important aspects of client care – bedside nursing. As a Practical Nurse, your primary role will be bedside nursing, as well as assisting physicians and Registered Nurses in client care. You are an important part of the health care team and your skills have a direct effect on the client’s health and well-being.

During the program, your studies will include both classroom and clinical experiences. Your classroom instruction will be enhanced by concurrent clinical experiences at Marietta Memorial Hospital, Selby General Hospital, and Harmar Place Rehabilitation & Extended Care, and will culminate with a preceptorship as the student is paired with a name in the clinical setting. You will also gain experience through observational time at nursery schools, and physicians’ offices. Upon successful completion of the program, the graduate will be eligible to sit for the National Council Licensure Examination for Practical Nurses (NCLEX-PN) and become a licensed nurse.

The Practical Nursing - Evening education curriculum is a 24-month, part-time evening course of study. All of the courses listed in the curriculum must be successfully completed in order to earn the practical nursing certificate, and to be eligible to take the licensing examination. After successfully passing the NCLEX-PN, graduates of Washington State’s Practical Nursing education program may consider enrolling in an Associate of Applied Science degree in nursing (ADN) program. For gainful employment disclosure information, go online to www.wssc.edu/programs/gainful-employment.html.

The Practical Nursing education program is fully approved by the Ohio Board of Nursing and accredited by the Commission on Institutions of Higher Education of the North Central Association of Colleges and Schools.

**Must take BIOL 1310/131L & BIOL 1320/132L OR BIOL 2310/231L & BIOL 2320/232L**

Prerequisites are required for some courses. Evening courses are required to complete this program. Day courses may be required to complete this program.
## PHYSICAL THERAPIST ASSISTANT TECHNOLOGY

### ASSOCIATE OF APPLIED SCIENCE DEGREE FOR DIRECT EMPLOYMENT

Physical therapist assistants are specially trained health care professionals who contribute to the welfare of patients under the supervision of a licensed physical therapist. While under this supervision, physical therapist assistants (PTAs) assist with pain relieving modalities, therapeutic exercise, and assist in the daily assessment of a patient’s progress. PTAs interact daily with not only patients and patients’ families, but also with other professionals including, but not limited to, physicians, nurses, and respiratory therapists.

Excellent communication skills are essential to becoming a successful physical therapist assistant. Having the desire to help people regain their previous function as well as having empathy for their conditions are characteristics that will allow one to succeed in this profession. Further, these characteristics will provide job satisfaction and ensure a long career as a physical therapist assistant.

The two-year Physical Therapist Assistant (PTA) Program at Washington State begins each fall and consists of five consecutive semesters of study. Students complete the program in May of their second year, with successful completion leading to an Associate of Applied Science Degree. Graduates of the program must sit for the National Board Exam. If the student decides to work in Ohio, a state law exam also must be taken to be eligible for employment.

The PTA program at Washington State is accredited by the Commission of Accreditation in Physical Therapy Education (CAPTE), 1111 North Fairfax Street, Alexandria, WV 22314; phone number: 703.706.3245; e-mail: accreditation@apta.org; website: www.capteonline.org. Currently, most states require licensure and the student must have graduated from a CAPTE accredited program to be eligible to sit for the board exam.

Graduates of the program will be able to:

- Gain written and verbal communication skills.
- Utilize skills, through practice, to perform the following:
  - Ultrasound
  - Hot pack, cold pack application
  - Electrical stimulation
  - Traction
  - Ultraviolet light and laser
  - Whirlpool and wound care
  - Intermittent compression
- Gain gait training skills and use of assistive ambulation devices.
- Know joint range of motion and manual muscle testing.
- Understand physiologic conditions associated with certain populations.
- Understand neurological and musculoskeletal dysfunctions.
- Gain detailed knowledge of anatomy.
- Utilize critical thinking skills.

ASSOCIATE OF APPLIED SCIENCE DEGREE FOR DIRECT EMPLOYMENT

In articulation with Marietta Memorial Hospital’s School of Radiologic Technology, Washington State offers an Associate of Applied Science degree in radiologic technology. The School of Radiologic Technology is sponsored by Marietta Memorial Hospital and holds accreditation with the Joint Review Committee on Education in Radiologic Technology (J.R.C.E.R.T). To contact J.R.C.E.R.T., write to 20 N. Wacker Drive, Suite 2850, Chicago IL 60606, phone number 312.704.5304, or email mail@jrcert.org, or visit their website at www.jrcert.org.

Radiologic Technology program graduates earn a certificate award from the sponsoring institution (Marietta Memorial Hospital) and the Associate of Applied Science degree concurrently during the two year program.

Graduates are eligible to sit for the American Registry of Radiologic Technology’s (ARRT) national certification exam, and possess the knowledge and skills to enter the profession. Students in radiologic technology will be fully admitted to the college, and entitled to participate in all activities of the college with equal access to all college services. Admission to the program is selective, with student selection to the program made in March.

Graduates of the program will be able to:

• Apply positioning skills.
• Select technical factors.
• Utilize radiation protection.
• Demonstrate written and oral communication skills.
• Adapt standard procedures for non-routine patients.
• Critique images to determine diagnostic quality.
• Demonstrate work ethics.
• Summarize the value of life-long learning.

---

**ASSOCIATE OF APPLIED SCIENCE DEGREE FOR DIRECT EMPLOYMENT**

Respiratory care deals with the treatment, management, and care of patient respiration and circulation. Following physician’s orders, respiratory care personnel work closely with other members of the health care team. A respiratory therapist may work as a clinician in hospitals, clinics, laboratories, and sleep labs; or may choose to work in other areas such as management, medical research, or education in the hospital, college, or university setting.

Washington State’s Respiratory Therapy Technology program covers ventilator and airway management, cardiopulmonary resuscitation, patient assessment, treatment and care in the emergency department, critical care units, home care, skilled extended care, neonatal intensive care, and other areas of health care delivery. It consists of five semesters of professional and support courses. Students who complete all required courses will be scheduled to enter the hospital portion of the program beginning with the second semester.

Upon successful completion of the program, graduates are eligible for the “Entry” level Therapist Multiple Choice (TMC) exam. The “Entry” level exam has two “cut scores”. If the student passes the lower “cut score”, they will be a Certified Respiratory Therapist (CRT). If they achieve the higher “cut score”, they will also be eligible to take the Registry Clinical Simulation Exam. If they pass the second exam, they will be a Registered Respiratory Therapist (RRT).

The curriculum leads to the Associate of Applied Science degree. Certified respiratory therapy technicians who are interested in the possibility of advanced placement should contact the director of respiratory therapy. The program is accredited by The Commission on Accreditation for Respiratory Care, which can be contacted at 1248 Harwood Road, Bedford TX, 76021, http://www.coarc.com/47.html.

Graduates of the program will be able to:

- Comprehend, apply and evaluate clinical information relevant to the role of an advanced respiratory care practitioner.
- Demonstrate the technical proficiency in all skills necessary.
- Demonstrate professional and personal behaviors consistent with professional and employer expectations.
- Communicate with patients, physicians, and health care workers, demonstrating an understanding of medical terminology and effective written and verbal communication skills.
- Continue as an independent learner, by demonstration of upgraded job skills and keeping pace with the changing health field with continuing education.
- Demonstrate a general understanding of the procedures used in respiratory therapy departments to manage and evaluate personnel and departmental productivity.
- Demonstrate a knowledge and understanding of the following procedures and demonstrate clinical skills to assess patients’ response to therapy: Medical Gas therapy; Humidification therapy; Deep breathing and other hyperinflation therapy; Aerosol therapy; Medications; Coughing techniques and other Bronchopulmonary hygiene; Cardiopulmonary resuscitation; Advance Life Support therapy; Airway management; Heart and lung testing; Blood gas analysis; Mechanical ventilation management; Other vital physiological monitoring.

Dr. McKinley, MD - Medical Director
Rob Kinker, Ph.D., RRT - Program Director
Kathy Baker, RRT - Director Clinical Ed.

CRIMINAL JUSTICE-CORRECTIONS

ASSOCIATE OF APPLIED SCIENCE DEGREE FOR DIRECT EMPLOYMENT

The Corrections major, under the associate degree in Criminal Justice, provides preparation for careers in probation, parole, correctional institutions, community-based correctional programs, and social service agencies. The curriculum of the Corrections major leads to the Associate of Applied Science degree.

Federal, state and local law enforcement and correctional agencies generally have requirements and/or guidelines for individuals seeking employment. These may include, but are not limited to: physical fitness standards, medical, and/or psychological requirements. In addition, individuals seeking employment in the law enforcement or correctional fields are subjected to a thorough background and criminal records check prior to being considered for employment.

Graduates of the program will be able to:

- Develop a knowledge base of the three elements of the criminal justice system (courts, corrections, and law enforcement) and the ability to effectively collaborate with each for the benefit of society.
- Apply issues of criminal law and constitutional law to situations and events in employment to ensure that the civil and constitutional rights of citizens are preserved.
- Effectively communicate with individuals from various racial, cultural, ethnic, and socioeconomic groups.
- Produce various types of written communications to target diverse audiences.
- Maximize the effectiveness of the criminal justice agency through the use of technological advances (i.e. computers/forensic science).
- Aid in the rehabilitative efforts of individuals who have come in contact with the criminal justice system to reduce the incidence of recidivism.

**ASSOCIATE OF APPLIED SCIENCE DEGREE FOR DIRECT EMPLOYMENT**

The Criminal Justice associate degree in Law Enforcement provides preparation for a variety of careers in state or local law enforcement agencies. The program provides the necessary background for positions with police, private security, and other related criminal justice work, or for transfer to a baccalaureate program. The curriculum of the Law Enforcement major leads to the Associate of Applied Science degree.

Federal, state and local law enforcement and correctional agencies generally have requirements and/or guidelines for individuals seeking employment. These may include, but not be limited to: physical fitness standards, medical, and/or psychological requirements. In addition, individuals seeking employment in the law enforcement or correctional fields are subjected to a thorough background and criminal records check prior to being considered for employment.

**Graduates of the program will be able to:**

- Develop a knowledge base of the three elements of the criminal justice system (courts, corrections, and law enforcement) and the ability to effectively collaborate with each of the respective elements for society’s benefit.
- Apply issues of criminal law and constitutional law to situations and events in employment to ensure that the civil and constitutional rights of citizens are preserved.
- Effectively communicate with individuals from various racial, cultural, ethnic, and socioeconomic groups.
- Recognize emergency situations that necessitate law enforcement intervention, medical intervention, or intervention by social services agencies.
- Analyze information, evidence, or clues received from various sources and develop theories for the prevention or solving of crimes.
- Maximize the effectiveness of the criminal justice agency through the use of technological advances (i.e. computers/forensic science).

Prerequisites are required for some courses. Evening courses may be required to complete this program.
The Peace Officer Basic Academy (POBA) major, under the associate degree in Criminal Justice, provides preparation for careers in law enforcement. POBA also helps students prepare for the Ohio Peace Officer Training Commission (OPOTC) examination. All certified law enforcement officers in the State of Ohio are required to possess an OPOTC certification.

Washington State’s POBA program is sanctioned and governed under the Office of the Ohio Attorney General and the Ohio Peace Officer Training Commission (OPOTC). The commission establishes uniform courses of training for law enforcement officers and private security throughout Ohio, and regulates the basic training curriculum for prospective officers.

All individuals seeking to participate as cadets in the Academy must apply and pay tuition and fees four weeks prior to the beginning of the Academy and pass a criminal background investigation to the satisfaction of the Ohio Attorney General’s office. Physical fitness is an important element of the academy. All cadets must be able to pass a physical fitness test based on the “Cooper Standard.” Failure to pass this test prohibits a cadet from sitting for the OPOTC examination and prevents state certification as a peace officer.

Graduates of the program will be able to:

- Successfully complete the Ohio Peace Officer Basic Academy and be awarded certification as a law enforcement officer from the Ohio Attorney General’s Office.
- Develop a knowledge base of the three elements of the criminal justice system (courts, corrections and law enforcement) and the ability to effectively collaborate with each of the respective elements for the benefit of society.
- Apply issues of criminal law and constitutional law to situations and events in employment to ensure that the civil and constitutional rights of citizens are preserved.
- Effectively communicate with individuals from various racial, cultural, ethnic and socioeconomic groups.
- Recognize emergency situations that necessitate law enforcement intervention by social services agencies.
- Analyze information, evidence or clues received from various sources and develop theories for the prevention or solving of crimes.
- Maximize effectiveness for the criminal justice agency through the use of technological advances (i.e. computers/forensic science).
### Social Services Technology

#### Associate of Applied Science Degree for Direct Employment

When people find themselves in need of personal assistance, they can turn to one of many social services agencies for help. These agencies need qualified individuals to work with people in need, offering advice. The social services worker can assist in many areas, including: children’s services, helping children get a good start with the right nutrition and education, services for the elderly, nutrition centers, and senior citizen activities and services. In addition, welfare and other social service agencies need individuals to work with the underprivileged, disadvantaged, handicapped or abused and criminal justice population.

Washington State’s Social Services Technology program combines classroom theory with actual field experience. Part of the second year will be spent with various local agencies, applying what has been learned to actual cases. Successful completion of the program leads to the Associate of Applied Science degree.

#### Graduates of the program will be able to:
- Consistently perform work habits such as: punctuality, productivity, verbal and written communication skills, cooperation with staff and clients and working within the policies, structures, and functions of social service agencies.
- Apply the National Association of Social Workers Code of Ethics and values consistent with the profession, to ethical situations.
- Demonstrate effective interpersonal communication skills needed as a helping professional such as active listening, appropriate verbal and non-verbal responses, and written communication.
- Collect, organize, and prioritize client assessment information needed to develop progress reports, social histories, and case treatment plans.
- Write accurate progress reports, social histories, case treatment plans, and closing summaries.
- Identify client needs and link them to available community resources.
- Monitor and evaluate clients’ success toward individualized goal attainment.
- Identify historical and current social welfare policy issues facing helping professional agencies.

Prerequisites are required for some courses.
Evening courses may be required to complete this program.
CERTIFICATE PROGRAMS

ACCOUNTING CERTIFICATE

**FIRST SEMESTER**
- ENGL 1510 English Composition I 3
- MATH 1106 Business Mathematics or Principles of Statistics 3
- BUSM 1550 Business Management 3
- BUSM 1600 PC Applications 3

Credit Hours 16

**SECOND SEMESTER**
- BUSM 1660 Business Law 3
- ACCT 1520 Principles of Accounting II 4
- ACCT 1610 Payroll Accounting 3
- ACCT 2810 Microcomputer Accounting 1
- ACCT 2820 Spreadsheet Accounting 3
- BUSM 2300 Introduction to Finance 3

Credit Hours 17

Total Credit Hours 33

AUTOMOTIVE TECHNICIAN

**FIRST SEMESTER**
- AUTO 1100 Vehicle Service & Maintenance 3
- AUTO 1110 Electrical Circuitry 3
- AUTO 1120 Automotive Brakes 3
- AUTO 1130 Electrical Components 3
- AUTO 2100 Automatic Drive Trains 3
- AUTO 2130 Cylinder Block & Lower Engine 3

Credit Hours 18

**SECOND SEMESTER**
- AUTO 1140 Automotive Chassis 3
- AUTO 1150 Manual Drive Trains 3
- AUTO 1160 Fuel & Emissions Controls 3
- AUTO 1170 Upper Engine Design & Service 3
- MATH 1104 Technical Mathematics 3
- ENGL 1510 English Composition I 3

Credit Hours 18

Total Credit Hours 36

COMPUTER SYSTEMS

**FIRST SEMESTER**
- BUSM 1600 PC Applications 3
- DTCS 2650 Internet & Web Page Design 3
- DTCS 1230 OS Concepts & Customizing 3
- DTGR 1600 Adobe Illustrator 3
- DTWP 1200 Programming Logic & Problem Solving 3
- ENGL 1510 English Composition I 3

Credit Hours 18

**SECOND SEMESTER**
- ELEC 2410 Microcomputer Diagnostic & Upgrading I 3
- DTCS 2100 Database Management 3
- MATH 1106 Business Math 3
- ENGL 1515 Technical Writing 3
- ELEC 1950 Cisco Semester I - Network Fundamentals 3

Credit Hours 15

Total Credit Hours 33

DESIGN DRAFTING*

**FIRST SEMESTER**
- DRFT 1510 Design Drafting I 3
- INDT 1150 Machining Processes I 3
- MATH 1104 Technical Mathematics 3
- INDT 1220 OSHA Safety 2
- ENGR 1010 Fundamentals of Engineering 3

Credit Hours 14

**SECOND SEMESTER**
- DRFT 1430 Advanced CAD 3
- DRFT 2530 Engineering Drafting 3
- INDT 1170 Computer Numerical Control 3
- PHYS 1010 Applied Physics 2
- PHYS 101L Applied Physics Lab 1
- INDT 1000 Industrial Internship 2
- INDT 2180 Manufacturing Processes 3

Credit Hours 17

Total Credit Hours 31

*Not accepting new students into this program for 2017-2018.
## Certificate Programs

### Executive Office Support

**First Semester**
- OAST 1510 Keyboarding I 3
- OAST 1550 Windows Concepts 2
- OAST 2910 Microsoft PowerPoint 3
- OAST 2220 Microsoft Excel 3
- OAST 1760 Office Procedures 2

<table>

### CERTIFICATE PROGRAMS

#### INDUSTRIAL TECHNOLOGY - WELDING

**FIRST SEMESTER**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BUSM 1600</td>
<td>PC Applications</td>
<td>3</td>
</tr>
<tr>
<td>INDT 1230</td>
<td>Intro Welding Safety &amp; Cutting Practices</td>
<td>3</td>
</tr>
<tr>
<td>INDT 1250</td>
<td>SMAW I</td>
<td>3</td>
</tr>
<tr>
<td>INDT 1220</td>
<td>OSHA Safety</td>
<td>2</td>
</tr>
<tr>
<td>INDT 1240</td>
<td>Basic Oxy/Fuel Cutting &amp; Welding</td>
<td>3</td>
</tr>
</tbody>
</table>

**Credit Hours**: 14

**SECOND SEMESTER**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>DRFT 1510</td>
<td>Design Drafting</td>
<td>3</td>
</tr>
<tr>
<td>INDT 1260</td>
<td>GMAW I</td>
<td>3</td>
</tr>
<tr>
<td>INDT 2241</td>
<td>Welding Inspection Practices</td>
<td>3</td>
</tr>
<tr>
<td>INDT 2250</td>
<td>GTAW I</td>
<td>3</td>
</tr>
</tbody>
</table>

**Credit Hours**: 12

**THIRD SEMESTER**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 1510</td>
<td>English Composition I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1104</td>
<td>Technical Math</td>
<td>3</td>
</tr>

## CERTIFICATES OF COMPLETION

The Certificate of Completion is awarded for the successful completion of a series of courses that relate directly to an identifiable area of skills or knowledge. The series can provide individuals who are not available for full-time study an opportunity to gain marketable skills and knowledge. Should an individual decide to enroll in an associate degree program, these courses will apply toward it, if it is in the same area of study.

All courses for a Certificate of Completion must be taken at Washington State. Successful completion means at least a 2.0 GPA for courses counting toward a certificate of completion. Application for a certificate is made to the appropriate academic dean.

### Automotive Electricity
- AUTO 1100 Vehicle Service & Maintenance
- AUTO 1110 Electrical Circuitry
- AUTO 1130 Electrical Components
- AUTO 2110 Computerized Engine Controls

### Automotive Service & Maintenance
- AUTO 1120 Automotive Brakes
- AUTO 1140 Automotive Chassis
- AUTO 1150 Manual Drive Trains
- AUTO 1160 Fuel & Emission Control
- AUTO 2100 Automatic Drive Trains

### Diesel Engines
- TRCK 1140 Diesel Engine Design & Service
- TRCK 2100 Diesel Engine Tune Up & Maintenance
- TRCK 2130 Electronic Diesel Engines
- TRCK 2110 Diesel Fuel Systems & Hydraulics

### Drafting: Computer-Aided Drafting
- ENGR 1010 Fundamentals of Engineering
- DRFT 1430 Advanced CAD
- DRFT 2530 Engineering Drafting or Structural Drafting
- INDT 1170 Computer Numerical Control

### EKG Technician
- HLTH 2400 EKG Technician
- HLTH 1810 Medical Terminology I
- HLTH 1820 Medical Terminology II or
- BIOL 2310 Human Anatomy & Physiology I
- BIOL 2320 Human Anatomy & Physiology II

### Fitness and Exercise
- BIOL 1310 Anatomy & Physiology I
- BIOL 131L Anatomy & Physiology I Lab
- BIOL 1320 Anatomy & Physiology II
- BIOL 132L Anatomy & Physiology II Lab or
- BIOL 2310 Human Anatomy & Physiology I
- BIOL 231L Human Anatomy & Physiology I Lab
- BIOL 2320 Human Anatomy & Physiology II
- BIOL 232L Human Anatomy & Physiology II Lab
- BIOL 1510 Introduction to Nutrition or
- HLTH 1410 Healthy Eating for a Healthy Life
- BIOL 2650 Nutrition for Sports & Fitness
- HLTH 1120 First Aid & Personal Safety
- PTAT 1550 Basic Exercise Physiology
- RECR RECR Elective
- HLTH 1000 Personal Fitness Concepts or
- PTAT 2560 Principles of Applications of Therapeutic Exercise

### Gasoline Engines
- AUTO 1100 Vehicle Service & Maintenance
- AUTO 1170 Upper Engine Design & Service
- AUTO 2130 Cylinder Block & Lower Engine

### Geographic Information System
- GEOS 1010 Physical Geography
- GEOS 2510 Introduction to Mapping and GIS
- GEOS 2520 GIS Applications Capstone

### Instrumentation
- ELET 2410 Programmable Logic Controllers
- MECH 2150 Instrumentation I
- MECH 2170 Instrumentation II

### Machining: Precision Machining
- INDT 1150 Machining Processes
- INDT 1170 Computer Numerical Control
- DRFT 2530 Engineering Drafting
- INDT 2170 Advanced Computer Numerical Control

### Multi-craft
- BUSM 1600 PC Applications
- ENGR 1010 Fundamentals of Engineering
- DRFT 2530 Engineering Drafting
- INDT 1150 Machining Processes
- INDT 1220 OSHA Safety
- INDT 1330 Industrial Electricity

### Network Support
- ELEC 1950 Cisco Semester I
- ELEC 2050 Cisco Semester II
- ELEC 2610 Intro to Linux
- DTCS 2550 Network Administration
Office Software
OAST 2210  Microsoft Word
OAST 2220  Microsoft Excel
OAST 2230  Microsoft Access
OAST 2910  Microsoft PowerPoint
OAST 1550  Windows Concepts

PC Support
DTCS 1230  OS Concepts & Customizing
ELEC 2410  Microcomputer Diagnostics & Upgrading I
ELEC 2510  Microcomputer Diagnostics & Upgrading II
ELEC 1950  Cisco Semester I
INDT 1310  Basic Electricity or
ELET 1310  Digital I

Petroleum Technology
INDT 1020  Introduction to Petroleum Industry
INDT 1030  Well Planning and Drilling Operations
INDT 2040  Production of Oil and Gas
GEOL 2500  Petroleum Geology

Programmable Logic Controllers
ELET 1110  DC Circuits or
INDT 1310  Basic Electricity
ELET 2410  Programmable Logic Controllers
INDT 2210  Process Control or
MECH 2150  Instrumentation I

Real Estate
REAL 1900  Real Estate Principles & Practices
REAL 2420  Real Estate Finance
REAL 2400  Real Estate Law
REAL 2410  Real Estate Appraising

Small Business Entrepreneurship
BUSM 1570  Small Business Entrepreneurship
BUSM 1660  Business Law
MKTG 2510  Marketing
ACCT 1510  Principles of Accounting I
ACCT 1610  Payroll Accounting

The four-letter course identifier indicates the department and the four numbers indicate the specific course within each department.

The various departments are listed in alphabetical order.

**EXPLANATION OF COURSE DESCRIPTION CODES**

**Day, Eve, Online:** indicates which semester or semesters the course is offered during the year and if it is offered day, evening or online. F=Fall; Sp=Spring; Su=Summer; All Terms=All Terms.

**Prerequisite:** any coursework that must be completed before the student is eligible to enroll for the course.

**Co-requisite:** any coursework that must be completed during the same semester as the course in which you are enrolling.

**cr.:** the number of credits to be awarded to students who successfully complete the course.

**Lecture:** the number of hours per week a particular course meets in a lecture classroom.

**Lab:** the number of hours per week a particular class meets in a laboratory situation. This is usually in addition to lecture hours.

**Fee- ♦:** indicates course has additional fees.

**TM-*:** indicates a course covered by the Transfer Module. The final letter indicates the section of the Transfer Module in which the course is included.

**TAG:** indicates a course covered by the Transfer Assurance Guide.

**OTM:** Ohio Transfer Module
ACCOUNTING (ACCT)

ACCT 1510 Principles of Accounting I 4 cr.

ACCT 1520 Principles of Accounting II 4 cr.

ACCT 1610 Payroll Accounting 3 cr.
Study of payroll accounting, the computing of wages, the calculation of deductions, the reporting of data to the respective Federal and State agencies. Prerequisite: ACCT 1510. Co-Requisite: None. Day: Sp; Eve: Sp, Su. Lecture: 2, Lab: 2.

ACCT 2000 Special Topics-Accounting 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to accounting technology. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

ACCT 2190 Principles of Federal Income Tax 3 cr.

ACCT 2210 Cost Accounting 4 cr.

ACCT 2320 Managerial Accounting 3 cr.

ACCT 2340 Governmental Accounting 3 cr.

ACCT 2710 Intermediate Accounting 4 cr.

ACCT 2730 Auditing I 3 cr.
Introduction to auditing, professional ethics, legal liability, internal control, working papers, evidential matters, and beginning audit procedures. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 2, Lab: 2.

ACCT 2810 Microcomputer Accounting 1 cr.

ACCT 2820 Spreadsheet Accounting 3 cr.

ACCT 2900 Fraud Examination 3 cr.

ACCT 2910 Capstone Accounting Technologies 3 cr.

AGRICULTURE MANAGEMENT (AGRI)

AGRI 1100 Introduction to Agribusiness Management 4 cr.
This course will serve to acquaint the student with basic
limited amount of soil. A significant portion of the course production of food commodities produced on what is a natural resources and will analyze why there is an increased course you will see a need for improving management of our management strategies will be discussed. Throughout this pests, weeds, and nutrient disorders will be covered and food production and pest resistance. Plant diseases, insect breeding and genetic engineering of plants for improved and carries the student all the way through traditional plant growth, development, anatomy, and morphology disease management. This course starts with an introduction to plant sciences, and pest and agriculture. After completing this course the student will have a basic understanding of the biological principles applicable to the animal sciences. Basic subjects such as animal reproduction, genetics, nutrition, lactation and consumer products will be covered. This course also deals with biological and cultural controls of disease and insects (Integrated Pest and Disease Management). Prerequisite: BIOL 1100, BIOL 110L, BIOL 1110 and BIOL 111L. Co-Requisite: None. Day: Sp. Lecture: 3, Lab: 3.

AGRI 1300 Principles of Agricultural Sales 3 cr.
A basic course in sales functions and agriculture sales. This course will cover the role of selling, what it means, and its relationship to agriculture marketing. Students will also be exposed to professionals from the agricultural sales field to get a better understanding of where theory meets practical application. Prerequisite: None. Co-Requisite: None. Day: Sp. Lecture: 4, Lab: 0.

AGRI 1500 Field Experience 1 cr.
The 180 work hours total required for the field experience provides an opportunity to put the student's classroom knowledge to practical use. Position is selected and/or approved by the student advisor; student is evaluated periodically by the instructor/ coordinator and is supervised by an onsite supervisor. Prerequisite: AGRI 1100 and AGRI 1300. Co-Requisite: None. Day: Sp, Su. Lecture: 0, Lab: 12.

AGRI 2000 Special Topics-Agribusiness Management 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to agribusiness management. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

AGRI 2200 Introduction to Animal Science 4 cr.
An introductory course in animal sciences as it relates to agriculture. After completing this course the student will have a basic understanding of the biological principles applicable to the animal sciences. Basic subjects such as animal reproduction, genetics, nutrition, lactation and consumer products will be covered. This course also covers the breeding, feeding, and management of beef cattle, dairy cattle, horses, swine, and goats. Prerequisite: BIOL 1100, BIOL 110L, BIOL 1110 and BIOL 111L. Co-Requisite: None. Day: Fa. Lecture: 3, Lab: 3.

AGRI 2300 Crop and Soil Sciences Management 4 cr.
This is an introductory course in the basics of crop production, agronomy and soil sciences, and pest and disease management. This course starts with an introduction to plant growth, development, anatomy, and morphology and carries the student all the way through traditional plant breeding and genetic engineering of plants for improved food production and pest resistance. Plant diseases, insect pests, weeds, and nutrient disorders will be covered and management strategies will be discussed. Throughout this course you will see a need for improving management of our natural resources and will analyze why there is an increased production of food commodities produced on what is a limited amount of soil. A significant portion of the course will deal with biological and cultural controls of disease and insects (Integrated Pest and Disease Management). Prerequisite: BIOL 1100, BIOL 110L, BIOL 1110 and BIOL 111L. Co-Requisite: None. Day: Sp. Lecture: 3, Lab: 3.

ANTH 1510 Cultural Anthropology 3 cr. TM-S
Comparative survey of selected world cultures, nature of cultural diversity, evolution of socio-cultural systems. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: On demand. Lecture: 3, Lab: 0. TAG: OSS001.

ANTH 2000 Special Topics-Anthropology 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to anthropology. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

ART (ARTS)

ARTS 1000 Art Appreciation 3 cr. TM-H
Introduction to traditional and contemporary visual arts in the context of their social and cultural backgrounds. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Sp. Lecture: 3, Lab: 0.

ARTS 1110 Two-Dimensional Design 3 cr.
Introduction to the organization of the formal elements on a two-dimensional surface and color theory. The fundamental design principles of unity, diversity, balance, movement, and focal point will be emphasized through the application of the formal elements in a variety of projects. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: On demand. Lecture: 4, TAG: OAH003.

ARTS 1120 Three-Dimensional Design 3 cr.
Introduction to the organization of the formal elements in three-dimensions. Application of the fundamental design principles of unity, diversity, balance, movement, and focal point will be emphasized through the use of the formal elements to create space and form. Focus on the translation of an idea into tangible form using a variety of materials. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 4.

ARTS 1210 Drawing I 4 cr.
An introduction to descriptive drawing with an emphasis on perceptual, conceptual, and critical skills. An emphasis on the application of gesture, shape, value, line, perspective, design, and expression to descriptive drawing. A variety of broad and fine media are explored. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp; Eve: On demand. Lecture: 6. TAG: OAH001.
### Arts and Humanities Courses

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARTS 1220</td>
<td>Color Theory</td>
<td>3 cr.</td>
<td>This course shall explore the nature of additive and subtractive color systems. Color is emphasized in relationship and clarification of design principles, expressive issues, and iconography. Prerequisite: ARTS 1110 and ARTS 1210. Co-Requisite: None. Day: Fa; Eve: On demand. Lecture: 1, Lab: 4.</td>
</tr>
<tr>
<td>ARTS 1800</td>
<td>Photography I</td>
<td>3 cr.</td>
<td>A non-darkroom introduction to the art and techniques of photography. A focus is placed on the generation of images through the use of the creative controls of the camera. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp. Lecture: 3, Lab: 0. TAG: OAH011. ◆</td>
</tr>
<tr>
<td>ARTS 1810</td>
<td>Digital Photography</td>
<td>3 cr.</td>
<td>A non-darkroom introduction to the art and techniques of digital photography. A focus is placed on the generation of images through the use of the creative controls of the camera. The controls to be covered include an overview of digital cameras, capturing an image with a digital camera, exposure, aperture, shutter speed, lenses, filters, lighting, use of flash, composition, and digital work flow. The language of digital imaging and digital techniques will be discussed. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp; Eve: On demand; Online: Fa, Sp. Lecture: 2, Lab: 2. ◆</td>
</tr>
<tr>
<td>ARTS 2010</td>
<td>Art History I</td>
<td>3 cr. TM-H</td>
<td>Survey of art history and the analysis of painting, sculpture, and architecture from prehistory through the Renaissance and the relationship of the visual arts to their social and cultural context. Prerequisite: ENGL 0900 or Accuplacer Score greater than 69. Co-Requisite: None. Day: Fa; Eve: On demand. Lecture: 3, Lab: 0. TAG: OAH005.</td>
</tr>
<tr>
<td>ARTS 2020</td>
<td>Art History II</td>
<td>3 cr. TM-H</td>
<td>Survey of art history and the analysis of painting, sculpture, and architecture from Baroque through the 20th Century and the relationship of the visual arts to their social and cultural context. Prerequisite: ENGL 0900 or Accuplacer Score greater than 69. Co-Requisite: None. Day: Sp; Eve: On demand. Lecture: 3, Lab: 0. TAG: OAH005.</td>
</tr>
<tr>
<td>ARTS 2050</td>
<td>American Art</td>
<td>3 cr. TM-H</td>
<td>Survey of American visual art, architecture, and crafts from early settlements to the present indicating how these arts have expressed American ways of living and how they have been related to American ideals. Prerequisite: ENGL 1510. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 3, Lab: 0.</td>
</tr>
<tr>
<td>ARTS 2090</td>
<td>History of Photography</td>
<td>3 cr. TM-H</td>
<td>History of photography from its invention in 1839 to the present, including photographic theory and methodology. The study of photographs as art objects, historical artifacts, and their social and cultural context. Prerequisite: ENGL 1510. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 3, Lab: 0.</td>
</tr>
<tr>
<td>ARTS 2230</td>
<td>Figure Drawing</td>
<td>4 cr.</td>
<td>Introduction to descriptive drawing of the nude figure with emphasis on perceptual, conceptual, and critical skills. Focus on artistic anatomy and structure and its application to figure drawing. Prerequisite: ARTS 1210. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 1, Lab: 6. ◆</td>
</tr>
<tr>
<td>ARTS 2340</td>
<td>Pre-Columbian Art</td>
<td>3 cr. TM-H</td>
<td>Survey of the paintings, sculptures, architecture, and crafts of early Mexico, Central America, and South America from pre-historic to 16th century. Prerequisite: ENGL 1510. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 3, Lab: 0.</td>
</tr>
<tr>
<td>ARTS 2370</td>
<td>Contemporary Art: 1945 to Present</td>
<td>3 cr.</td>
<td>A survey of American art from 1945 to the present, focused primarily on painting and sculpture. The relationship of artwork to the social and cultural context is emphasized. Prerequisite: One prior ARTS course and ENGL 1510. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 3, Lab: 0.</td>
</tr>
<tr>
<td>ARTS 2410</td>
<td>Painting I</td>
<td>3 cr.</td>
<td>Introduction to descriptive painting with an emphasis on perceptual, conceptual, and critical skills. Emphasis on the application of gesture, shape, value, line, perspective, design, and expression to descriptive painting. Study of the painter’s language and modes of expression; color and paint manipulation, illusion and organization of form and space, and surface order. Focused on projects that increase in complexity. Prerequisite: ARTS 1110 and ARTS 1210.</td>
</tr>
</tbody>
</table>

ARTS 2420 Painting II 3 cr.
Continuation of perceptual, conceptual, and critical painting skills introduced in ARTS 2410. Emphasis on the development of a personal image through the application of the formal elements gesture, shape, light, line, perspective, design, expression, and iconography. Focused on projects that increase in complexity. Prerequisite: ARTS 2410. Co-Requisite: None. Day: Sp; Eve: On demand. Lecture: 1, Lab: 4.

ARTS 2430 Watercolor Painting 3 cr.
Introduction to the basic techniques and concepts of aquarelle (transparent) and gouache (opaque) watercolor. Focused on projects that increase in complexity with an emphasis on perceptual, conceptual, and critical skills. Prerequisite: ARTS 1110 and ARTS 1210. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 1, Lab: 4.

ARTS 2610 Graphic Design I 4 cr.
This course provides an introduction to visual communication graphics and design. A focus is placed on the generation and manipulation of image, typography, and sign/symbol/icon through digital and non-digital methods. Prerequisite: ARTS 1110 and ARTS 1210. Co-Requisite: None. Day: Fa; Eve: On demand. Lecture: 1, Lab: 6.

ARTS 2620 Graphic Design II 4 cr.

AUTOMOTIVE SERVICE TECHNOLOGY (AUTO)

AUTO 1100 Vehicle Service & Maintenance 3 cr.
Perform minor maintenance and service such as lubrication, minor adjustments, replacing simple components and correcting malfunctions on working vehicles. Includes battery construction, starter servicing, some ASE tasks. Emphasis on shop and trade safety procedures. The course may be offered in a blended format in the evening or summer semester. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 2, Lab: 2.

AUTO 1110 Electrical Circuitry 3 cr.
Basic electrical theory with emphasis on operating characteristics of DC series and parallel circuits. Emphasis on the relationship of resistance, voltage, and amperage in an electrical circuit. Circuits will be analyzed using Ohm’s Law and verified using electrical meters. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 2, Lab: 2.

AUTO 1120 Automotive Brakes 3 cr.
A study of hydraulic braking operations, and chassis parts and functions. Laboratory work will consist of brake lathe operation, tire balancing and brake repair. Anti-lock brake concepts are introduced. The course may be offered in a blended format in the evening or summer semester. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 2, Lab: 2.

AUTO 1130 Electrical Components 3 cr.
Study of the theory of electricity and electronics as applied in modern automotive & diesel systems. Principles of operation, testing, and repairing all major parts in these systems including the battery, starting, charging, and ignition systems. The use of tools and procedures necessary to test and repair wiring. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 2, Lab: 2.

AUTO 1140 Automotive Chassis 3 cr.
Study of steering alignment angles and suspension fundamentals. Laboratory work consists of late model alignments, suspension service, and wheel balancing. Active suspension systems will be introduced. The course may be offered in a blended format in the evening or summer semester. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 2, Lab: 2.

AUTO 1150 Manual Drive Trains 3 cr.
The design, construction, and operating principles of the major types of transmissions used today are covered. Actual disassembling, maintenance, and servicing techniques of driveline units such as clutch and differentials are covered. Laboratory work will include disassembly and reassembly of working units. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 2, Lab: 2.

AUTO 1160 Fuel & Emissions Controls 3 cr.
Study of carburetor and other fuel system components. Covers exhaust emission control devices. Lab work consists of tune-up procedures, carburetor overhaul, and a continuation of troubleshooting procedures using the various diagnostic analyzers and gauges. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 2, Lab: 2.

AUTO 1170 Upper Engine Design & Service 3 cr.
Development of work skills and proficiency in engine rebuilding are emphasized. Stresses disassembly, cleaning, inspection and assembly of gasoline and diesel cylinder heads; identify all of the parts of the engine’s upper end and explain the principles of the internal combustion...
COURSE CATALOG

AUTO 2000  Special Topics-Automotive  0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to automotive technology. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

AUTO 2100  Automatic Drive Trains  3 cr.
Covers design, construction, and operating principles of the major types of transmissions used today. Includes actual disassembling, maintenance and servicing techniques of automatic transmissions, final drives and electronics. Lab work includes disassembly and reassembly of working units. Prerequisite: AUTO 1150. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 2, Lab: 2.  ♦

AUTO 2110  Computerized Engine Controls  3 cr.
Covers the operation and control functions of the automotive computer; use of tools and procedures necessary in testing and repair of the various components of these systems. Emphasis on fundamentals of electricity (circuitry, amperage, voltage and resistance) and basics of solid state electronics and their use in the automobile. Review ignition, fuel and emission systems of modern automobiles and their relationship with computerized engine controls. Prerequisite: AUTO 1160. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 2, Lab: 2.  ♦

AUTO 2130  Cylinder Block & Lower Engine  3 cr.
Gasoline engines will be disassembled, inspected, and reassembled. Emphasis will be on troubleshooting failed engine components, clearance measurements, and preventive maintenance. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 2, Lab: 2.  ♦

AUTO 2150  Principles of Air Conditioning  3 cr.
Covers the principles of automotive HVAC systems, plus the operation and diagnosis of the C.C.O.T. (Cycling clutch orifice tube) and V-5 air conditioning systems. Includes purging, charging, reclaiming, leak detection and performance testing. Student will study environmental impact of fluorocarbons. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 2, Lab: 2.  ♦

BIOLOGY (BIOL)

BIOL 0955  Introduction to Biology  3 cr.
This course is intended for students who have not had high school biology with a “C” or better. It is a review of the basic biology concepts that includes cell biology, genetics, and evolution. Course does not count towards graduation. Prerequisite: None. Co-Requisite: BIOL095L. Day: All. Lecture: 3, Lab: 0.

BIOL 095L  Introduction to Biology Lab  1 cr.
This course is intended for students who have not had high school biology with a “C” or better. This lab is coordinated with material covered in lecture and includes a review of basic biology concepts including cell structure, genetics, and evolution. Course does not count towards graduation. Prerequisite: None. Co-Requisite: BIOL0955. Day: All. Lecture: 0, Lab: 2.  ♦

BIOL 1010  Principles of Biology  3 cr. TM-N
A biology course for non major’s which introduces cell biology, physiology, genetics, evolution and ecology. Inquiry-based learning and case studies are used to foster good science process skills in lecture and discussion. Prerequisite: None. Co-Requisite: BIOL 101L. Day: All; Eve: Fa, Sp. Lecture: 3, Lab: 0.

BIOL 101L  Principles of Biology Lab  1 cr. TM-N
A biology course for non major’s which introduces cell biology, physiology, genetics, evolution and ecology. Inquiry-based learning and case studies are used to foster good science process skills in lecture, discussion and laboratory. Prerequisite: None. Co-Requisite: BIOL 1010. Day: All; Eve: Fa. Lecture: 0, Lab: 2.  ♦

BIOL 1100  General Biology I  3 cr. TM-N
An introductory course for biology majors covering reproduction of cells, their structure and function, classical and molecular genetics and evolution. Prerequisite: HS Biology & Chemistry or BIOL 1010, BIOL 101L & CHEM 1210, CHEM 121L. Co-Requisite: BIOL 110L. Day: Fa; Eve: On demand. Lecture: 3, Lab: 0. TAG: OSC003.

BIOL 110H  General Biology I Honors  3 cr. TM-N
An introductory course for honors biology majors covering reproduction of cells, their structure and function, classical and molecular genetics and evolution. Students will be required to review relevant scientific journal articles and compose short answers or related questions and complete an inset collection. Prerequisite: HS Biology & Chemistry or BIOL 1010, BIOL 101L & CHEM 1210, CHEM 121L, and Honors program acceptance. Co-Requisite: BIOL 110L. Day: Fa; Eve: On demand. Lecture: 3, Lab: 0. TAG: OSC003.

BIOL 110L  General Biology I Lab  1 cr. TM-N
A series of experiments designed to enhance the material discussed in BIOL 1100. Prerequisite: HS Biology & Chemistry or BIOL 1010, BIOL 101L & CHEM 1210, CHEM 121L. Co-Requisite: BIOL 1100. Day: Fa; Eve: On demand. Lecture: 0, Lab: 3. TAG: OSC003.  ♦

BIOL 1110  General Biology II  3 cr. TM-N
A continuation of BIOL1100 with emphasis on the evolution of animal and plant life, including systematics, phylogeny, organ systems, anatomy, physiology and behavior. The
course emphasizes comparative strategies within the animal and plant kingdom. Prerequisite: BIOL 1100 & BIOL 110L with "C" or better. Co-Requisite: BIOL 111L. Day: Sp. Lecture: 3, Lab: 0. TAG: OSC004.

BIOL 111L General Biology II Lab 1 cr. TM-N
A series of experiments designed to enhance the material discussed in BIOL1110. Prerequisite: BIOL 1100 & BIOL 110L with "C" or better. Co-Requisite: BIOL 1110. Day: Sp. Lecture: 0, Lab: 3. TAG: OSC004. ♦

BIOL 1310 Anatomy & Physiology I 2 cr. TM-N
This course is the first of a two-term sequence designed to facilitate an understanding of the structural and functional units of the human body. Formal classroom activities are integrated in a comprehensive study of the cells, tissues and organs of the body, with emphasis on the integumentary, skeletal, muscular, nervous, endocrine, and reproductive systems. This course is intended for non-science majors and students in the Practical Nursing program. Two class hours per week. Prerequisite: HS Biology or BIOL0955 and BIOL095L or BIOL 1010 and BIOL 101L & HS Chemistry or CHEM0955 and CHEM095L or CHEM 1210 and CHEM 121L. Co-Requisite: BIOL 131L. Day: Fa, F1; Eve: On demand. Lecture: 2, Lab: 0.

BIOL 131L Anatomy & Physiology I Lab 1 cr. TM-N
This course is the first of a two-term sequence designed to facilitate an understanding of the structural and functional units of the human body. Formal laboratory activities are integrated in a comprehensive study of the cells, tissues and organs of the body, with emphasis on the integumentary, skeletal, muscular, nervous, endocrine, and reproductive systems. This lab is intended for non-science majors and students in the Practical Nursing program. Prerequisite: HS Biology or BIOL0955 and BIOL095L or BIOL 1010 and BIOL 101L & HS Chemistry or CHEM0955 and CHEM095L or CHEM 1210 and CHEM 121L. Co-Requisite: BIOL 131L. Day: Fa, F1; Eve: On demand. Lecture: 2, Lab: 0.

BIOL 1320 Anatomy & Physiology II 2 cr. TM-N
The second course in a two-term sequence designed to facilitate an understanding of the structure and function of the human body. Formal classroom activities are integrated in a comprehensive study of the special senses, blood, cardiovascular system, lymphatic, respiratory, digestive, and urinary systems. This lab is intended for non-science majors and students in the Practical Nursing program. Prerequisite: BIOL 1310 and BIOL 131L. Co-Requisite: BIOL 1320. Day: F2, Sp; Eve: On demand. Lecture: 0, Lab: 2. ♦

BIOL 132L Anatomy & Physiology II Lab 1 cr. TM-N
The second course in a two-term sequence designed to facilitate an understanding of the structure and function of the human body. Formal laboratory activities are integrated into a comprehensive study of the special senses, blood, cardiovascular system, lymphatic, respiratory, digestive, and urinary systems. This lab is intended for non-science majors and students in the Practical Nursing program. Prerequisite: BIOL 1310 and BIOL 131L. Co-Requisite: BIOL 1320. Day: F2, Sp; Eve: On demand. Lecture: 0, Lab: 2. ♦

BIOL 1330 Survey Anatomy & Physiology I 2 cr.
This course is the first of a two-term sequence designed to facilitate understanding of the structural and functional units of the human body. Formal classroom activities are integrated in a comprehensive study of the cells, tissues and organs of the body, with emphasis on the integumentary, skeletal, muscular, nervous, endocrine, and reproductive systems. This course is intended for non-science majors. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp; Eve: On demand. Lecture: 2, Lab: 0.

BIOL 1340 Anatomy & Physiology I for Massage Therapists 4 cr.
This course is the first of a three-term sequence designed to facilitate understanding of the structure and function of the human body. Formal classroom instruction leading to a comprehensive study of the cells, tissues and organs of the body, with emphasis on the integumentary, skeletal, muscular, and nervous systems and their relation to the practice of Massage Therapy. This course is intended for Massage Therapy Students as preparation for the Certification Exam. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa even yrs. Lecture: 4, Lab: 0.

BIOL 1350 Survey Anatomy & Physiology II 2 cr.
None. Day: Fa; Eve: Fa even yrs. Lecture: 0, Lab: 0.

BIOL 1360 Anatomy & Physiology II for Massage Therapists 3 cr.
This course is the second of a three-term sequence designed to facilitate understanding of the structure and function of the human body. Formal classroom instruction leading to a comprehensive study of the skeletal, muscular, and nervous systems. This course is intended for Massage Therapy Students as preparation for the Certification Exam. Prerequisite: BIOL 1360. Co-Requisite: BIOL 137L. Day: Sp; Eve: Sp odd yrs. Lecture: 3, Lab: 0.

BIOL 137L Anatomy & Physiology II for Massage Therapists Lab 1 cr.
This course is the second of a three-term sequence designed to facilitate understanding of the structure and function of the human body. Formal laboratory activities are integrated
in a comprehensive study of the skeletal, muscular, and nervous systems. This course is intended for Massage Therapy Students as preparation for the Certification Exam. Prerequisite: BIOL 1360. Co-Requisite: BIOL 1370. Day: Sp; Eve: Sp odd yrs. Lecture: 0, Lab: 3.

BIOL 1380 Advanced Anatomy & Kinesiology for Massage Therapists 4 cr.
This course builds on knowledge gained by successful completion of BIOL 1360 and BIOL 1370. Emphasis focuses on skeletal, joint, and muscle structure, function and motion in the human body. Detailed consideration is given to muscle origin, insertion, nerve interaction and action, joint motion, prime movers and antagonist muscle groups using proper medical terminology. Prerequisite: BIOL 1370 and BIOL 137L. Day: Su; Eve: Fa odd yrs. Lecture: 4, Lab: 0.

BIOL 1510 Introduction to Nutrition 3 cr.
A course for non-science majors which introduces the basic nutritional needs of humans through the life cycle; nutrient functions, sources, and requirements. Significant factors which influence food attitudes and habits are included. Students will develop sample meal plans for different life situations. Prerequisite: None. Co-Requisite: None. Day: Fa. Lecture: 3, Lab: 0.

BIOL 2000 Special Topics-Biology 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to biological sciences. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

BIOL 2010 Basic Microbiology 2 cr. TM-N
An introduction to microorganisms and their impact on human health, disease, and the environment. Epidemiology, techniques of infection control and sterile technique are discussed. Prerequisite: HS Biology & Chemistry or BIOL 1010, BIOL 101L & CHEM 1210, CHEM 121L. Co-Requisite: BIOL 201L. Day: All. Lecture: 2, Lab: 0.

BIOL 201L Basic Microbiology Lab 1 cr. TM-N
A series of experiments designed to enhance the material discussed in BIOL2010. Prerequisite: HS Biology & Chemistry or BIOL 1010, BIOL 101L & CHEM 1210, CHEM 121L. Co-Requisite: BIOL 2010. Day: All. Lecture: 0, Lab: 3.

BIOL 2110 Environmental Biology 3 cr. TM-N
A course for majors and non majors which introduces current environmental problems including air and water pollution, toxic wastes, pesticides and energy resources. Human population and environmental impact are also included. Local environmental problems are addressed. Prerequisite: HS Science course with "C" or better or equivalent. Co-Requisite: BIOL 211L. Day: Sp odd yrs. Lecture: 3, Lab: 0.

BIOL 211L Environmental Biology Lab 1 cr. TM-N
Topics of the lab align to the lecture course. Prerequisite: HS Science course with "C" or better or equivalent. Co-Requisite: BIOL 2110. Day: Sp odd yrs. Lecture: 0, Lab: 2.

BIOL 2310 Human Anatomy & Physiology I 3 cr. TM-N
First of two courses on structure and function of the human body. Comprehensive study of cells, tissues, and organs with emphasis on the integumentary, skeletal, muscular, and nervous systems. Prerequisite: HS Biology & Chemistry or BIOL 1010, BIOL 101L & CHEM 1210, CHEM 121L. Co-Requisite: BIOL 231L. Day: All; Eve: All; Online: Fa, Sp. Lecture: 3, Lab: 0.

BIOL 231L Human Anatomy & Physiology I Lab 1 cr. TM-N
First of two laboratories on structure and function of the human body. Comprehensive study of cells, tissues, and organs with emphasis on the integumentary, skeletal, muscular, and nervous systems. Prerequisite: HS Biology & Chemistry or BIOL 1010, BIOL 101L & CHEM 1210, CHEM 121L. Co-Requisite: BIOL 2310. Day: All; Eve: All. Lecture: 0, Lab: 2.

BIOL 2320 Human Anatomy & Physiology II 3 cr. TM-N
Continuation of BIOL 2310. Comprehensive study of the special senses and the endocrine, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems. Prerequisite: BIOL 2310 and BIOL 231L. Co-Requisite: BIOL 232L. Day: All; Eve: All; Online: Sp. Lecture: 3, Lab: 0.

BIOL 232L Human Anatomy & Physiology II Lab 1 cr. TM-N
Continuation of BIOL 231L. This is the second of two laboratories involving comprehensive study of the special senses and the endocrine, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems. Prerequisite: BIOL 2310 and BIOL 231L. Co-Requisite: BIOL 2320. Day: All; Eve: All; Online: Sp. Lecture: 0, Lab: 2.

BIOL 2450 Pathophysiology 3 cr.
This course focuses on basic pathophysiological processes and major disorders to introduce students to the diversity of disease process. By covering some disorders in detail and others by a generic presentation covering a group of disorders, the student is encouraged to compare textbook presentation with the actual clinical picture of a disorder that they may encounter in the clinical setting. Prerequisite: BIOL 1320 and BIOL 132L or BIOL 2320 and BIOL 232L or BIOL 1360. Co-Requisite: None. Day: Sp, Su; Eve: Su odd yrs. Lecture: 3, Lab: 0. TAG: OHL019.

BIOL 2550 Nutrition I 3 cr.
This course is an introduction to the science of nutrition and explores nutritional needs of the individual and the problems that arise if these needs are not met. It includes information on the fundamental principles of nutrition.
with emphasis on the understanding of the nutrients, their chemical and physical properties, their functions in the body, their food resources and recommended intake for optimum health. Diet therapy is also included. Prerequisite: BIOL 2320 and BIOL 232L. Co-Requisite: None. Day: Sp; Eve: Fa; Online: Su. Lecture: 3, Lab: 0. TAG: OHL016.

BIOL 2600 Introduction to Ecology 3 cr. TM-N
A study of the interactions between organisms and their environments. Ecosystems, population structure and dynamics, as well as environmental perturbations are addressed. Prerequisite: BIOL 1010 and BIOL 101L or BIOL 2110 and BIOL 211L with "C" or better. Co-Requisite: BIOL 260L. Day: Sp even yrs. Lecture: 3, Lab: 0.

BIOL 260L Introduction to Ecology Lab 1 cr. TM-N
A study of the interactions between organisms and their environments. Ecosystems, population structure and dynamics, as well as environmental perturbations are addressed. Lab analysis and fieldwork in local areas is conducted. Prerequisite: BIOL 1010 and BIOL 101L or BIOL 2110 and BIOL 211L with "C" or better. Co-Requisite: BIOL 2600. Day: Sp even yrs. Lecture: 0, Lab: 2.

BIOL 2650 Nutrition for Sports and Fitness 3 cr.
This course is an overview on the nutritional effects of physiological processes experienced through exercise. Specifically, it focuses on the macro- and micronutrients relationship in combination with an appropriate exercise routine on strength-hypertrophy, endurance, fatigue, and composition-weight changes. This course will also entail a review of the current sport nutrition literature and sport supplements. Prerequisite: BIOL 1510 or BIOL 2550. Co-Requisite: None. Day: Fa. Lecture: 3, Lab: 0.

BUSM 1550 Business Management 3 cr.

BUSM 1570 Small Business Entrepreneurship 3 cr.
A study of the basic fundamentals and problems of operating a small business. Topics of major interest including organization, opportunities in democracy, location, physical facilities, financing, administration of a credit program, problems of distributing goods and services, keeping records of your business, simplified bookkeeping systems. This course contains a student simulation to start a business. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Fa; Online: Sp, Su. Lecture: 3, Lab: 0.

BUSM 1590 Business Law 3 cr.
Introduction to the legal environment of business, based principally on the Uniform Commercial Code. Topics covered in the course include: business ethics, nature and sources of law, the U.S. judicial system, torts, contracts, product liability, agency, partnerships, corporations, anti-trust law, the employment relationship, equal employment legislation, and securities regulation. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa; Online: All. Lecture: 3, Lab: 0. TAG: OB004.

BUSM 1600 PC Applications 3 cr.
The primary focus is on the application of personal computers using software popular in the business community. Students will use current operating systems, web browsers, word processing, spreadsheet databases, and presentation software. Concepts will be reinforced by a variety of hands-on assignments. Prerequisite: None. Co-Requisite: None. Day: All; Eve: All; Online: All. Lecture: 2, Lab: 2.

BUSM 1660 Business Law 3 cr.
Introduction to the legal environment of business, based principally on the Uniform Commercial Code. Topics covered in the course include: business ethics, nature and sources of law, the U.S. judicial system, torts, contracts, product liability, agency, partnerships, corporations, anti-trust law, the employment relationship, equal employment legislation, and securities regulation. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa; Online: All. Lecture: 3, Lab: 0. TAG: OB004.

BUSM 1710 Auto/Diesel Bus Computer App 3 cr.
Students will study the fundamentals of operating computer applications in the automotive industry. Topics include basic start-up, inventory control, billing and records maintenance. The computer's disk operating system, spreadsheets, word processing programs, browsers and presentation graphics will be introduced. Students will complete assignments in each type of software. Basic operations in web advisor and Sakai will be covered. This course was developed for Automotive and Diesel Truck majors only. This course is not for business majors and may not be substituted for any other BUSM course in the college's inventory. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 2, Lab: 2.

BUSM 1800 Personal Finance 3 cr.
An introduction to personal finances including such topics as: computing present and future value of money, lease and buy purchase options, types of insurance, protection methods for personal assets and personal identity. Covers investment fundamentals of stocks, bonds, and mutual funds, plus retirement, estate planning and tax planning. This course will NOT substitute for BUSM 2300 – Introduction to Finance. Prerequisite: None. Co-Requisite: None. Day: Fa. Lecture: 3, Lab: 0.

BUSM 2000 Special Topics-Business Management 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to business management. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

BUSM 2300 Introduction to Finance 3 cr.
Introduction to short, intermediate and long-term debt, risk management, financial intermediaries, and valuation of
BUSM 2560  Human Resource Management  3 cr.
Theories of human resource management topics including:
equal employment opportunity legislation, the employee
selection process; recruiting, testing, and interviewing, a
management team approach to performance appraisal,
the process of discipline and discharge and safety.
Prerequisite: None. Co-Requisite: None. Day: On demand;
Eve: Fa; Online: Fa. Lecture: 3, Lab: 0. ♦

BUSM 2610  Office Management  3 cr.
Study of the following office management topics:
office layout, office environment, selection of office
equipment, performance appraisal, job evaluation, salary
administration, work measurement, systems analysis, records
management, forms design, reprographics. The course
contains two projects – a capstone project, and an office
layout project. Prerequisite: BUSM 2560. Co-Requisite:

BUSM 2750  International Business  3 cr.
This course focuses on the economic, social, and cultural
aspects of doing business overseas. The following topics
are emphasized – entering foreign markets, regional
trading blocks, study of foreign cultures, managing people
from other cultures, and foreign exchange. A variety of
topics concerning multinational corporations will be studied
including their evolution, integration models, sources of
risk, and options for solving current global problems.
Prerequisite: BUSM 1550 and ECON 2120. Co-Requisite:

BUSM 2550  Human Resource Management  3 cr.
Theory of human resource management topics:
recruit, test, interview, and select employees; the
evaluation of employees; methods of disciplining and
reducing; workplace safety and security; performance
appraisal, conflict resolution and resolution.
Prerequisite: BUSM 2560. Co-Requisite: BUSM 2560.
Day: Sp; Eve: Fa. Lecture: 3, Lab: 0. ♦

CALC 1020  Introduction to Computers  0.5 cr.
This course is designed for someone with little or no
microcomputer knowledge. Topics include: learning to
type with confidence when using the keyboard, learn the
alphabet on the keyboard and type without looking at your
hands. Gain basic understanding in computer hardware
technology and terms, making software purchasing
decisions and learn basic skills in Microsoft Windows and
Word. Prerequisite: None. Co-Requisite: None. Day: On
demand; Eve: On demand. Lecture: 0.5, Lab: 0.

CALC 1030  Intermediate Computers  0.5 cr.
This course is a continuation of the Introduction to computer
course. This course is also an excellent choice for those
wanting to learn microcomputer topics at a leisurely pace.
Topics include: Learning about Microsoft Excel; PowerPoint,
Internet, and Email using Microsoft Windows Mail.
Prerequisite: None. Co-Requisite: None. Day: On demand;
Eve: On demand. Lecture: 0.5, Lab: 0.

CALC 1100  Project Management  2.5 cr.
Course gives the framework for the delivery of project
that allows individuals that are participating in or
managing project management activities to understand
and coordinate their activities in an optimal manner.
Prerequisite: None. Co-Requisite: None. Day: On demand;
Eve: On demand. Lecture: 2.5, Lab: 0.

CALC 1320  Introduction to Access  0.5 cr.
Topics include: Database environment and terminology;
creating databases and structuring tables; primary key;
create, modify, and print queries, forms and reports;
relationships; multiple table and summary queries;
Wizards; and more. Experience with word processor,
spreadsheet and Windows recommended. Not for a novice
microcomputer user. Prerequisite: None. Co-Requisite:
None. Day: On demand; Eve: On demand. Lecture: 0.5,
Lab: 0.

CALC 1330  Intermediate Access  0.5 cr.
This course is a continuation of the Introduction to Access
course. Topics include: Creating sub forms and sub reports;
making user-friendly forms; advanced reports; compact
and repair databases; sharing Access data; parameter
and action queries; charts; hot tips; and more. Introduction
to Access or equivalent experience recommended.
Prerequisite: None. Co-Requisite: None. Day: On demand;
Eve: On demand. Lecture: 0.5, Lab: 0.

CALC 1340  Advanced Access  0.5 cr.
Topics Include: A continuation of the Intermediate Access
course. Topics include: Develop a database with the
guidance of a professional Access programmer; develop
menu systems; macros; use Access Tools; customize dialog
boxes; create modules in VBA; database management
techniques; and more. Prerequisite: None. Co-Requisite:
None. Day: On demand; Eve: On demand. Lecture: 0.5,
Lab: 0.

CALC 1420  Introduction to Excel  0.5 cr.
Topics include: Excel environment; spreadsheet design;
labels; formulas; and values; toolbar functions; select
cell/ranges to move, copy and print; edit, preview, and
spell check files; formatting cells; conditional formatting;
charts; AutoSum; basic functions; IF statements and more.
Prerequisite: None. Co-Requisite: None. Day: On demand;
Eve: On demand. Lecture: 0.5, Lab: 0.

CALC 1430  Intermediate Excel  0.5 cr.
Topics include: managing workbooks, data consolidation,
automating tasks with macros, toolbars, sorting and filtering
data lists, data validation, enhancing charts, worksheet
protection and more. Prerequisite: None. Co-Requisite:
None. Day: On demand; Eve: On demand. Lecture: 0.5,
Lab: 0.
COURSE CATALOG

CALC 1450  Advanced Excel  0.5 cr.
Topics include: Comparing data with advanced pivot tables; create advanced charts and graphs; data analysis techniques; forms design with Excel; solving business problems with advanced functions; analyzing a database with functions; automating tasks with macros; and more. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 0.5, Lab: 0.

CALC 1520  Introduction to PowerPoint  0.5 cr.
Topics Include: Learn presentation skills and techniques along with technology skills to create an effective PowerPoint presentation. Add creative slide transitions to make your presentation more interesting. Topics include: Develop an effective slide presentation; electronic slide shows; add, insert and delete slides; slide sorter; modifying and formatting presentations; graphics; presentation tips; and more. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 0.5, Lab: 0.

CALC 1530  Introduction to Word  0.5 cr.
Topics Include: Word environment, document design, selecting, moving, and copying text. Fonts, formatting paragraphs, tabs, bulleted lists, borders, shading, margins, page and section breaks, page numbering, columns, tables and more. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 0.5, Lab: 0.

CALC 1540  Intermediate Word  0.5 cr.
Topics Include: Using Graphics, mail merge, styles, templates, formatting long documents, and more. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 0.5, Lab: 0.

CALC 1570  Introduction to QuickBooks  0.5 cr.
Topics Include: QuickBooks environment, setting up a new company, working with centers and lists to manage customers, invoicing and credit memos, receipts and payments, banking and billing activities, reporting and budgeting, and protecting and backing up data. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 0.5, Lab: 0.

CALC 1630  Introduction to Windows  0.5 cr.
Students will learn how to use the Start menu and taskbar; move and resize windows; create and manage files, folders, and libraries; edit file metadata; and search for content on their computers. Students will also create shortcuts, use gadgets, and change system settings. Finally, students will browse the Web with Internet Explorer 8, add sites to their Favorites lists, and add RSS feeds. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 0.5, Lab: 0.

CALC 1640  Intermediate Windows  0.5 cr.
Topics include: how to configure user accounts, work with devices and printers, manage and protect important files, maintain and restore their computers, troubleshoot applications, share and access network resources, and configure power-saving plans and security settings. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 0.5, Lab: 0.

CALC 1710  A+ Certification Training  4 cr.
This course will help prepare students for the CompTIA A+ Essentials Exam (220-601) and Practical Application Exam (220-602) objectives. Topics included in 601: covering personal computer concepts, operating systems, installing, building, upgrading, repairing, optimizing and configuring a system, hardware troubleshooting, networks, and security. Topics included in 602: install, configure, optimize and upgrade windows, identify tools, diagnostic procedures and troubleshooting techniques and perform preventative maintenance. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 4, Lab: 0.

CALC 1720  Network+ Certification Training  2.5 cr.
This course will help prepare students for the CompTIA Network+ 2009 certification exam. It should be noted that a course alone cannot prepare students for any CompTIA exam. It is important that students have the recommended work experience in IT networking prior to taking the exam. For the CompTIA Network+ 2009 certification, CompTIA recommends students have 9 to 12 months of experience in the IT support industry. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 2.5, Lab: 0.

CALC 1730  Security+ Certification Training  2 cr.
This ILT Series course will prepare students to pass the current CompTIA Security+ SY0-301 certification exam. After taking this course, students will understand the field of network security and how it relates to other areas of information technology. This course also provides the broad-based knowledge necessary to prepare for further study in specialized security fields, or it can serve as a capstone course that gives a general introduction to the field. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 2, Lab: 0.

CALC 1900  Introduction to MS Office  2.5 cr.
Students will learn about the Microsoft Office button, Ribbon tabs, and Ribbons groups, galleries, the Document Information panel and the mini toolbar. Students will also work with Office XML file format, Word features like formatting; Excel features like charts and reports, and table options; PowerPoint features on graphics and presentations, and Outlook features will also be discussed. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 2.5, Lab: 0.

CALC 1910  Intermediate MS Office  2.5 cr.
The course is designed to give students proficiency in using
those features that are shared across the Office 2007 suite, as well as how to use Office programs in combination with each other. For example, students will embed Excel data in PowerPoint, linking Access data to an Excel file, use a Word outline to create a presentation, and import Access data into Outlook. They will also learn how to use proofing tools, and publish Office documents to the Web.

Prerequisite: None. Co-Requisite: CHEM095L. Day: All; Eve: All. Lecture: 2.5, Lab: 0.

CHEMISTRY (CHEM)

CHEM 0955 Basic Chemistry 3 cr.
Provides a survey of basic chemical knowledge for non-science majors on the scientific method, units and measurements, states of matter, elements, compounds, atomic and molecular structure, chemical bonding, solutions, the periodic table, acids and bases, gases, and nuclear chemistry. Course does not count towards graduation. Prerequisite: None. Co-Requisite: CHEM095L. Day: All; Eve: All. Lecture: 3, Lab: 0.

CHEM 095L Basic Chemistry Lab 1 cr.
Lab portion of CHEM 0955 that provides basic chemical knowledge for non-science majors on states of matter, elements, compounds, atomic and molecular structure, chemical bonds, solutions and the periodic table. Course does not count towards graduation. Prerequisite: None. Co-Requisite: CHEM095S. Day: All, Eve: All. Lecture: 0, Lab: 2.

CHEM 1200 Chemistry Concepts 3 cr.
Designed to be a college level chemistry for non-science majors; delivered in an online format which provides elementary knowledge on: states of matter, elements, compounds, atomic and molecular structure, chemical bonding, solutions, the periodic table, acids/bases and buffers, gas laws, reaction rates and equilibrium, radioactivity and nuclear processes. Prerequisite: MATH 0955. Co-Requisite: None. Online: All. Lecture: 3, Lab: 0.

CHEM 1210 Principles of Chemistry I 3 cr. TM-N
Provides elementary chemistry knowledge for non-science majors on states of matter, elements, compounds, atomic and molecular structure, chemical bonding, solutions and the periodic table, acids, bases & buffers, the Gas Laws, reaction rates & Equilibrium, radioactivity & nuclear processes. Prerequisite: MATH 0955. Co-Requisite: CHEM 121L. Day: All; Eve: All. Lecture: 3, Lab: 0.

CHEM 121L Principles of Chemistry I Lab 1 cr. TM-N
Lab portion of the course that provides elementary chemistry knowledge for non-science, majors on states of matter, elements, compounds, atomic and molecular structure, chemical bonds, solutions and the periodic table. Prerequisite: MATH 0955. Co-Requisite: CHEM 1210.

CHEM 1220 Principles of Chemistry II 3 cr. TM-N
Survey of organic chemistry and biochemistry and their impact upon daily existence. Prerequisite: CHEM 1210 and CHEM 121L or CHEM 1510 and CHEM 151L with "C" or better. Co-Requisite: CHEM 122L. Day: Fa, Sp; Eve: On demand. Lecture: 3, Lab: 0.

CHEM 122L Principles of Chemistry II Lab 1 cr. TM-N

CHEM 1510 Fundamentals of Chemistry I 3 cr. TM-N
This chemistry series is for students majoring in science and related fields. Fundamental chemical concepts covered in the first semester include: atom structure, periodic classification, molecular bonding, stoichiometry, acid-base neutralization, thermochemistry, and gas laws. Critical thinking is stressed through problem solving. Prerequisite: MATH 0955 & HS Chemistry or CHEM 1210 & CHEM 121L with "C" or above. Co-Requisite: CHEM 151L. Day: Fa: Lecture: 3, Lab: 0. TAG: OSC008.

CHEM 151L Fundamentals of Chemistry I Lab 1 cr. TM-N
This chemistry series is for students majoring in science and related fields. General laboratory procedures, emphasizing safety, data analysis and reporting, will be developed through the hands-on laboratory experiments covering fundamental chemical concepts and principles in atomic structure, periodic trends, bonding, stoichiometry, acid-base neutralization, thermochemistry, and gas laws. Prerequisite: MATH 0955 & HS Chemistry or CHEM 1210 & CHEM 121L with "C" or above. Co-Requisite: CHEM 1510. Day: Fa. Lecture: 0, Lab: 3. TAG: OSC008.

CHEM 1520 Fundamentals of Chemistry II 3 cr. TM-N
This chemistry series is for students majoring in science and related fields. Fundamental chemical concepts covered in the second semester include: intermolecular forces, colligative properties, equilibria, kinetics, thermodynamics, and electrochemistry. Prerequisite: CHEM 1510, CHEM 151L with "C" or better. Co-Requisite: CHEM 152L. Day: Sp; Eve: Su. Lecture: 3, Lab: 0. TAG: OSC009.

CHEM 152L Fundamentals of Chemistry II Lab 1 cr. TM-N
This chemistry lab series is for students majoring in science and related fields. General laboratory procedures, emphasizing safety, data analysis and reporting, will be developed through the hands-on laboratory experiments covering fundamental chemical concepts and principles covering intermolecular forces, colligative properties, equilibria, thermodynamics, and electrochemistry.
CRJU 1010 Introduction to Criminal Justice  
3 cr.
This course examines American criminal justice and the systems and procedures developed by society for dealing with crime, law, and justice. Emphasis is on the three major components of the system: police, courts, and corrections. The course also provides an introduction to the major theories of criminal behavior and victimization. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: On demand. Lecture: 3, Lab: 0. TAG: OSS031.

CRJU 1310 Police Operations  
3 cr.
Introduction to basic principles and philosophies of law enforcement organizations. Examination of purposes, methods, techniques, and types of patrol. Overview of support services and analysis of various techniques used in surveillance, narcotics, and vice control. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Su. Lecture: 3, Lab: 0. TAG: OSS032.

CRJU 1510 Corrections in the Criminal Justice System  
3 cr.
Comprehensive overview of corrections practice and theory to include organization and administration of correctional institutions. Examines history and development of corrections, the interrelationship of corrections and the criminal justice system, elements of correctional process, correctional clients, non-institutional corrections systems, and alternatives to incarceration. Emphasis is placed on the role of the correctional officer and on the operation and analysis of current methods of correctional treatment within institutions. Students learn to apply corrections principles and develop interpersonal communication and decision making skills for direct intervention with correctional clients. Prerequisite: None. Co-Requisite: None. Day: Fa on demand; Eve: Fa on demand. Lecture: 3, Lab: 0. TAG: OSS033.

CRJU 1600 Private Security Academy  
6 cr.

CRJU 1601 Firearms Academy  
1 cr.

CRJU 2000 Special Topics-Criminal Justice  
0.5-6 cr.
Correlate to the specific sections of the Ohio Revised Code. Prerequisite: None. Co-Requisite: None.

CRJU 1210 Criminal Investigation  
3 cr.
Fundamental principles and techniques applicable to police investigation from incident to trial. A review of current and evolving technologies and the collection, preservation, and presentation of evidence in a court of law will be presented. Ethical considerations will be addressed. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: On demand. Lecture: 3, Lab: 0.

CHEM 2000 Special Topics-Chemistry  
0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to chemistry. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.
CRJU 2140  Peace Officer Basic Academy (POBA) I  12 cr.
The Peace Officer Training Academy (POBA) is sanctioned under the auspices of the Ohio Attorney General’s Office. Successful completion of the POBA certificate program is mandatory for individuals to become certified Law Enforcement Officers in the State of Ohio. Cadets will learn the basic fundamental skills, aptitudes and attitudes necessary to be a successful peace officer in the State of Ohio. Prerequisite: Admission standards per AG’s office. Co-Requisite: None. Day: Fa. Lecture: 8, Lab: 12. ♦

CRJU 2150  Peace Officer Basic Academy (POBA) II  12 cr.
The Peace Officer Training Academy (POBA) is sanctioned under the auspices of the Ohio Attorney General’s Office. Successful completion of the POBA certificate program is mandatory for individuals to become certified Law Enforcement Officers in the State of Ohio. Cadets will learn the basic fundamental skills, aptitudes and attitudes necessary to be a successful peace officer in the State of Ohio. Continuation of CRJU2140 POBA I Prerequisite: CRJU 2140. Co-Requisite: None. Day: Sp. Lecture: 8, Lab: 12. ♦

CRJU 2210  Criminalistics  3 cr.
Introduces the crime laboratory and techniques of scientific investigation with emphasis on recognition, collection, and preservation of evidence. Develops skills in using scientific equipment to detect and identify blood, hair, and other serology evidence, fingerprints, narcotics, impression and trace evidence, gun shot evidence, hairs, fibers, and soil evidence. Prerequisite: CRJU 1210. Co-Requisite: None. Day: Sp; Eve: On demand. Lecture: 2, Lab: 2. ♦

CRJU 2250  Community Based Corrections  3 cr.
The study of the development, organization, operation, and results of community based corrections practice. The course emphasizes probation, parole, and alternative sentencing options including day-report centers and residential treatment. Prerequisite: None. Co-Requisite: None. Eve: Fa on demand. Lecture: 3, Lab: 0.

CRJU 2530  Criminal Justice Administration  3 cr.
A study of the objectives of criminal justice organizations, to include corrections, courts, and law enforcement. Topics include organizational effectiveness, leadership, communication, morale, records, programs, and evaluation methods of organizations. Prerequisite: CRJU 1310 or CRJU 2510. Co-Requisite: None. Day: Sp; Eve: On demand. Lecture: 3, Lab: 0.

CRJU 2550  Juvenile Justice Procedures  3 cr.
A survey of the nature and causes of delinquent activity by juveniles. Social and psychological factors underlying delinquency are studied. The roles of police, courts, and corrections in the juvenile justice system. Prerequisite: CRJU 1010. Co-Requisite: None. Day: Fa; Eve: On demand. Lecture: 3, Lab: 0.

CRJU 2560  Correctional Counseling and Treatment  3 cr.
Survey of treatment modalities for adult and juvenile offenders. Topics covered include legal issues in treatment, treatment theory, assessments, group and individual counseling processes, and differences between male/female and adult/juvenile populations. Prerequisite: CRJU 1510. Co-Requisite: None. Eve: Sp on demand. Lecture: 3, Lab: 0.

CRJU 2580  Criminal Justice Practicum  1 cr.
Practicum provides the placement of an individual into a criminal justice agency (police, probation, courts, corrections) to observe and participate in its operation. Students will spend 7 hours per week in field work with respective agency. Prerequisite: 15 hours General Education courses and 15 hours of CRJU courses. Co-Requisite: CRJU 2590. Day: Sp, Su; Eve: On demand. Lecture: 0, Lab: 7. ♦

CRJU 2585  Cyber Security and Investigation Practicum  1 cr.
The knowledge and principles acquired in the Cyber Security & Investigation curriculum will be used through direct interaction with an IT Professional Mentor. The student is required to work with an assigned IT professional for 7 hours per week. The college faculty and practicum site mentor work closely to ensure the student a wide range of potential criminal justice procedural and network security experiences. Prerequisite: ELEC 2510 and ELEC 2050. Co-Requisite: DTCS 2810. Day: Sp. Lecture: 0, Lab: 7. ♦

CRJU 2590  Criminal Justice Seminar  1 cr.
Under the direction of the college faculty, the student will participate in a one-hour weekly review and assessment of the work experience as related to the practicum situation. Input from the agency supervisor will be used as an integral part of this weekly review. Prerequisite: 15 hours General Education courses and 15 hours of CRJU courses. Co-Requisite: CRJU 2580. Day: Sp, Su; Eve: On demand. Lecture: 1, Lab: 0.

CRJU 2850  Criminal Justice Careers  2 cr.
Focuses on job search skills, resume writing, current CJ trends, interview techniques, job retention, and career planning. Prerequisite: None. Co-Requisite: None. Day: Fa. Lecture: 2, Lab: 0.

DESIGN DRAFTING (DRFT)

DRFT 1410  Computer Aided Drafting I  4 cr.
Students will learn the basics of using a computer aided drafting system for two-dimensional drawing. Assignments will
include creating, editing, dimensioning, and plotting drawings using AutoCAD software and employing functions to make the productivity of the process. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa, Sp. Lecture: 2, Lab: 4.

**DRFT 1430 Advanced CAD** 3 cr.
A class designed to take a basic AutoCAD user to a higher level of understanding and skill. Topics include drawing productivity functions, three-dimensional modeling, presentation and customization. Prerequisite: DRFT 1410 or ENGR 1010. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 2, Lab: 2.

**DRFT 1510 Design Drafting I** 3 cr.
Introduction to basic concepts of mechanical drafting with emphasis placed on graphic language, lettering, geometric constructions, sketching, dimensioning, multi-view projection, pictorials and shape and true-size descriptions; solving problems involving points, lines, and planes; use of professional equipment. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 1, Lab: 5.

**DRFT 1560 Structural Drafting** 3 cr.
Foundations, form and concrete work; structural timber, reinforced concrete, and structural steel frames; floor systems; industrial floors; roof systems; industrial roofing; masonry construction; curtain wall construction; building insulation. Prerequisite: DRFT 1410 or ENGR 1010. Co-Requisite: None. Day: Sp; Eve: On demand. Lecture: 1, Lab: 5.

**DRFT 2000 Special Topics-Drafting** 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) in drafting technology. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

**DRFT 2530 Engineering Drafting** 3 cr.
In depth studies in engineering applications and drawing practices of geometric tolerancing, threads and fasteners, gears, electrical and welding symbology, wiring and PNID diagrams. Students apply designs through parametric design software to show the results professionally with computer models and working drawings. May be offered in a blended classroom/online format. Prerequisite: DRFT 1410 or ENGR 1010. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 1, Lab: 5. TAG: OET012

**DRFT 2610 Civil Drafting** 3 cr.
Basic principles of surveying including actual field work utilizing modern surveying equipment including the transit, tape, and stadia rod, EDM, and total station. Calculations connected with this work will be explained and problems will be solved simulating everyday boundary survey work. Prerequisite: DRFT 1410 or ENGR 1010. Co-Requisite: None. Day: Sp. Lecture: 1, Lab: 5. TAG: OET015.

**DRFT 2800 Drafting Capstone Seminar** 3 cr.
In depth studies of specific topics pertinent to the design drafting field and preparation to join the job market. Students will participate in an industry-related project and report on the activity with a presentation. Resume and portfolio development and interview techniques are discussed. Prerequisite: DRFT 1430 and SPCH 1510. Co-Requisite: None. Day: Sp; Eve: On demand. Lecture: 2, Lab: 2.

**DIESEL TRUCK SYSTEMS (TRCK)**

**TRCK 1100 Introduction to Truck Systems** 3 cr.
Perform minor maintenance and service, such as lubrication, replacing simple components and correcting defects on heavy and medium duty trucks. Includes the study of brakes, clutch, and electrical systems. Hands on training with an emphasis on shop and trade safety procedures. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 2, Lab: 2.

**TRCK 1110 Medium and Heavy Brakes** 3 cr.
Students will be introduced to basic brake systems, terminology, components, and theory of operation. Medium and heavy air and hydraulic brakes systems are covered including: service and emergency systems, disc, wedge and cam foundation brakes. Major antilock braking systems are discussed including service and diagnostics procedures. Basic industrial hydraulics systems for mobile applications are covered including: principles of operation, parts identification, and preventative maintenance. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 2, Lab: 2.

**TRCK 1120 Medium and Heavy Truck Chassis** 3 cr.
This course of training consists of the theory, service, and repair of on-road medium and heavy truck and trailer chassis. Steering, suspension, and tire/wheel configurations are covered as are the associated geometry and alignment for both truck and trailers. Theory and operation of fifth wheels and coupling system are discussed including service and repair. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 2, Lab: 2.

**TRCK 1130 Medium and Heavy Truck Chassis** 3 cr.
Introduction to basic diesel engine designs, terminology, subsystems, components, and theory of operation. Labs: will emphasize proper use of tools, application of appropriate safety and environmental procedures, and the development of professional work standards in a group shop environment. Engines will be disassembled, cleaned, inspected for reusability of parts, reassembled, and tested. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 2, Lab: 2.
TRCK 2000  Special Topics-Diesel Truck Systems  0.5-6 cr.
By permission only. In-depth study of a specific topic pertaining to diesel truck systems. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

TRCK 2110  Diesel Fuel Systems & Hydraulics  3 cr.
A study of the primary hydromechanical fuel management systems and subsystems used by the diesel industry. Theory of operation, nomenclature, maintenance procedures. Mobile hydraulic systems, associated components, and theories of operation are covered also. Labs will provide hands-on disassembly, inspection, and calibration of diesel fuel injection systems; and applied hydraulic experiments. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 2, Lab: 2. ♦

TRCK 2120  Diesel Truck Drive Trains  3 cr.

TRCK 2130  Electronic Diesel Engines  3 cr.

TRCK 2140  Practicum TRCK/AUTO  2 cr.
Supervised training in the automotive or diesel industry. Students will be mentored 7 hours per week for 15 weeks at an established automotive/diesel service or parts business. Requires weekly journal entries for successful completion of course. Capstone Practicum. Prerequisite: 27 credits TRCK/AUTO courses. Co-Requisite: None. Day: Sp; Eve: On demand. Lecture: 1, Lab: 7. ♦

TRCK 2150  ASE Technician Preparation  3 cr.
This course is intended for automotive or diesel truck systems majors who are preparing to take one or more ASE (Automotive Service Excellence) examinations. Combined refresher materials with an abundance of sample test questions that relate to each competency required for certification by ASE. Labs with hands-on operations and the appropriate ASE task check off sheets will be used to put together a portfolio. Prerequisite: 27 credits TRCK/AUTO courses. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 2, Lab: 2. ♦

DTGR 1200  Color Theory  3 cr.
To provide the student an opportunity to thoroughly understand and apply color to any branch of art or design. Learn what is the nature of color and what are its “parts” and traits. And devise, explore, refine, and implement effective color designs. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Su. Lecture: 2, Lab: 2. ♦

DTGR 1550  Interface Design  3 cr.
Designing interfaces for multimedia, Web, and software applications. Explore different types of interfaces used in web, game, and software applications. Organize an interface using tools provided creating meaningful progression for the user. Using the user centered approach to design. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp on demand. Lecture: 2, Lab: 2. ♦

DTGR 1600  Adobe Illustrator  3 cr.

DTGR 1700  3D Graphics  3 cr.
Use computer modeling to create 3D graphics using 3D Studio Mix. Learn basic rendering techniques and lighting to create photorealistic images. Learn the basics of animation using the curve editor. Learn the basics of texturing and UV mapping using the texture node editor. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 2, Lab: 2. ♦

DTGR 2000  Special Topics-Computer Graphics  0.5-6 cr.
By permission only. In-depth study of a specific topic pertinent to computer graphics technology. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.
COURSE CATALOG

DTGR 2100  3D Animation  3 cr.
Learn 3D Modeling and animation tools including sculpting, spline modeling, patch modeling and digital lighting. Learn how to create Animation Rigs for Biped and Quadrupeds. Learn how to work with Animation Curves. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: On demand. Lecture: 2, Lab: 2.

DTGR 2120 Computer Graphics Digital Marketing  3 cr.
Students will use a variety of current social media sites to create effective and cohesive social media marketing campaigns. Students will use current software to analyze the effectiveness of these social media campaigns, and determine user behavior on websites. Students will use a web content management system to create original content to drive the social media campaigns created. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: On demand. Lecture: 2, Lab: 2.

DTGR 2150 Maya Fundamentals  3 cr.
This course is designed to help students understand simulation and event modeling as they relate to software development for games and other types of software. Using software to build 3D models and skeletal structures for use in video games and animation. Creating and modifying polygons, vertices, faces, and splines. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: On demand. Lecture: 2, Lab: 2.

DTGR 2200 Advanced Maya  3 cr.
The focus of this course is on how to understand simulation and event modeling as they relate to software development for games and other types of software. This course will build on knowledge from Maya Fundamentals to help students add special effects and particle effects to their work. Work on UV Mapping, Rendering, and Lighting. Prerequisite: DTGR 2150. Co-Requisite: None. Day: Fa; Eve: On demand. Lecture: 2, Lab: 2.

DTGR 2620 Adobe Photoshop  3 cr.

DTGR 2750 Adobe Indesign  3 cr.
Covers the page layout software Adobe Indesign to prepare the students for Adobe Certification. Students will learn to lay out marketing and business media using proper design basics. Prerequisite: DTGR 2620 or OAST 2210. Co-Requisite: None. Day: Fa. Lecture: 2, Lab: 2.

DTGR 2800 Introduction to ZBrush  3 cr.
Learn the use of an industry standard modeling program called ZBrush to create realistic looking 3D Models for Film and Game Design. Includes modeling basics as well as lighting, texturing, and shaders. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Fa. Lecture: 2, Lab: 2.

DTGR 2850 Adobe Flash  3 cr.
Interactive application development for media rich projects that run on the web, on the desktop and on mobile devices. Includes creating animations, using special effects, drawing objects, incorporating sound and video and an introduction to programming in ActionScript. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: On demand. Lecture: 2, Lab: 2.

DTGR 2960 Computer Graphics Practicum  1 cr.
The knowledge and principles acquired in the Computer Graphics curriculum will be used through direct interaction with a graphics professional mentor. The student will be required to work with an assigned graphics professional for 7 hours per week. The college faculty and practicum site mentor work closely to ensure the student receives a wide range of graphics creations and publishing experiences. Prerequisite: DTGR 2620, DTGR 2750, and DTGR 1600 with a grade of “C” or better. Co-Requisite: DTGR 2970. Day: Sp. Lecture: 0, Lab: 7.

DTGR 2970 Computer Graphics Seminar  1 cr.
This course allows students to use all the skills acquired in the Digital Technology Graphics major. Concentrates on the interpersonal relationships existing in the work environment. Students will have the opportunity to discuss/evaluate their experiences in the Computer Graphics Practicum. Students will share their insights with each other. Prerequisite: DTGR 2620, DTGR 2750 and DTGR 1600 with a grade of “C” or better. Co-Requisite: DTGR 2960. Day: Sp. Lecture: 1, Lab: 0.

DIGITAL TECHNOLOGY-COMPUTER SUPPORT (DTCS)

For other Computer Support Technician courses see Electronics (ELEC)

DTCS 1005 Computer Support Internship  1-3 cr.
The internship experience provides credit opportunity for a paid placement of an individual in an information technology company, organization, department, etc. as a field or co-operative work experience. The students will spend a minimum of 7 hours per week, for the 15 week semester, in field work with the respective site placement for each credit pursued. The student will participate in a co-requisite weekly seminar related to the internship. Prerequisite: 12 completed hours of General Education, 6 completed hours of Computer Support, ELEC 2050, and ELEC 2510. Co-Requisite: DTCS 2810. Day: Sp On Demand. Lecture: 0, Lab: 7-21.
DTCS 1010  Introduction to Digital Technology  1 cr.
A survey course of Digital Technology, and the Digital Technology majors, which includes Graphics, and Computer Support Technician. An introductory topic for each major will be presented by key faculty. Hands-on exercises will be incorporated. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Sp. Lecture: 1, Lab: 0. ♦

DTCS 1230  O/S Concepts and Customizing  3 cr.
An introduction to mainstream operating systems, focusing on Windows and Linux versions. Course covers the purpose, function, and concepts of an operating system including customizing, trouble shooting, back-ups, network configuration, printing, user configurations, etc. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Sp. Lecture: 3, Lab: 0. ♦

DTCS 2000  Special Topics-Computer Support  0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to computer support technology. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

DTCS 2100  Database Management  3 cr.
An introduction to database theory and methodology with practical use of a SQL-based database. Projects will include building and interrogating small databases. Prominent database applications will be studied. Prerequisite: BUSM 1600. Co-Requisite: None. Day: Fa; Eve: Sp. Lecture: 2, Lab: 2. ♦

DTCS 2550  Network Administration  3 cr.
This course covers effective network management, with an emphasis on Windows Server 2008 and 2012. Topics include network file system design, active directory configuration, DNS, DHCP, security, group policy, login scripts, printing, email, backup, and a variety of advanced topics. Prerequisite: ELEC 1950. Co-Requisite: None. Day: Fa; Eve: On demand; Lecture: 2, Lab: 2. ♦

DTCS 2650  Internet and Web Design  3 cr.
Course starts with students working in a plain text editor such as Eclipse learning XHTML and CSS coding and then introduces techniques used in GUI editors such as Dreamweaver. Topics covered include XHTML coding, cascading style sheets, tables, layers, frames, forms, graphics usage, code validation and security issues. Students are introduced to using server-side scripts to create interactive web pages. Student web hosting accounts are provided for each student for the duration of the course. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Sp odd yrs. Lecture: 2, Lab: 2. ♦

DTCS 2800  Computer Repair & Diagnostic Practicum  3 cr.
The knowledge and principles acquired in the Computer Support Technician curriculum will be used through direct interaction with an IT Professional Mentor. The student is required to work with an assigned IT professional for 21 hours per week. The college faculty and practicum site mentor work closely to ensure the student a wide range of repair/troubleshooting and networking experiences. Prerequisite: ELEC 2510. Co-Requisite: DTCS 2810. Day: Sp; Eve: On demand. Lecture: 0, Lab: 21. ♦

DTCS 2810  Capstone Seminar: Computer Support Technician  1 cr.
Capstone course allows students to use all the skills acquired in the Computer Support Technician Major. Concentrates on the interpersonal relationships existing in the work environment. Students will have the opportunity to discuss/evaluate their experiences in the DTCS 2800 Computer Support Technician Practicum. Students will share their insights with each other. Prerequisite: ELEC 2510. Co-Requisite: DTCS 2800. Day: Sp; Eve: On demand. Lecture: 1, Lab: 0. ♦

DIGITAL TECHNOLOGY-DIGITAL MEDIA (DTME)

DTME 1000  Survey of Digital Media  3 cr.
The course provides an overview of the historical development of America's mass media. The course will look at how mass media have influenced and shaped American history. The course will study mass media's contributions to society, as well as its failure to respond appropriately at critical times in history. The goal is to have an understanding of how the mass media came to be the institution it is today and what we might expect in the future. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: On demand; Online: On demand. Lecture: 3, Lab: 0. ♦

DTME 1300  Video Production I  3 cr.
An introductory course studying the basics concepts, theories and terminology of producing visually based productions for broadcast and web site environments. Topics include the production process, broadcast equipment application, lighting for video, audio for video, introduction to non-linear editing, working with talent and writing for video. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: On demand; Online: On demand. Lecture: 2, Lab: 2. ♦

DTME 1310  Video Production II  3 cr.
This course is a continuation of study for DTME 1300. This course will consolidate practices and theories learned in DTME 1300 and introduce advanced nonlinear editing techniques & supervision of a visually based project. Students will employ proper skills needed to produce, direct, script & manage original video/audio projects for a variety of applications including broadcast & web. Students will produce an original creative video. Prerequisite: DTME 1300. Co-Requisite: None. Day: Sp; Eve: On demand; Online: On demand. Lecture: 2, Lab: 2. ♦
DTME 1320  Audio Production  3 cr.
This is an introduction to audio production for radio, video, film and music recording, including principles, equipment, preproduction, production, and post-production. The purpose of this course is to provide an understanding of audio production as a medium of communication, as well as to familiarize the student with the terminology, facilities, and processes of audio production. Prerequisite: DTME 1300. Co-Requisite: None. Day: Fa; Eve: On demand; Online: On demand. Lecture: 2, Lab: 2.

DTME 1330  Digital Video Effects  3 cr.
Course covers aspects of manipulating digital imagery and video for special effects. Topics include image and video representation, digital workflow, lighting, rendering, compositing mixed environments (live and CO), morphing, particle effects, dynamics, camera properties, image tracking and filters. Students will concentrate on planning, story-boarding, and producing short movies that apply special effects. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: On demand; Online: On demand. Lecture: 2, Lab: 2.

DTME 1340  Lighting for Video  3 cr.
Lighting emphasizes professional procedures and protocol relevant to the film, TV, and internet broadcast industries. Students work with industry standard lighting and grip equipment and are trained in the safe use of electricity and power distribution. This course also covers the basics of color correction and camera filtration using tungsten, fluorescent, and HMI sources. Special emphasis is placed on using scripts as the main guide for lighting design. Prerequisite: DTME 1300. Co-Requisite: None. Day: Fa; Eve: On demand; Online: On demand. Lecture: 2, Lab: 2.

DTME 1400  Media Management  3 cr.
This course focuses on management of mass media organizations. This includes print, broadcasting, & general communication organizations. Discussion will include the production, content, and distribution aspects of media, with a focus on how revenues and profits are achieved. Students will also explore media regulation, media law and possible “effects” of media on individuals and society. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: On demand; Online: On demand. Lecture: 3, Lab: 0.

DTME 1410  Digital Movie Making  3 cr.
Digital Movie Making will explore the world of small budget independent filmmaking. Course will discuss Visual Psychology, creative techniques for effective imaging, characteristics of light, lensing & lighting, digital visual effects, continuity, short film & documentary production. Prerequisite: DTME 1300. Co-Requisite: None. Day: Fa; Eve: On demand; Online: On demand. Lecture: 2, Lab: 2.

DTME 1420  Broadcast Journalism  3 cr.
This course will explore the concepts and techniques for producing broadcast journalism segments for broadcast and web applications. Students will be introduced to electronic news gathering, news writing, on-air reporting and editing. Students will write, report, & produce projects for television, radio, & internet applications. Students will report for WSCC-TV 22. Prerequisite: DTME 1300. Co-Requisite: None. Day: Sp; Eve: On demand; Online: On demand. Lecture: 2, Lab: 2.

DTME 1430  Capstone Portfolio  3 cr.
This course is an advanced level course to prepare the student to enter the workforce as a Media Professional. The course will include resume writing, production of visually based demo, networking skills, job interview skills, writing samples, and 96 hrs of approved internship. The course will reflect the Digital Media curriculum. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: On demand; Online: On demand. Lecture: 3, Lab: 0.

DTME 2000  Special Topics-Digital Media  0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to digital media technology. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

DIGITAL TECHNOLOGY-INTERACTIVE GAME DESIGN (DTIN)

DTIN 1500  Introduction to Game Design & Development  3 cr.
Introduces game development through the use of game engines. Elements of designing a game including character development, weaponry, scoring, scenery, modeling and sound effects are covered. Image manipulation, sound, music, objects, sprites, events, actions, active objects, 2-D and 3-D concepts are explored. Students create games using game engines. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Sp on demand. Lecture: 2, Lab: 2.

DTIN 2000  Special Topics-Interactive  0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to computer interactive technology. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

DTIN 2400  IOS Application Development  3 cr.
Create engaging app for current technology for mobile phones and tablets using the IOS SDK. Learn how to access the advanced tools for interactivity including the accelerometer and multi gesture touch screen. Prerequisite: DTWP 2600. Co-Requisite: None. Day: Sp; Eve: Fa on demand. Lecture: 2, Lab: 2.
DTIN 2960  Capstone: Interactive/Game Design  3 cr.
Designing a game concept from scratch and designing a working prototype. This class will revisit topics used throughout the program including: prototyping, scriptwriting, storyboarding, animation, 3D modeling, lighting, etc. Prerequisite: DTIN 2200. Co-Requisite: None. Day: Sp; Eve: Sp on demand. Lecture: 2, Lab: 2. ♦

DIGITAL TECHNOLOGY-WEB APPLICATION PROGRAMMING (DTWP)

DTWP 1200  Programming Logic and Problem Solving  3 cr.
A first course in programming where students are exposed to basic programming concepts and use Python to illustrate fundamental principles of design and programming that apply in any language. Emphasizes problem-solving and includes coverage of computer graphics and object-oriented concepts. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Sp odd yrs. Lecture: 2, Lab: 2. ♦

DTWP 1300  Introduction to PHP  3 cr.

DTWP 2000  Special Topics-WEB Programming  0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to web programming technology. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

DTWP 2110  MySQL Database Design & Programming 3 cr.
The study of an open source relational database management system (RDBMS). Students use Structured Query Language (SQL) and PHP to interact with and design database solutions for web applications. Students get hands-on experience in the classroom. Prerequisite: DTWP 1300. Co-Requisite: None. Day: Sp; Eve: On demand. Lecture: 2, Lab: 2. ♦

DTWP 2320  JavaScript  3 cr.

DTWP 2510  Java Programming  3 cr.
Introduces Java, a pure object-oriented language and a language of the World Wide Web. Students apply object-oriented concepts to develop real-world programs. Uses incremental development technique to show how to develop programs from the bottom up. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Su. Lecture: 2, Lab: 2. ♦

DTWP 2600 .NET Programming  3 cr.
A study of fundamental design tenets for .NET programming. Introduction to Microsoft’s C# and VB languages. Programs will incorporate object-oriented code using encapsulation, inheritance, and polymorphism. Students will create high-performance applications of all types-Web forms, Window forms, and Web services to solutions for MS SQL Server, using the .NET framework. Students will get hands-on experience in the classroom. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Su. Lecture: 2, Lab: 2. ♦

DTWP 2910  Capstone: Web Programming  3 cr.
Configuration, and administration of Web servers in both developmental and production environments. Students design, program, and debug a 3-tier Web application. Prerequisite: DTWP 2110. Co-Requisite: None. Day: Sp; Eve: On demand. Lecture: 2, Lab: 2. ♦

EARLY CHILDHOOD DEVELOPMENT TECHNOLOGY (ECDV)

ECDV 1100  Creative Learning Environments  3 cr.
This course focuses on the social, emotional, cognitive, and physical growth and development of the preschool child through creative play. Theories of play and its role in development as well as incorporating creative materials into the early childhood program will be discussed. Optimal indoor and outdoor environments will be examined. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp odd yrs. Lecture: 3, Lab: 0.

ECDV 1120  Principles of Positive Child Guidance  3 cr.
This course presents different guidance and discipline techniques that the early childhood professional can use to guide the young child to develop self-control, conflict resolution and problem solving skills. Emphasis is on the role of the professional in providing an environment that encourages the development of pro-social behaviors. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp odd yrs. Lecture: 3, Lab: 0.

ECDV 1130  Health, Safety and Nutrition  3 cr.
This course provides training for teachers of young children in the procedures of CPR, first aid for injuries, and management of symptoms of childhood communicable diseases. Training is provided in recognizing child abuse and neglect including physical and behavioral indicators of child maltreatment and reporting concerns. This course
also emphasizes the nutritional needs of young children and the planning of nutritious meals in child centers. After successful completion of the course, students will obtain the certification needed to meet the requirements of the Ohio Dept. of Job and Family Services Licensing Rules.  

**Prerequisite:** None.  
**Co-Requisite:** None.  
**Day:** Sp; Eve: On demand.  
**Lecture:** 3, Lab: 0.

**ECDV 2000 Special Topics-Early Childhood Technology**  
0.5-6 cr.

*By permission only. In-depth study of a specific topic(s) pertinent to early childhood technology. May be repeated.*  
**Prerequisite:** Permission.  
**Co-Requisite:** None.  
**Day:** On demand; Eve: On demand.  
**Lecture:** TBD, Lab: TBD.

**ECDV 2110 Integrated Curriculum**  
3 cr.

*This course focuses on developing goals and objectives and planning learning experiences for preschoolers with an emphasis on the Math and Science content areas. The course uses an emergent curriculum approach to planning with connection to the Ohio Department of Education Early Learning Content Standards. The Project Approach teaching and the Multicultural Creative Curriculum will be studied. Students will design math and science activities and implement them in an approved child-center experience.  
**Prerequisite:** ECDV 1100.  
**Co-Requisite:** None.  
**Day:** Fa; Eve: Fa even yrs.  
**Lecture:** 3, Lab: 0.

**ECDV 2120 Infant and Toddler Development**  
3 cr.

*This course focuses on the developmental domains of children from birth to three years of age, providing a study of designing safe, supportive, and nurturing environments for infants and toddlers. Students will design, implement, and evaluate developmentally appropriate experiences for infants and toddlers. The teacher’s role in the nurturing environment is an important part of the course.  
**Prerequisite:** None.  
**Co-Requisite:** None.  
**Day:** Sp; Eve: Sp odd yrs.  
**Lecture:** 3, Lab: 0.

**ECDV 2200 Literacy and Language Arts**  
3 cr.

*This course will focus on young children’s emergent literacy development. Emphasis will be given to planning the curriculum and preparing environments that support children’s literacy learning. Choosing children’s quality literature and developmentally appropriate language and literacy experiences will be presented.  
**Prerequisite:** None.  
**Co-Requisite:** None.  
**Day:** Fa; Eve: Fa even yrs.  
**Lecture:** 3, Lab: 0.  
* 

**ECDV 2210 Art, Music and Movement**  
3 cr.

*This course focused on a developmentally appropriate program in art, music, and movement that fosters the creative and aesthetic development of young children. Students will have hands on experience with an extensive variety of art materials and actual involvement with music and movement activities.  
**Prerequisite:** None.  
**Co-Requisite:** None.  
**Day:** Sp; Eve: Sp even yrs.  
**Lecture:** 3, Lab: 0.  
* 

**ECDV 2400 Observation and Assessment**  
3 cr.

*This course focuses on developing observation and documentation skills for the early childhood professional. It includes using assessment tools, examining standardized tests, documenting children’s progress, and basic data collection techniques. Discusses how to interpret observational findings as they relate to planning environments and curriculum for young children.  
**Prerequisite:** ECDV 1020.  
**Co-Requisite:** None.  
**Day:** Sp; Eve: Sp odd yrs.  
**Lecture:** 3, Lab: 0.

**ECDV 2500 Administration of Early Childhood Programs**  
3 cr.

*This course focuses on the skills and information needed to develop and operate a high quality child center. Examines policy and program development, communicating with families, and licensing and accreditation standards for child centers. Concentration on the role of the early childhood professional in child centers such as classroom environments, selecting and evaluating material, staff development, ethics, and advocacy.  
**Prerequisite:** None.  
**Co-Requisite:** None.  
**Day:** Sp; Eve: Sp odd yrs.  
**Lecture:** 3, Lab: 0.

**ECDV 2600 ECDV Practicum and Seminar**  
2 cr.

*This course provides students in the ECDV program the opportunity to apply the knowledge, skills, and dispositions acquired in ECDV coursework. The student is placed in an early childhood program for hands-on experience with young children ages 3-5. The practicum requires the student to be in the classroom 7 hours a week for the entire semester. A one-hour seminar is required and focuses on the actual practicum experience and topics as they relate to the early childhood profession. An FBI and BCI background check is required.  
**Prerequisite:** 9 hours of general education courses and 15 hours ECDV courses.  
**Co-Requisite:** None.  
**Day:** All.  
**Lecture:** 1, Lab: 7.  
* 

**ECDV 2620 Student Teaching and Seminar**  
2 cr.

*This course provides candidates in the ECDV program the final opportunity to apply the knowledge, skills, and dispositions acquired in the coursework presented in the associate degree program. The candidate is placed in an early childhood program for actual teaching experience with young children ages 3-5. Student teaching requires the candidate to be in the classroom 10 hours a week for the entire semester. A one-hour seminar is required and focuses on the actual student teaching experience and topics as they relate to the early childhood profession. The professional early childhood portfolio will be completed. An FBI and BCI background check is required.  
**Prerequisite:** Successful completion of ECDV 2600.  
**Co-Requisite:** None.  
**Day:** All.  
**Lecture:** 1, Lab: 10.  
* 

**ECONOMICS (ECON)**

**ECON 2000 Special Topics-Economics**  
0.5-6 cr.

*By permission only. In-depth study of a specific topic(s)*
pertinent to economics. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

ECON 2120 Principles of Macroeconomics 3 cr. TM-S Introduction to American capitalism: basic economic concepts including, national income analysis, employment theory, inflation, the business cycle, price level, fiscal policy, federal budget deficit, the role of money, the institutions and function of the American banking system, the Federal Reserve, monetary policy, comparative advantage, and Gross Domestic Product. Prerequisite: None. Co-Requisite: None. Day: Fa, Su; Eve: Sp. Lecture: 3, Lab: 0. TAG: OSS005. ♦

ECON 212H Principles of Macroeconomics Honors 3 cr. TM-S Introduction to American capitalism: basic economics concepts including, national income analysis, employment theory, inflation, the business cycle, price level, fiscal policy, federal budget deficit, the role of money, the institutions and function of American banking system, the Federal Reserve, monetary policy, comparative advantage, and Gross Domestic Product. This is a special course because it is designed especially for honors students and combines the foundational content elements of an introductory economics course with the higher order analytic challenges of a more advanced economic issues and policy class. Prerequisite: honors program acceptance. Co-Requisite: None. Day: Fa. Lecture: 3, Lab: 0. TAG: OSS005. ♦

ECON 2130 Principles of Microeconomics 3 cr. TM-S Study of the following microeconomic topics: opportunity cost, production possibilities frontier, supply and demand analysis, supply and demand elasticity, price determination, profit maximization, cost analysis, wage determination, imperfect market structures, antitrust and government deregulation of industry. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Fa; Online: Su. Lecture: 3, Lab: 0. TAG: OSS004. ♦

ECON 2400 Economics for Technologies & Engineers 3 cr. A comprehensive introduction to engineering and industrial economics. Course includes concepts in economic decision making; cash flow analysis; time value of money; perform risk analysis; replacement and timing decisions; depreciation; the impact of uncertainty on decision making. Prerequisite: MATH 2130. Co-Requisite: None. Day: Sp; Eve: Su. Lecture: 3, Lab: 0. TAG: 0ES005. ♦

EDUC 1000 Introduction to Education 3 cr. Introduction to the teaching profession and college education program. Study revolves around six themes: standards-based education, professionalization, diversity, democratic issues, curriculum and instruction, and legal and organizational issues. These themes will be examined through selected readings and field experiences. Professional portfolios will be started and transfer options discussed. Includes 10 hours of integrated field exercises in the local schools. Documentation of clear FBI/BCI background check required. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp; Eve: Fa. Lecture: 3, Lab: 0. TAG: OED001.

EDUC 1020 Early Childhood Development 3 cr. This course focuses on applying knowledge of the characteristics and needs of young children, from conception through age eight, for the creation of healthy, respectful, supportive, challenging, and effective learning environments. It includes examining multiple and interrelated influences on the development and learning of young children. Prerequisite: None. Co-Requisite: None. Day: Sp. Lecture: 3, Lab: 0.

EDUC 1400 Introduction to Instructional Planning 2 cr. Familiarizes pre-service teachers with a systematic approach to the development of effective lesson plans. Covers identification of instructional goals and objectives; selection of instructional strategies and activities; consideration of appropriate classroom management systems; creating and using assessment tools; and evaluation and revision of plans. Students develop a variety of lesson plans and learn to incorporate variations to accommodate diverse learners. Prerequisite: EDUC 1000. Co-Requisite: None. Day: Sp; Eve: On demand. Lecture: 2, Lab: 0.

EDUC 1510 Early Childhood Education Seminar and Field Work 1 cr. Classroom observation for students preparing to enter the teaching profession. Students must attend a seminar on campus and complete 40 hours of field work. Students must clear an FBI/BCI background check to participate. Students gain knowledge and experience necessary for initial understanding of concepts and practices presented in education courses. Prerequisite: EDUC 1000. Co-Requisite: None. Day: Fa, Sp. Lecture: 1, Lab: 0. ♦

EDUC 1530 Middle Childhood Education Seminar and Field Work 1 cr. Classroom observation for students preparing to enter the teaching profession. Students must attend a seminar on campus and complete 40 hours of field work. Students must clear an FBI/BCI background check to participate. Students gain knowledge and experience necessary for initial understanding of concepts and practices presented in education courses. Prerequisite: EDUC 1000. Co-Requisite: None. Day: Fa, Sp. Lecture: 1, Lab: 0. ♦

EDUC 1550 Young Adult Education Seminar and Field Work 1 cr. Classroom observation for students preparing to enter the teaching profession. Students must attend a seminar on
EDUC 1700 Educational Technology 3 cr.
Introduces varied uses of the computer and technology in classrooms. Material covered includes integration of computers into the curriculum and record-keeping assistance; hardware and software selection criteria; and offers opportunity to use several popular software packages. Assists pre-service teachers in meeting ISTE standards (NETS). Includes laboratory and project work. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp. Lecture: 1, Lab: 0.

EDUC 1800 Online Instructional Strategies 3 cr.
This course focuses on the effective ways of integrating technology and instructional strategies to build and deliver online and blended courses at Washington State Community College. It introduces the various academic technologies used by WSCC, including the Sakai learning management system. The course will address topics such as teaching with technology, academic integrity and FERPA. Quality of online content will be discussed within the context of Quality Matters Rubric standards for online and blended course design. Participants will learn how to manage time for efficient delivery of a course and learn how to distinguish between quality of content and quality of delivery in an online and blended course. Prerequisite: None. Co-Requisite: None. Online: All. Lecture: 3, Lab: 0.

EDUC 2000 Special Topics-Education 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to education. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

EDUC 2100 Exceptional Learners 3 cr.
This study of people with special needs and exceptionalities includes information on inclusion and differentiated school programming with emphasis on understanding their needs and behaviors. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp; Eve: Fa. Lecture: 3, Lab: 0. TAG: OED004.

EDUC 2110 Exceptional Learners Education Seminar and Field Work 1 cr.
Classroom observation for students preparing to enter the teaching profession. Students must attend a seminar on campus and complete 40 hours of field work. Students must clear an FBI/BCI background check to participate. Students gain knowledge and experience necessary for initial understanding of concepts and practices presented in education courses. Prerequisite: EDUC 1000. Co-Requisite: None. Day: Fa, Sp. Lecture: 1, Lab: 0.

EDUC 2300 Families, Communities, and Schools 3 cr.
This course explores educational considerations for teachers including the policies, theories, practices, skills, and knowledge of home, school, and community partnerships. Students will examine: the multiple influences on the whole child; accessibility of community services and supports; ethical, practical, and culturally competent decisions to foster family engagement; knowledge and skills needed to address family structure, socio-cultural and linguistic backgrounds, identities and customs, and advocacy for children and families. Prerequisite: None. Co-Requisite: None. Day: Sp. Lecture: 3, Lab: 0.

EDUC 2400 Multicultural Education 3 cr.
Examination of the social, political, and economic context of schooling as it affects diverse learners and their ability to succeed. Emphasis is on the teacher's role in providing an equitable, just, and supportive learning environment for all students. Includes at least one field experience in a school with cultural, racial, and/or ethnic diversity. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp. Lecture: 3, Lab: 0.

EDUC 2950 Education Capstone: Foundations of the Profession 1 cr.
To be taken as the Education Transfer student is completing associate degree requirements. The course will focus on professionalism and finalization of transfer plans. Additionally, the course will highlight current events in education, student achievement, curriculum and instruction, and school government and finance. Educational issues regarding curriculum choice, diversity and social justice will also be explored. Prerequisite: EDUC 2110. Co-Requisite: None. Day: Fa, Sp. Lecture: 1, Lab: 0.

ELECTRICAL ENGINEERING TECHNOLOGY (ELET)

ELET 1000 Internship 1-6 cr.
Provides the opportunity to put classroom knowledge to practical use. Student's position is selected and/or approved by the college; student is evaluated periodically by the organization and is supervised by a college instructor/coordinator. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

ELET 1110 DC Circuits 3 cr.
Comprehensive study of DC electricity with emphasis on basic electrical concepts such as atomic structure, electron theory, current, voltage, resistance, conductance, Ohm's Law, electrical energy and power, Kirchhoff's voltage and current laws, series, parallel, series-parallel circuits, network theorems, capacitance, inductance, time constants, and magnetic circuits. Prerequisite: None. Co-Requisite: MATH 0955. Day: Fa. Lecture: 1, Lab: 6. TAG: OET001.
ELET 1130 AC Circuits 3 cr.
Extensive study of AC Fundamentals emphasizing frequency, reactance, series, parallel, and series-parallel impedances, voltage, current, Ohm’s Law, Kirchoff’s voltage and current Laws, AC power, network theorems, resonance, complex power, circuit analysis in time and frequency domains, phase angle, phasor diagrams, transformers, coupled circuits, and polyphase systems. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: On demand. Lecture: 2, Lab: 3. ♦

ELET 1310 Digital I 4 cr.

ELET 1330 Digital II 3 cr.

ELET 1350 Digital Electronics I 3 cr.
The first of two courses in applied logic that encompasses the application of electronic circuits and devices. Computer simulation software is used to design and test digital circuitry prior to the actual construction of circuits and devices. Prerequisite: None. Co-Requisite: None. Day: Fa. Lecture: 2, Lab: 3. ♦

ELET 1370 Digital Electronics II 3 cr.
The second of two courses in applied logic that encompasses the application of electronic circuits and devices. Computer simulation software is used to design and test digital circuitry prior to the actual construction of circuits and devices. Prerequisite: ELET 1350. Co-Requisite: None. Day: Sp; Lecture: 2, Lab: 3. ♦

ELET 2000 Special Topics-Electrical Engineering 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to electrical engineering technology. May be repeated. Prerequisite: Permission. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

ELET 2110 Rotating Machinery 3 cr.
Emphasis on DC and AC equipment and machinery; includes armature and field windings of generators and motors, controls, parallel generator operation, speed regulation, efficiency, losses, transformers, and polyphase systems. Prerequisite: None. Co-Requisite: ELET 1130. Day: Fa; Eve: On demand. Lecture: 2, Lab: 3. ♦

ELET 2130 P&I Drawings and Motor Control 2 cr.

ELET 2210 Electronics I 4 cr.
Semiconductor theory, including diode theory and applications, bipolar transistor theory, small and large signal amplifiers, biasing and gain calculations, JFETs, MOSFETs, Solid State Relays, thyristors, op-amps, and regulated power supplies. Prerequisite: None. Co-Requisite: ELET 1130. Day: Fa. Lecture: 2, Lab: 6. TAG: OET005. ♦

ELET 2220 Electronics II 3 cr.

ELET 2410 Programmable Logic Controllers 3 cr.
Basic operations, history, numbering systems, system hardware and software, ladder logic programming, Math functions, sequencers, comparisons, block transfers, program control instructions, fault handling, and PLC networking. Prerequisite: ELET 1110 or permission. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 2, Lab: 6. ♦

ELEC 1950 Cisco Semester I – Introduction to Networks 3 cr.
This course uses the OSI and TCP layered models of computer networks to examine the nature and roles of protocols and services at various layers. The principles and structure of IP addressing and the fundamentals of Ethernet concepts, media, and operations are introduced. Labs will allow students to analyze protocols and network operations, build small networks, apply basic cabling principles, and perform basic configurations of network devices such as routers, switches, and implementation of IP addressing schemes. Prerequisite: DTCS 1230. Co-Requisite: None. Day: Sp; Eve: On demand. Lecture: 1, Lab: 1. ♦
ELEC 2510Cisco Semester II - Routing and Switching Essentials 3 cr.

This course covers the architectures, components, and operations of routers and switches in a small network. Students learn how to configure routers and switches for functionality and security. Students will learn to configure and troubleshoot common issues with single-area OSPF, multi-area OSPF, EIGRP, virtual LANs and inter-VLAN routing in both IPv4 and IPv6 networks. Additional topics include configuration of ACLs, DHCP, NAT, SSH and Switch Security. Prerequisite: ELEC 1950. Co-Requisite: None. Day: Fa; Eve: On demand. Lecture: 1, Lab: 5.

ELEC 2330Microprocessors 4 cr.

Introduction to the basic concepts of microprocessors; emphasis on internal operation and software function; machine language programming with the use of flow charts to ease programming tasks. Write, debug, and run short programs on a microprocessor-system to gain familiarity with software techniques. Application of microprocessors to real tasks; methods of interfacing input and output devices such as keyboards, relays, and readouts. Troubleshooting methods, logic probes and emulation packages. Prerequisite: ELET 1330 or ELET 1370. Co-Requisite: None. Day Fa; Eve: On demand. Lecture 3, Lab: 2.

ELEC 2410Microcomputer Diagnostics & Upgrading I 3 cr.

This course covers diagnosing common microcomputer problems, preventive maintenance and using diagnostic programs. In addition, topics related to adding additional hardware and enhancing older computers will be covered. Hands-on experience and activities will be included. Students in possession of current CompTIA A+ Certification may receive Advanced Placement credit for this course. A copy of the certification must be provided. Prerequisite: ELEC 2050 and ELEC 2450. Eve: Sp on demand. Lecture: 2, Lab: TBD.

ELEC 2450Network Security Concepts 3 cr.

This course covers intermediate networking concepts with a focus on security fundamentals. Topics include secure network administration practices, common network protocols, vulnerabilities and attacks, wireless network security, access control, switching principles, firewalls, network compliance and auditing. This course maps to the objectives for the CompTIA Security+ Certification exam. Students in possession of current CompTIA Security+ Certification may receive Advanced Placement credit for this course. A copy of the certification must be provided. Prerequisite: ELEC 2050. Co-Requisite: None. Day: On demand; Eve: Sp. Lecture: 2, Lab: 2.

ELEC 2510Microcomputer Diagnostics & Upgrading II 3 cr.

Emphasis will be on system troubleshooting methods using appropriate tools and test equipment, as well as operating system issues using advanced software diagnostics. Students in possession of current CompTIA A+ Certification may receive Advanced Placement credit for this course. A copy of the certification must be provided. Prerequisite: ELEC 2410. Co-Requisite: None. Day: Fa; Eve: On demand. Lecture: 2.5, Lab: 1.

ELEC 2610Introduction to Linux 3 cr.

Introduces the main aspects of the Linux operating system. Students will install and configure Linux on appropriate hardware. Includes managing users, software, hardware, the Linux file systems, the Bash Shell and configuring TCP/IP servers. Students will configure a server-side LAMP environment for Web development. Students in possession of current CompTIA Linux+ Certification may receive Advanced Placement credit for this course. A copy of the certification must be provided. Prerequisite: DTCS 1230. Co-Requisite: None. Day: Sp; Eve: On demand. Lecture: 2, Lab: 2.

ELEC 2900Introduction to Computer Forensics 3 cr.

Course focuses on the study and application of criminal investigation skills and evidence-based case development for civil, criminal, and administrative cases. Applies the techniques, skills, and knowledge of computer and network support. Students will complete specialized lab experiences and training designed to build the skills necessary for computer based investigations. Prerequisite: CRJU1210, ELEC2050 and ELEC2510. Eve: Sp on demand. Lecture: 2, Lab: 2.

ENGINEERING, GENERAL (ENGR)

ENGR 1010Fundamentals of Engineering 3 cr.

A study of various engineering careers and computer applications in those areas as well as ethics as related to engineering practices. Students will work as teams to apply the problem-solving process as it relates to engineering disciplines and develop related skills. Presents the basics of drafting practices and projection types; basic concepts of operating a CAD system. Emphasis on sketching a form and then converting these images to a CAD produced engineering drawing. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 2, Lab: 4. TAG: OE5001.

ENGR 2000Special Topics-Engineering Technology 0.5-6 cr.

By permission only. In-depth study of a specific topic(s) pertinent to engineering technology. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

ENGR 2210Statics 4 cr.

Analysis of forces and effects of forces on rigid body structures
at rest such as frames and trusses. Prerequisite: MATH 2120, PHYS 2010 and PHYS 2011. Co-Requisite: None. Day: On demand; Eve: Fa. Lecture: 4, Lab: 0. TAG: OET007.

ENGR 2220 Strength of Materials 3 cr.
A comprehensive coverage of the important topics in strength of materials with an emphasis on application, problem solving, and design of structural members, mechanical devices, and systems. Includes evaluation of externally applied forces and internally induced stresses in materials. Consideration is given in terms of compression, tension, and shear to solve problems of an engineering nature. Prerequisite: ENGR 2210. Co-Requisite: None. Day: On demand; Eve: Sp. Lecture: 2, Lab: 3. TAG: OET008.

ENGR 2230 Dynamics 3 cr.
Mass in motion. Forces affecting these bodies and forces generated as a result of these bodies being in motion. Prerequisite: ENGR 2240 and MATH 2263. Co-Requisite: None. Day: On demand; Eve: Fa. Lecture: 2, Lab: 3. TAG: OES003.

ENGR 2240 Statics for Engineers 4 cr.
Analysis of forces and effects of forces on rigid body structures at rest such as frames and trusses. Prerequisite: PHYS 2510, PHYS 251L and MATH 2263. Co-Requisite: None. Day: On demand; Eve: Fa. Lecture: 4, Lab: 0. TAG: OES002.

ENGR 2250 Strength of Materials for Engineers 3 cr.
A comprehensive coverage of the important topics in strength of materials with an emphasis on application, problem solving, and design of structural members, mechanical devices, and systems. Includes evaluation of externally applied forces and internally induced stresses in materials. Consideration is given in terms of compression, tension, and shear to solve problems of an engineering nature. Prerequisite: ENGR 2240 and MATH 2263. Co-Requisite: None. Day: On demand; Eve: Sp. Lecture: 2, Lab: 3.

ENGR 2260 Engineering Design & Development I 3 cr.
Project Lead the Way® A research course that requires students to formulate the solution to an open-ended engineering question. With a community mentor and skills gained in their previous courses, students create written reports on their applications, defend the reports, and submit them to a panel of outside reviewers at the end of the school year. Prerequisite: ENGR 2310. Co-Requisite: None. Day: Sp. Lecture: 2, Lab: 3.

ENGLISH COMPOSITION (ENGL)

ENGL 0800 Integrated Language Skills I 4 cr.
Study of sentence-writing, vocabulary, and reading skills in a computer-assisted format. Emphasizes a review of grammar, mechanics, and punctuation; vocabulary skills; various reading comprehension skills; and flexible reading rates. Prerequisite: Accuplacer Placement. Co-Requisite: None. Day: All; Eve: All; Blended: Fa. Lecture: 3, Lab: 2.

ENGL 0900 Integrated Language Skills II 4 cr.
Integrate reading and writing skills in a computer assisted format in order to develop the ability to write clear, concise paragraphs and to think critically about paragraphs and essays. Students will be required to critically read, critique and write paragraphs with organizational patterns essential to college-level reading and writing. The final module will include reading and interpreting essays and writing an essay which includes an introduction, body, and conclusion. Prerequisite: ENGL 0800 or Accuplacer Placement. Co-Requisite: None. Day: All; Eve: All; Blended: Fa. Lecture: 4, Lab: 0.

ENGL 0915 Writing Studio 1 cr.
This course is designed to be taken in conjunction with ENGL 1510 English Composition I for those students who need some extra support with their writing skills. The major emphasis on the class will be on grammar usage, thesis statements, structure of paragraphs and essays, and revision and editing of writing. Students will be working on improving skills and essays being taught in English Composition I through conference and with peer-editing. Prerequisite: accuwriter placement. Co-Requisite: ENGL 1510. Day: All, Eve: All. Lecture: 0, Lab: 2.

ENGL 1510 English Composition I 3 cr. TM-E
Develop, compose, and revise expository essays, which center on a definite thesis statement. The course covers rhetorical modes such as example, process analysis, definition, and comparison/contrast. The course also covers planning, drafting, revision skills. Prerequisite: ENGL 0900 with "C" or better or Accuplacer, ACT, or SAT placement. Co-Requisite: None. Day: All; Eve: All; Online: Fa, Sp. Lecture: 2, Lab: 2.

ENGL 151H English Composition I Honors 3 cr. TM-E
Develop, compose, and revise expository essays, which center on a definite thesis statement. The course covers rhetorical modes such as example, process analysis,
definition, and comparison/contrast. The course also covers planning, drafting, and revision skills. English Composition I Honors provides a creative opportunity to develop your skills as a critical thinker, reader, and writer. Students will read and respond to a variety of challenging texts, while also examining rhetorical choices. Writing workshops, peer reviews, revision and source documentation will be central to this course. Prerequisite: ENGL 0900 with "C" or better or Accuplacer, ACT or SAT placement and Honors program acceptance. Co-Requisite: None. Day: Fa, Sp. Lecture: 2, Lab: 2. •

ENGL 1513 Business Writing 3 cr. TM-E
Students deal with the principles and techniques of effective writing for non-technical areas of business. Case situations form the basis for the course which covers various types of reports, internal and external, job search, and personnel situations. The student will prepare a resume and study job hunting skills. Prerequisite: ENGL 1510 with "C" or better. Co-Requisite: None. Day: All; Eve: All. Lecture: 3, Lab: 0. •

ENGL 1515 Technical Writing 3 cr. TM-E
Students adapt their writing skills to prepare technical documents—memos, resume, application letter, abstract, instructions, description, and proposal—including page design and graphics. Prerequisite: ENGL 1510 with "C" or better. Co-Requisite: None. Day: Fa, Sp; Eve: Fa, Sp. Lecture: 3, Lab: 0. •

ENGL 1520 English Composition II 3 cr. TM-E
Continues improvement of writing skills. Argumentative and expository papers created by evaluating information from multiple perspectives and drawing reasonable conclusions for a final research writing. Prerequisite: ENGL 1510 or ENGL 1515 or ENGL 1513. Co-Requisite: None. Day: All; Eve: All; Online: All; Blended: All. Lecture: 2, Lab: 2. •

ENGL 152H English Composition II Honors 3 cr. TM-E
Continues improvement of writing skills. Argumentative and expository papers created by evaluating information from multiple perspectives and drawing reasonable conclusions for two short papers and one long argument paper. English Composition II Honors provides a challenging opportunity to hone argumentation and persuasion skills. Through critically reading and responding to opinion papers and longer arguments by professional writers, students will analyze rhetorical choices, methods of argumentation, and the use of logic and reasoning. Honors students will use research and citation methods (APA and MLA) in their written assignments to support their own opinions and enhance their credibility as writers writing for a public audience. This class will include formal and informal peer reviews and in-class discussion and debate to encourage students to defend multiple perspectives of an issue. Prerequisite: ENGL 1510 or ENGL 151H or ENGL 1515 or ENGL 1513 and Honors program acceptance. Co-Requisite: None. Day: Fa, Sp. Lecture: 2, Lab: 2. •

ENGL 1530 English Composition III 3 cr. TM-E
Analysis and interpretation of world literature (fiction, poetry, and drama); incorporating oral and written responses. Writing formal Literary Criticism from several critical perspectives. Prerequisite: ENGL 1510 or ENGL 1520 or permission. Co-Requisite: None. Day: All; Eve: All; Online: All. Lecture: 2, Lab: 2. •

ENGL 153H English Composition III Honors 3 cr.
This course focuses on the analysis and interpretation of literature through extensive writing assignments. The course includes oral responses through class discussion, but emphasis is placed on the writing process (brainstorming, drafting, and revision). English Composition III Honors includes readings and analyses of well-known authors. Students will write two shorter analysis essays and one long critical essay on an author/works of their choosing. Writing capstone course. Prerequisite: ENGL 1510 or ENGL 151H or ENGL 1520 or ENGL 152H and Honors program acceptance. Day: Fa, Sp. Lecture: 2, Lab: 2. •

ENGL 155H Technical Writing Honors 3 cr.
Technical Writing Honors extends the concepts of business communication directly into the workplace. After classroom study, students will do on-site observation and reporting to create actual site studies, progress reports, process analyses, instruction manuals and other foundational documents. Students will visit local businesses and report on current communication needs in the workplace, and then develop skills to meet those needs. Organizational communication will be emphasized. Students will also focus on the growing use of social media as business communication tools. Prerequisite: ENGL 1510 or ENGL 151H and Honors program acceptance. Day: Fa, Sp, Su; Eve: Fa, Sp, Su; Online: Fa, Sp, Su. Lecture: 3, Lab: 0.

ENGL 2000 Special Topics-English Composition 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to English Composition. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

ENGL 2500 Creative Writing 3 cr.
Beginning work in writing fiction and poetry, emphasizing structural analysis of student works and established models. Prerequisite: ENGL 1510 or ENGL 1520. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 3, Lab: 0. •

GEOGRAPHY (GEOG)

GEOG 1210 Cultural Geography 3 cr. TM-S
Basic course in human geography stressing the spatial dimensions of culture, particularly the interrelationships between man’s activities and the natural forces of the
environment — climate, terrains, arability, and the physical distribution of the earth’s products. Selected cultural elements include language, religion, population, and settlement patterns. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp on demand. Lecture: 3, Lab: 0. TAG: OSS007.

GEOG 2000 Special Topics-Geography 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to geography. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

GEOLOGY (GEOL)

GEOL 2000 Special Topics-Geology 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to geology. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

GEOL 2310 Environmental Geology 3 cr. TM-N
This course is a survey of geological processes and products and their relation to environments and life forms. It includes the formation of the earth, internal and surface processes with a focus on major environmental processes, immediate and extended influence of humans, natural resources and their sustainability and prospects for future of physical environment. Prerequisite: None. Co-Requisite: GEOL 231L. Day: Fa; Eve: On demand. Lecture: 3, Lab: 0.

GEOL 231L Environmental Geology Lab 1 cr. TM-N
This course is the laboratory associated with the GEOL 2310 course and includes an introduction to laboratory techniques, laboratory safety with an emphasis on geological processes in practical situations. Prerequisite: None. Co-Requisite: GEOL 2310. Day: Fa; Eve: On demand. Lecture: 0, Lab: 2.

GEOL 2500 Petroleum Geology 3 cr.
This course includes a discussion of the concepts of petroleum geology, oil and gas reservoirs, and the subsurface characteristics used in petroleum exploration. Classroom emphasis will be placed upon the practical application of basic geology to the production of crude oil and natural gas. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: Sp. Lecture: 3, Lab: 0.

GEOSCIENCE (GEOS)

GEOS 1010 Physical Geography 4 cr.
The fundamental study of earth’s landforms, climate, soils, natural vegetation, and their related processes. Students will also become familiar with reading maps and basic mapping techniques. Prerequisite: None. Co-Requisite: None. Eve: Fa. Lecture: 3, Lab: 2. TAG: OSS006.

GEOS 2000 Special Topics-Geoscience 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to geoscience. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

GEOS 2410 Introduction to Meteorology 3 cr.
Introduction to the physical principles behind weather systems and weather change. Topics covered include weather vs. climate, atmospheric energy transfer, solar radiation, temperature controls, cloud formation, global systems, high and low pressure systems, mid-latitude cyclones, hurricanes, forecasting, and climate change. Prerequisite: GEOS 1010. Co-Requisite: None. Eve: Sp. Lecture: 2, Lab: 2.

GEOS 2510 Introduction to Mapping and GIS 3 cr.
Introduction to mapping sciences and Geographic Information Systems (GIS). Topics include brief history of cartography, map types, essential elements of maps, scales, distortion, basic surveying, aerial photography, and GPS. Students will also become familiar with ESRI's ArcGIS software, as well as learn the basic principles and theories behind GIS. Prerequisite: None. Co-Requisite: None. Eve: Sp. Lecture: 2, Lab: 3.

GEOS 2520 GIS Applications Capstone 3 cr.
A continuation of GEOS2510 and capstone course for the GeoScience degree and GIS Certificate. Focus on more advanced GIS applications commonly used in the workplace. Topics covered include georeferencing, digitization, using spatial analyst and other extensions, interpolation, collecting and incorporating GPS data, and plating surveys. Students will create professional, presentation-quality poster-sized maps. Prerequisite: GEOS 2510. Co-Requisite: None. Eve: Fa. Lecture: 2, Lab: 3.

HEALTH SCIENCES (HLTH)

HLTH 1000 Personal Fitness Concepts 2 cr.
This course of study focuses on fitness issues which affect Americans today and in the future. Emphasis is placed on establishing positive fitness based on factors which influence fitness. This course will also focus attention on individual personal fitness. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: On demand; Online: On demand. Lecture: 2, Lab: 0.

HLTH 1001 Basic Life Support for Healthcare Providers 0.5 cr.
This course provides training for basic life support and Cardiopulmonary Resuscitation for Healthcare Providers.
Students will learn single-rescuer and team basic life support for adults, children and infants through interactive exercises, scenarios and a written test. This is a one day class that leads to a certificate. Prerequisite: None. Co-Requisite: None. Day: Fa, Su; Eve: On demand. Lecture: 0.4, Lab: 0.4.

HLTH 1002 Basic Life Support for Healthcare Providers Renewal 0.5 cr.
This course provides recertification training for basic life support and Cardiopulmonary Resuscitation for Healthcare Providers. Students will learn single-rescuer and team basic life support for adults, children and infants through interactive exercises, scenarios and a written test. This is a one day class that leads to recertification. Prerequisite: None. Co-Requisite: None. Day: Fa, Su; Eve: On demand. Lecture: 0.4, Lab: 0.4.

HLTH 1020 Basic Health Sciences 2 cr.
This course is an introduction to applied basic sciences to the cardiopulmonary anatomy, physiology, and clinical sciences. It applies basic chemistry, physics, and basic physiologic chemistry to applications in the medical fields. Prerequisite: CHEM 0955 and CHEM 095L and MATH 0940 or MATH 0955 and Respiratory Therapy program acceptance. Co-Requisite: None. Day: Fa. Lecture: 2, Lab: 0.

HLTH 1100 Health and Wellness 3 cr.
Identifies and studies timely health and wellness issues from personal and societal viewpoints. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: On demand; Online: On demand. Lecture: 3, Lab: 0.

HLTH 1120 First Aid and Personal Safety 2 cr.
Lectures, discussion, and practice are used to study safety and give first aid in emergency situations. A certificate (adult, infant, and child) for CPR may be obtained by students who pass appropriate examinations. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp; Eve: Sp on demand. Lecture: 2, Lab: 0.

HLTH 1140 EMT Basic 5 cr.
Learn to be an Emergency Medical Technician-Basic and be prepared to help in medical emergencies. Learn skills that will allow you to obtain a State EMT-B Certification and work with other EMTs in paid and volunteer fire departments and/or EMS Agencies after completing this course of study and passing the National Registry Exam. There will be one weekend block of hands on experience required in this class. Prerequisite: HS Diploma, CPR-HCP card and valid driver’s license. Co-Requisite: None. Eve: Su. Lecture: 4, Lab: 4.

HLTH 1200 Mind-Body-Spirit Balance 2 cr.
This course is designed to teach students in the wellness field how to maintain mind-body-spirit balance. The course is highly experiential so that students will be able to not only maintain homeostasis but also be able to pass that knowledge on to others. The topics covered in this course include hands-on exercises for stress-reduction and relaxation, meditation and in-depth knowledge of the energy system. Prerequisite: None. Co-Requisite: None. Eve: Fa, Sp. Lecture: 2, Lab: 0.

HLTH 1340 CPT Coding 3 cr.
A course using Current Procedural Terminology (CPT) to convert widely accepted, uniform descriptions of medical, surgical, and diagnostic services rendered by health care providers into five-digit numeric codes. Understand the use of CPT for analysis, research, and reimbursement. Understand the use of Level II National codes. CPT codes are used to evaluate case studies and inpatients scenarios utilizing code assignment in the inpatient setting and the appropriate assignment of inpatient coding conventions. Prerequisite: None. Co-Requisite: BIOL 1330 or BIOL 2310. Eve: Fa on demand. Lecture: 3, Lab: 0.

HLTH 1350 ICD-10-CM-Coding 3 cr.
International Classification of Diseases, Clinical Modification (ICD-10-CM-Coding) to classify patient morbidity and mortality information for statistical purposes and indexing hospital records by disease and operations for storage and retrieval. Application of the guidelines and principles of ICD Coding Volumes 1, 2, 3 are used to evaluate case studies of outpatient scenarios utilizing appropriate coding assignment and coding conventions. Prerequisite: None. Co-Requisite: BIOL 1330 or BIOL 2310. Eve: Fa. Lecture: 3, Lab: 0.

HLTH 1410 Healthy Eating for a Healthy Lifestyle 3 cr.
This course focuses on basic and practical healthy eating information that addresses misconceptions about the nature of food choices in terms on overall health and wellness. The course is designed to provide personal appreciation, understanding, and awareness of good food choices and healthy lifestyles throughout the lifespan. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp, Su. Lecture: 3, Lab: 0.

HLTH 1420 Introduction to Human Disease 3 cr.
This course will focus on the mechanisms of human diseases and disorders and how they affect the major systems of the human body. The course will cover the prevention, etiology, signs and symptoms, prognosis, and treatments of common diseases. Prerequisite: BIOL 1320 or higher. Co-Requisite: None. Day: Fa, Sp, Su. Lecture: 3, Lab: 0.

HLTH 1510 Massage Techniques I 4 cr.
History of massage, the therapeutic environment and relationship, professional ethics; applied anatomy of integumentary system and superficial fascia; introduction to Swedish Massage and Deep Tissue massage. Prerequisite: Acceptance into Massage Program. Co-Requisite: None. Day: Fa; Eve: Fa even yrs. Lecture: 3, Lab: 3.
COURSE CATALOG

HLTH 1515  Myology and Kinesiology  4 cr.
This course is to prepare the massage therapy student with knowledge of the muscles, ligaments, and tendons of the body including the name, location, insertion, attachment, action, and innervations of those muscles pertaining to the practice of massage therapy. Further, the student will be able to analyze and provide a rationale of how the movement of the muscle will be affected by activity and treatment. Prerequisite: Acceptance into Massage Program. Co-Requisite: HLTH 1510. Day: Fa; Blended: Fa. Lecture: 4, Lab: 0.

HLTH 1516  Business for Massage Therapists  2 cr.
This is a practical class focusing on the business aspects of the massage profession. It will deal with various potential employment scenarios as well as the realities of owning a personal massage business. Topics include issues such as attitudes about money, legal issues and ethics of business. Prerequisite: None. Co-Requisite: HLTH 1510. Blended: FA. Lecture: 2, Lab: 0.

HLTH 1520  Massage Techniques II  4 cr.
Introduction to soft tissue barriers and their clinical significance; Muscle Energy Techniques, Craniosacral therapy; Pregnancy Massage, Trigger Point Therapy, Pain physiology and assessment; Myofascial Release; Chair Massage, Reflexology, Shiatsu, and other modalities. Swedish massage continued; applied anatomy of neuromuscular and musculoskeletal systems; palpatory and assessment skills, pathology of joints, professional ethics, and communication in therapeutic relationship. Prerequisite: HLTH 1510. Co-Requisite: None. Day: Sp; Eve: Sp odd yrs. Lecture: 3, Lab: 3.

HLTH 1810  Medical Terminology I  2 cr.
Introduction to the basic medical word elements - roots, suffixes, prefixes and combining forms - used by the medical profession. Spelling, definitions, pronunciations and usage of medical terms pertaining to all body systems are stressed. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp; Eve: Fa; Online: All. Lecture: 2, Lab: 0. TAG: OHL020.

HLTH 1820  Medical Terminology II  2 cr.
Continuation of Medical Terminology I - provides an overview of basic terminology necessitated in health care delivery. Students learn how to use appropriate reference material. The course entails instruction in correct pronunciation, accurate spelling, detailed definitions, and administration of acceptable applications of the terminology presented. Prerequisite: HLTH 1810. Co-Requisite: None. Day: Sp; Eve: Sp; Online: All. Lecture: 2, Lab: 0.

HLTH 1830  Pharmacological Terminology  3 cr.
Contains detailed definitions for terminology associated with pharmacology and the administration of drugs. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Fa. Lecture: 3, Lab: 0.

HLTH 1840  Pharmacy Technician I  2 cr.
This comprehensive course will prepare students to enter the pharmacy field. Technicians work in hospitals, home infusion pharmacies, community pharmacies and other health care settings - working under the supervision of a registered pharmacist. Course content includes medical terminology specific to the pharmacy, reading and interpreting prescriptions and defining drugs by generic and brand names and different drug classifications. Students will learn about the differences between the two types of pharmacy settings (retail and health system), dispensing of prescriptions, inventory control and billing and reimbursement. Prerequisite: None. Co-Requisite: HLTH 184L Day: On demand; Eve: Fa. Lecture: 2, Lab: 0.

HLTH 184L  Pharmacy Technician I Lab  1 cr.
This course provides simulated clinical practice in the lab in order to function as a Pharmacy Technician. It is organized to correspond with the class lectures and the textbook. Prerequisite: None. Co-Requisite: HLTH 1840. Day: On demand; Eve: Fa. Lecture: 0, Lab: 2.

HLTH 1850  Pharmacy Technician II  3 cr.
As a continuation of HLTH 1840, this comprehensive course will prepare students to enter the pharmacy field. Technicians work in hospitals, home infusion pharmacies, community pharmacies and other health care settings - working under the supervision of a registered pharmacist. Course content includes medical terminology specific to the pharmacy, reading and interpreting prescriptions and defining drugs by generic and brand names. Students will review dosage calculations, I.V. flow rates, drug compounding, dose conversions, and dispensing of prescriptions. Students will learn common diseases, causes, symptoms related to each body system and associated drug classes, and allegations. Prerequisite: HLTH 1840, HLTH 184L and MATH 1100. Co-Requisite: None. Day: On demand; Eve: Sp. Lecture: 3, Lab: 0.

HLTH 1850  Pharmacy Technician Directed Practice  2 cr.
This course provides hands on psychomotor experience in hospital pharmacy and community pharmacy. The course provides general training necessary to interpret, prepare, label, and maintain records of physicians' medication orders and prescriptions in a community pharmacy and a hospital pharmacy. All training will be under the supervision of a licensed pharmacist. Prerequisite: HLTH 1840 and HLTH 184L. Co-Requisite: HLTH 1850 and HLTH 1870. Day: Sp. Lecture: 1, Lab: 10.

HLTH 1870  Pharmacy Technician Ethics  2 cr.
This course is an overview of the ethical theories and daily applications of ethics in the Pharmacy work environment. The student will be involved in the development of the logical processes of value judgements, critical thinking, problem solving and decision making guidelines for Pharmacy Technicians in community pharmacies, hospitals and other
work environments. The course provides training on how to analyze necessary information in order to make an assessment to formulate an appropriate ethical decision and plan of action in collaboration with other health care professionals. Prerequisite: ENGL 1510. Co-Requisite: None. Day: Sp. Lecture: 2, Lab: 0.

HLTH 2000 Special Topics-General Health Sciences 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to general health sciences. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

HLTH 2010 Advanced EMT I 5 cr.
Advance beyond the basic EMT skills with the first of a two semester program, which follows the Ohio Advanced EMT Curriculum. This class centers on pharmacology and cardiology. Skills in patient assessment and clinical decision making along with airway management and other topics will be presented. The lab class is a combination of "ride along" EMS time and Hospital time, which is scheduled in advance. There are 45 hours required to be completed before the end of the semester. The time will be spent under supervision of faculty and hospital staff, as well as qualified EMS providers. The student will be able to use their new skills and observe others as they apply the skills in the clinical setting. Prerequisite: Current Ohio Basic EMT Card; Acceptance Advanced EMT Program. Co-Requisite: None. Eve: Fa. Lecture: 4, Lab: 3. ♦

HLTH 2020 Advanced EMT II 5 cr.
Advance beyond the basic EMT skills with the second of a two semester program, which follows the Ohio Advanced EMT Curriculum. This class centers on pharmacology and cardiology. Skills in patient assessment and clinical decision making along with airway management and other topics will be presented. The lab class is a combination of "ride along" EMS time and hospital time, which is scheduled in advance. There are 45 hours required to be completed before the end of the semester. The time will be spent under supervision of faculty and hospital staff, as well as qualified EMS providers. The student will be able to use their new skills and observe others as they apply the skills in the clinical setting. Prerequisite: HLTH 2010. Co-Requisite: None. Eve: Sp. Lecture: 4, Lab: 3. ♦

HLTH 2050 History of Sports 2 cr.
An analysis of the history of sports, athletics and recreation. Lecture and related activities will explore the role of sports in our lives. This course will also assess the historical framework of sports and how it has impacted sports today and in the future. Prerequisite: None. Co-Requisite: None. Eve: Fa. Lecture: 2, Lab: 0.

HLTH 2310 Principles of Reimbursement 3 cr.
Introductory course describing the use of health information and statistical coded data in government reimbursement and payment systems and commercial health plans. The student will be able to describe the use of the Medicare program, DRG payment systems, PRO review systems, RBRVS system, APC system, and will be able to identify the major components of Managed Health Care. Prerequisite: None. Co-Requisite: BIOL 1330/1340 or BIOL 2310/2320. Eve: Fa. Lecture: 3, Lab: 0.

HLTH 2320 Medical Billing 1 cr.
Comprehensive course designed to teach medical billing using patient accounting software. Activities include record charges and payments, schedule appointments, record information on patients, ICD and CPT coding, produce claim forms, patient statements, and print variety of reports. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp; Eve: Fa. Lecture: 1, Lab: 0. ♦

HLTH 2400 EKG/Cardiovascular Technician 3 cr.
This comprehensive Certified EKG Technician Program prepares students to function as EKG/Cardiovascular Technicians and prepare them to take the Electrocardiograph (EKG) Technician exam if they have a Health Science degree and/or one year experience. This course will include important practice and background information on anatomy of the heart and physiology, medical disease processes, medical terminology, medical ethics, legal aspects of patient contact, and electrocardiography. Additionally, students will practice with equipment and perform hands-on labs including introduction to the function and proper use of the EKG machine, the normal anatomy of the chest wall for proper lead placement, 12-lead placement, and other clinical practices. Prerequisite: None. Co-Requisite: None. Eve: Su. Lecture: 2, Lab: 2. ♦

HLTH 2480 Orthopedic Assessment & Documentation for Massage Therapists 3 cr.
This course is designed to provide a well rounded opportunity for students to assess anatomical and physiological deficiencies in the body, to document such deficiencies with palpation, observation, and various orthopedic tests, and to develop strategies to resolve these deficiencies. Prerequisite: HLTH 1510 and BIOL 1360. Co-Requisite: None. Day: Sp; Eve: Fa odd yrs. Lecture: 2, Lab: 2.

HLTH 2500 Massage Therapy Directed Practice 2 cr.
Introductory experience in the clinical setting, application of theories and techniques for client intervention, assessment and medical record keeping, and referral to other health care providers. Prerequisite: HLTH 1520. Co-Requisite: None. Day: Su; Eve: Sp even yrs. Lecture: 1, Lab: 5. ♦

HLTH 2800 Massage Therapy Seminar 2 cr.
Comprehensive review of massage therapy theory and practice for the massage therapist. Prerequisite: HLTH 1520. Co-Requisite: None. Day: Su; Eve: Sp even yrs. Lecture: 2, Lab: 0.
### COURSE CATALOG

**HLTH 2850** Building an Ethical Massage Therapy Practice  
2 cr.

This course prepares students to safely and ethically practice massage therapy. It provides steps and discusses techniques to build a successful and reputable massage therapy practice. Students will develop professionalism and a basic understanding of the therapist—client relationship. A code of ethics and a standard of practice will be explored and implemented. Prerequisite: acceptance into Massage Program. Co-Requisite: None. Day: Fa; Eve: Su odd yrs. Lecture: 2, Lab: 0.

### HISTORY (HIST)

**HIST 1010** Civilization I: Early World Culture  
3 cr. TM-S

The examination of civilization in the Mediterranean, India, and China; Greek and Roman eras; the beginning of Christianity, the Byzantine Empire; the rise of Islam, Buddhism, and Hinduism; Feudalism; the rise of the Christian Church; Scholasticism and the universities; the Renaissance and the Reformation; the rise of the cities in Europe and Asia; the age of exploration. Prerequisite: None. Co-Requisite: None. Eve: Fa. Lecture: 3, Lab: 0. TAG: OHS041.

**HIST 1020** Civilization II: Early/Modern Period  
3 cr. TM-S

The Commercial Revolution; the Age of Science; Reason & Enlightenment; The Rise of Nationalism; The Industrial Revolution and its problems; social reform; scientific advancement; development of the arts; the world wars; Russian and Chinese revolutions; the Cold War; rise and fall of imperial systems in Africa; East Asia, the Middle East, and Latin America. Prerequisite: None. Co-Requisite: None. Eve: Fa. Lecture: 3, Lab: 0. TAG: OHS042.

**HIST 2000** Special Topics-History  
0.5-6 cr.

By permission only. In-depth study of a specific topic(s) pertinent to history. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

**HIST 2110** American History to 1865  
3 cr. TM-S

Political, diplomatic, social, and economic developments of America from 1607 to 1865. Topics include Colonial America, founding of a new nation, the early national period, Jacksonian Democracy, territorial expansion, sectionalism & controversy and the Civil War. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 3, Lab: 0. TAG: OHS043.

**HIST 2120** American History 1865 to Present  
3 cr. TM-S

Political, diplomatic, social, and economic development of America 1865 to Present. Topics include Reconstruction, the Industrial Revolution, the progressive movement, World Wars I and II, prosperity and depression, and problems of the Cold War era. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 3, Lab: 0. TAG: OHS044.

**HIST 2300** Ohio: Its Land and Its People  
3 cr.

Students will examine the history, geography, economics, government, and people of Ohio. Emphasis is on the state’s natural resources and human capital and how both have been important to the state, nation, and world. Students will engage in research related to Marietta’s rich history and topics of importance to Ohio’s founding, growth, and development. Designed for those interested in the study of history as well as for those preparing to teach Ohio history. Prerequisite: ENGL 1510 or permission. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 3, Lab: 0.

**HIST 2750** Women in American History  
3 cr.

Examination of women’s roles, experiences, and contributions throughout the settlement, founding, and growth of the United States. Major themes related to views of women in the home, workplace, and society are traced as they change over time. Emphasis is on women’s common experiences while acknowledging the diversity and uniqueness of individual women or groups of women. Students will engage in extensive reading of primary and secondary source materials and conduct original research. Prerequisite: None. Day: Sp; Eve: Sp. Lecture: 3, Lab: 0.

### HUMANITIES (HUMN)

**HUMN 1100** Leadership Development  
3 cr.

Development of leadership skills through understanding of leadership and group dynamics theory; personal leadership philosophy; moral and ethical responsibilities of leadership, and awareness of leadership style. Integrates readings from the humanities, classic literature, contemporary multi-cultural writings, and experiential learning exercises with readings and discussions of traditional leadership theories. Prerequisite: ENGL 0900 or Accuplacer Score greater than 69. Co-Requisite: None. Day: Sp; Eve: Sp on demand. Lecture: 3, Lab: 0.

**HUMN 1200** Introduction to Film  
3 cr. TM-H

Study of film as an art form. Includes a brief history on development of the cinema, viewing, and discussion of representative films and excerpts. Prerequisite: ENGL 1520 or ENGL 152H or ENGL 1530 or ENGL 153H. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 3, Lab: 0.

**HUMN 120H** Introduction to Film Honors  
3 cr. TM-H

Study of film as an art form. Includes a brief history on development of the cinema, viewing, and discussion of representative films and excerpts. Introduction to Film Honors: important cinematic movements (i.e. German Expressionism,
French New Wave, etc.) may be analyzed for style, content, and influence. Specific genres and their styles and tropes may be explored in more depth (i.e. Film Noir, The Western, screwball comedy). Students will write in-depth research papers analyzing specific styles, genres, movements, eras, and/or technological, social or business implications. Honors students will also work together as a group to create a short video, so as to gain hands-on experience with the various elements and techniques of filmmaking. Prerequisite: ENGL 1520 or ENGL 152H or ENGL 1530 or ENGL 153H and honors program acceptance. Co-Requisite: None. Day: All. Lecture: 3, Lab: 0.

HUMN 1300  Survey of Mythology 3 cr. TM-H
Overview of mythology from the earliest oral tales to present. Structured around eight major threads into which all myths fall; three major myth divisions. Prerequisite: None. Co-Requisite: None. Day: Fa. Lecture: 3, Lab: 0.

HUMN 1400  Introduction to Islam 3 cr.
The course provides an introduction to the central religious and cultural concepts of Islam as a major world religion. It begins by a historical look at the origin of Islam, the basic concepts of faith, and how Islam relates to the other two monotheistic traditions - Judaism and Christianity. The course will then explore the customs and culture of Muslims around the world, society, politics, and economy. Finally, the course will take a look at Muslims in the West and the problem of Islamophobia. The course functions as a first introduction to the basics of Islam. No prior study or knowledge of Islam is assumed or required. Prerequisite: None. Co-Requisite: None. Online: All. Lecture: 3, Lab: 0.

HUMN 1500  Introduction to Religion and Morality 3 cr.
This course will introduce students to the basic ethical concepts, review major moral theories and explain why ethics should be of concern to students and to the world. It will clarify students’ moral decision making skills and validate their ability to make conscious moral decisions. They will also discover how the “religious” and “secular” worlds have impacted morality. Prerequisite: ENGL0900 or Placement Score. Day: Fa, Sp; Eve: On demand. Lecture: 3, Lab: 0.

HUMN 1510  Introduction to World Religion and Tolerancy 3 cr.
This course will address key concepts and terminology in the study of religion. It will also explore how people perceive religion within their communities through social, cultural, critical and contextual perspectives. Students will examine how Atheism can be considered a religion. Students will also investigate what various world religions have to say about “tolerance” and the reality of how they express it. Prerequisite: ENGL0900 or Placement Score. Co-Requisite: None. Day: Fa, Sp; Eve: On demand. Lecture: 3, Lab: 0.

HUMN 2000  Special Topics-Humanities 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent in the arts & humanities. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

HUMN 2480  Science of Science Fiction 3 cr. TM-H
The Science of Science Fiction provides an overview of science fiction and some of the science behind it. This will include a short history of science fiction and the science behind it as well as some of the major sub-genres of science fiction in order to see the impact of various fields of science. Prerequisite: ENGL 0900 or Accuplacer Score greater than 69 & HS Science. Co-Requisite: None. Day: Sp odd yrs; Eve: Sp on demand. Lecture: 3, Lab: 0.

INDUSTRIAL TECHNOLOGY (INDT)

INDT 1000  Internship 1-6 cr.
Provides the opportunity to put classroom knowledge to practical use. Student's position is selected and/or approved by the college; student is evaluated periodically by the organization and is supervised by a college instructor/Coordinator. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

INDT 1010  Introduction to Chemical Operator 3 cr.
A course delivered in an online modular format designed for newly hired or potential chemical operators. Designed to provide participants with a basic foundation in chemistry and mathematics as well as equipment operation and function. Concepts relating to safe operating practices and environmentally responsible behavior are also included. This course serves as the introductory course for students interested in pursuing an online Chemical Operator Associate degree or certificate and instructs the student in online learning protocols and methods. Course delivery includes use of computer simulations and labs and interactive video. Prerequisite: None. Co-Requisite: None. Online: All. Lecture: 3, Lab: 0.

INDT 1020  Introduction to the Petroleum Industry 3 cr.
This course introduces students to an overall exposure to the oil and natural gas industry from the beginnings of the formation of hydrocarbons to the marketing of finished products. Subjects such as origins of petroleum, exploration, regulations, drilling, well completion, production of oil, artificial lift, natural gas production, refining and marketing are covered. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: Fa, On demand. Lecture: 3, Lab: 0.

INDT 1030  Well Planning and Drilling Operations 3 cr.
This course introduces students to well design, casing design, directional design, and well programming. Topics
include drilling fluids, cementing, wellsit operations, drilling problems, and drillbits. Students will complete the course by analyzing the final well report. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: Sp, On demand. Lecture: 3, Lab: 0.

INDT 1080 Introduction to Abstractor 1 cr.
This course introduces the responsibilities of an abstractor. These include obtaining all property information needed by an attorney, determining what is important in the summary, and performing all processes needed to assure the abstract is complete. Prerequisite: None. Co-Requisite: None. Eve: Fa on demand. Lecture: 1, Lab: 0.

INDT 1100 Industrial Maintenance 3 cr.
Students will learn the basics of industrial maintenance including safety, use of hand tools, types and uses of fasteners, print reading, and bearings. A detailed exploration of modern machinery and equipment to understand, diagnose, troubleshoot, and maintain a variety of industrial machines. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: Fa. Lecture: 2, Lab: 2.

INDT 1110 Electrical Maintenance 3 cr.
Students will learn electrical maintenance for an industrial setting including the basics of electricity, circuits, testing, and wiring. A detailed exploration of electrical machinery and controls to develop an understanding for diagnosing, troubleshooting, and maintaining a wide variety of industrial machines. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: Sp. Lecture: 2, Lab: 2.

INDT 1150 Machining Processes 3 cr.
Introduction to traditional mechanical machining operations. The course is designed to provide basic training in conventional machine tool operations and processes. Projects will be completed on the lathe, vertical milling machine and drill press. Instruction will include proper hand tool use and the use of measuring devices. Students will work within specified decimal tolerances from engineering drawings. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 1, Lab: 5.

INDT 1170 Computer Numerical Control 3 cr.
Emphasis on advanced machining processes and an introduction to computerized numerical equipment (CNC). Basic alpha-numeric control codes taught along with programming skills using industry standard RS-274D machine programming language. Students will work within specified decimal tolerances from engineering drawings. Prerequisite: INDT 1150. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 1, Lab: 5.

INDT 1210 Industrial Safety and Hazmat 2 cr.
An introduction to occupational health and safety through recognition and control of health and safety hazards in the workplace. Tools and techniques for injury/illness prevention, incident investigation, and the implementation of a typical safety program. Prerequisite: None. Co-Requisite: None. Day: Fa; Online: Sp. Lecture: 2, Lab: 0.

INDT 1220 OSHA Safety 2 cr.
This safety course is designed to equip students with knowledge of workplace safety and health hazards, and the knowledge of how to minimize and mitigate such risks. At the successful completion of the course, students will have earned both the OSHA-10 and OSHA-30 General Industry Safety Certification. Prerequisite: None. Co-Requisite: None. Day: Fa. Lecture: 2, Lab: 1.

INDT 1230 Introduction to Welding Safety and Cutting Practices 3 cr.
During this course students will be able to learn and identify hazards in the workplace. Different welding positions and electrode types will be taught as well as the set up and use of welding/fabrication equipment. Students will learn about how welding is used in different manufacturing processes and also learn the history of welding and cutting. Safety in the welding lab and jobsite will be stressed the entire course. Prerequisite: None. Co-Requisite: None. Day: Fa. Lecture: 3, Lab: 0.

INDT 1231 Metal Fabrication 3 cr.
Theory and practice of metal fabrication. All aspects of metal fabrication and manufacturing will be introduced with lab activities involving layout, pattern development, bending, punching, and joining. Assembly methods practiced will include fit-up, attachment, and welding. Assigned projects will be completed and one original design project will be required. Prerequisite: None. Co-Requisite: None. Day: Su, Fa. Lecture: 1, Lab: 5.

INDT 1240 Basic Oxy/Acetyle Cutting and Welding 3 cr.
This course will instruct students on the proper set up and use of Oxy/Fuel cutting and welding equipment. Manual and mechanized Oxy/Fuel processes will be introduced with lab activities involving equipment set up, layout, cutting, welding, and joining. Students will be provided with a period of instruction and demonstration of modern safety inspection guidelines as well as work area requirements. Oxy/Fuel cutting and welding training exercises will be administered throughout the course. Prerequisite: None. Co-Requisite: None. Day: Su, Fa. Lecture: 1, Lab: 5.

INDT 1250 SMAW I 3 cr.
Oxy Acetylene cutting and Plasma Arc cutting techniques will be employed and performed. Basic Shielded Metal Arc welding techniques on plate are introduced and performed. Basic weld symbols and math and layout skills for welders are explained. Safety emphasized throughout all aspects. Prerequisite: None. Co-Requisite: None. Eve: Fa. Lecture: 1, Lab: 5.
INDT 1250
SMAW II
3 cr.
Students will use Shielded Metal Arc Welding techniques in an open groove weld in all positions on plate, pipe, carbon steel and stainless steel. Weld symbols, math and layout skills for welders are explained and performed. Safety is emphasized throughout all procedures. Prerequisite: INDT 1250. Co-Requisite: None. Day: Sp. Lecture: 1, Lab: 6. ♦

INDT 1260
GMAW I
3 cr.
Gas Metal Arc welding, Short Arc, Spray and Pulse Arc techniques on plate are introduced, demonstrated and performed. Intermediate weld symbols and math and layout skills for welders are explained and performed. Safety emphasized throughout all procedures. Prerequisite: INDT 1250. Co-Requisite: None. Day: Su. Lecture: 1, Lab: 6. ♦

INDT 1261
GMAW II
3 cr.
Students will use Gas Metal Arc Welding techniques in an open groove weld in all positions on plate & pipe. Weld symbols, math and layout skills for welders are explained and performed. Safety emphasized throughout all procedures. Prerequisite: INDT 1260. Co-Requisite: None. Day: Su. Lecture: 1, Lab: 6. ♦

INDT 1270
FCAW
3 cr.
FCAW (Flux Cored ARC Welding) techniques on plate are introduced, demonstrated and performed. Intermediate weld symbols and math and layout skills for welders are explained, demonstrated and performed. Safety emphasized throughout all procedures. Prerequisite: INDT 1260. Co-Requisite: None. Day: Fa, Sp. Lecture: 1, Lab: 6. ♦

INDT 1271
FCAW II
3 cr.
Students will be provided with a period of instruction on gas shielded & self-shielded Flux Cored Arc Welding. E71T-1 (gas-shielded) and E71T-11 (self-shielded) electrodes will be used along with 75% argon, 25% CO2 shielding gas. Training exercises related to structural steel and pipe welding will be administered along with advanced welding techniques, principles of operation and weld procedure interpretation. This course will follow the guidelines set forth by the American Welding Society S.E.N.S.E. program. Prerequisite: INDT 1270. Co-Requisite: None. Day: Fa, Sp. Lecture: 1, Lab: 5. ♦

INDT 1310
Basic Electricity
3 cr.
Basics of electricity, residential wiring, electrical safety, GFI, NEC, electrical service entry, wire rating; laboratory experiences covering voltage, current, power, conductors, semi-conductors, insulators, circuit analysis, A/C and D/C circuits, diodes, transformers, meters. Prerequisite: MATH 0955 or MATH 1104. Co-Requisite: None. Day: Fa, Sp; Eve: Sp. Lecture: 1, Lab: 5. ♦

INDT 1330
Industrial Electricity
2 cr.
This course introduces the basic concepts of electricity, electrical components and equipment, and their applications in an industrial environment. Electrical basics, including Ohm’s Law, series and parallel circuits, resistance, capacitance and inductance are covered; as well as direct and alternating electrical current. Electrical drawings and symbols, power and energy, motors, motor control, transformers, electrical distribution, and basic industrial electronics will also be covered. The application of trouble shooting is incorporated and electrical safety awareness in the workplace is reinforced. Prerequisite: MATH 0106. Co-Requisite: None. Day: Fa; Eve: Fa; Online: On demand. Lecture: 1, Lab: 3. ♦

INDT 1340
Team Concepts and Practices
3 cr.
This course focuses on the urgency of making American businesses competitive in a global economic environment. It presents an overview of total quality management (TQM) for technicians and managers in organizations of all types and sizes. Principles and processes, as well as the tools and techniques for continuous improvement, are emphasized. This course describes patterns of change in the social, economic, and political structures of the United States, and illustrates how individuals and organizations applying TQM principles can increase productivity and effectiveness. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: On demand; Online: On demand. Lecture: 2, Lab: 2. ♦

INDT 1350
Commercial Wiring and Prints
2 cr.
Sizing and installation of home and commercial electrical wiring circuits in compliance with the National Electric Code, including installation of conduit, junction boxes, outlet boxes, receptacles and switches. Reading commercial electrical blueprints, conductor ampacity calculations, and sizing of overcurrent protection devices. Prerequisite: None. Co-Requisite: None. Day: Sp. Lecture: 1, Lab: 2.5. ♦

INDT 1410
Computer Integrated Manufacturing I
3 cr.
The first of two courses that apply principles of robotics and automation to Computer Aided Design (CAD). The course builds on computer solid modeling skills developed in Introduction to Engineering Design, and Design and Drawing for Production. Students use Computer Numerical Control (CNC) equipment to produce actual models of their three-dimensional designs. Fundamental concepts of robotics used in automated manufacturing, and design analysis are included. Prerequisite: IED & POE (PLTW only). Co-Requisite: None. Day: Fa. Lecture: 2, Lab: 3. ♦

INDT 1430
Computer Integrated Manufacturing II
3 cr.
The second of two courses that applies principles of robotics and automation to Computer Aided Design (CAD). The course builds on computer solid modeling skills developed in Introduction to Engineering Design, and Design and Drawing for Production. Students use Computer Numerical Control (CNC) equipment to produce actual models of their
three-dimensional designs. Fundamental concepts of robotics used in automated manufacturing, and design analysis are included. Prerequisite: INDT 1410 (PLTW only). Co-Requisite: None. Eve: Sp. Lecture: 2, Lab: 3.

INDT 2000 Special Topics-Industrial Technology 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to industrial technology. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

INDT 2040 Production of Oil and Gas 3 cr.
This course introduces students to the properties of drilling and completion fluids; well control; oil and gas well testing; production operations; evaluation of artificial lift systems; gas measurement. Properties of natural gases and condensate systems; gas flow in porous media; gas reservoir engineering; gas field development; gas condensate reservoirs; natural gas transportation and storage. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: Fa, On demand. Lecture: 3, Lab: 0.

INDT 2070 Fabrication Processes 2 cr.
Theory and practice of sheet metal fabrication processes. Hand and machine processes will be introduced with lab activities involving layout, pattern development, cutting, bending, forming, turning, punching and joining. Assembly methods will include seaming, welding, and riveting. Assigned projects will be completed and one original design project will be required. Prerequisite: INDT 1150. Co-Requisite: None. Day: Fa; Eve: On demand. Lecture: 1, Lab: 5.

INDT 2100 Advanced Computer Numerical Control 3 cr.
CNC programming for milling machine and lathe. Application of CAM software to design, edit and verify CNC programs with NC code and real time graphics. Importing AutoCAD and DXF files into the FeatureCAM software to create part programs. Designing parts, drawing, importing AutoCAD and DXF files into the FeatureCAM. Designing parts, programming class. Use CAM files to design and produce machines. Prerequisite: INDT 1260. Co-Requisite: None. Eve: Fa. Lecture: 3, Lab: 0.

INDT 2110 Manufacturing Processes 3 cr.
This class provides up-to-date coverage of the processes used in modern manufacturing settings. It also provides comprehensive coverage of the concepts that are shaping the future of manufacturing. Visits to local industries, textbook assignments and classroom discussions are the methods by which this will be accomplished. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: On demand. Lecture: 1, Lab: 4. TAG: OET010.

INDT 2200 Process Control 4 cr.
This introductory course covers the equipment and technology associated with the control systems found in modern chemical process and manufacturing plants. The introduction is followed by units covering valves, piping and vessels, pumps, compressors, turbines and motors, heat exchangers, cooling towers, boilers, furnaces, basic instrumentation and process diagrams. This course introduces the concept of process control and instrumentation and covers the fundamental components of a control loop. PID control and PLC’s are introduced along with the concept of distributive control systems. The function of pneumatic and electronic transmitters and transducers is explained and the function, operation, and maintenance of chemical analyzers are included. The application of trouble shooting is incorporated and safety awareness, environmental responsibility, and professionalism in the workplace are reinforced. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: On demand; Online: On demand. Lecture: 4, Lab: 0.

INDT 2240 Metallurgy 3 cr.
Basic principles of metallurgy and how it relates to the strength of steels and other alloys. Physical and Process Metallurgy will be introduced as well as mechanical properties of different metals and materials. Alloy theory, heat treatment, and stress relief will be covered. Prerequisite: None. Co-Requisite: None. Day: Su. Lecture: 3, Lab: 0.

INDT 2241 Weld Inspection Practices 3 cr.
Fundamentals of destructive/non-destructive weld inspection lectured and explained. Proper development of weld procedures/testing are lectured and students will work directly with established welding codes. Students will also be provided with instruction related to visual weld inspection, common weld discontinuities, and safe inspection practices. Weld inspector responsibilities will be lectured and demonstrated throughout the course. Prerequisite: None. Co-Requisite: None. Day: Sp, Fa. Lecture: 3, Lab: 0.

INDT 2250 GTAW I 3 cr.
Gas Tungsten Arc welding, Carbon/Stainless Steel and Aluminum techniques on plate are introduced, demonstrated, and performed. Weld symbols and math and layout for welders are explained and performed. Safety emphasized throughout all aspects. Prerequisite: INDT 1260. Co-Requisite: None. Eve: Fa. Lecture: 1, Lab: 5.

INDT 2251 GTAW II 3 cr.
Students will use Gas Tungsten Arc Welding techniques in an open groove weld in all positions on plate and pipe. Weld symbols, math and layout skills for welders are explained and performed. Safety is emphasized throughout all procedures. Prerequisite: INDT 2250. Co-Requisite: None. Day: Su. Lecture: 1, Lab: 6.
INDT 2260  Pipe and Open-V Plate Welding  3 cr.
SMAW, GMAW and GTAW techniques on Open Groove Weld in all positions on Plate and Pipe are demonstrated and performed. Weld symbols and math and layout skills for welders are explained, demonstrated and performed. Safety emphasized throughout all aspects. Prerequisite: INDT 2250. Co-Requisite: None. Eve: Sp. Lecture: 1, Lab: 5. ♦

INDT 2261  Downhill Pipe Welding  3 cr.
This course will prepare students for entry level employment as a welder in the oil and gas industry. SMAW techniques will be practiced on open root V-groove joints with a downhill welding progression. This course includes pipe welding in the 5G and 6G positions with E6010, E8010, and E7018 electrodes and follows the welding standards defined by the American Petroleum Institute. Prerequisite: INDT1251. Co-Requisite: None. Day: Fa, Sp; Eve: Fa. Lecture: 1, Lab: 5. ♦

INDT 2280  Management & Supervision  3 cr.
Basics in the need and means of getting things done using organizational and communication skills to direct the work of others. A study of goals, group dynamics, planning, follow-up, giving instructions, training means and methods, and industrial psychology. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 3, Lab: 0. ♦

INDT 2300  Process Troubleshooting  3 cr.
The effective troubleshooter needs to understand basic troubleshooting methods & tools, as well as how equipment and systems work. We use a systematic approach to the troubleshooting process including using problem solving tools like, Ask Why 5 Times & Cause and Effect Diagrams. This course develops industrial workers' skills to identify, analyze and resolve process problems and abnormal situations. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 3, Lab: 0. ♦

INDT 2800  Capstone Seminar  3 cr.
A research seminar focusing on a selected topic related to Industrial Technology. Presentations will be given using Microsoft PowerPoint. A term paper is required for a final project. Prerequisite: SPCH 1510 and ENGL 1515. Co-Requisite: None. Day: Sp; Eve: On demand; Online: On demand. Lecture: 2, Lab: 2. ♦

LANGUAGE (LANG)

LANG 1010  Beginning American Sign Language I  3 cr.
A beginning course of American Sign Language (ASL), the natural language used by Deaf people and the Deaf community. This course focuses on ASL vocabulary, including receptive and expressive skills. The students will learn the alphabet, how to introduce themselves, give personal information, count, use specified classifiers, provide directions and describe everyday situations. Characteristics of Deaf culture will also be covered. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp; Eve: Fa; Lecture: 3, Lab: 0.

LANG 1020  Beginning American Sign Language II  3 cr.
Continuation of LANG1010. Focuses on the grammatical structure of ASL, including receptive and expressive skills. Students learn how to use additional classifiers, give and read directions, cardinal and ordinal numbers; describe other people, signs for money and time, and personal and possessive pronouns. Deaf culture and Deaf history will also be discussed. Prerequisite: LANG 1010 with "C" or better, or placement from skill test administered by ASL I.P. Coordinator. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 3, Lab: 0.

LANG 1900  Fingerspelling and Numbers  3 cr.
A course to enhance the receptive and productive fingerspelling skills. The students will learn glossing, numbers and fingerspelling skills in every day situations, as well as mathematical signs utilized in educational settings. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp; Eve: Fa, Sp; Blended: Fa, Sp. Lecture: 3, Lab: 0.

LANG 2000  Special Topics-American Sign Language  0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to American Sign Language. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

LANG 2010  Intermediate American Sign Language  3 cr.
A continuation of Beginning American Sign Language (ASL) I and II; the natural language used by Deaf people and the Deaf community. This course will continue to focus on the grammatical structure of ASL, including receptive and expressive skills. The student will learn how to narrate personal events and share information, discuss financial situations, decision making, and discuss health conditions in fluent ASL. The student will learn the linguistics of ASL, focusing on phonology, morphology, syntax, and semantics. Prerequisite: LANG 1020 and LANG 1900 with "C" or better. Co-Requisite: None. Day: Fa; Eve: Fa; Blended: Fa. Lecture: 2, Lab: 2.

LANG 2100  Introduction to Interpreting  3 cr.
This course is an introduction to the principles and techniques of interpreting between English and American Sign Language as both the target and source languages; sign-to-voice interpreting. Role playing, English idioms and cognitive processing skills will be utilized. Legislation impacting the education and legal rights of Deaf individuals, history of interpreting, the terminology of the field and the ethics of interpreting will be learned. The interpreting process and the national certification of interpreters will be discussed. Students will start memorizing the Interpreters Code of Professional Conduct. Prerequisite: LANG 1020
and LANG 1900 with "C" or better. Co-Requisite: None. Day: Sp; Eve: Sp; Blended: Sp. Lecture: 2, Lab: 2.

**LANG 2160  Intermediate Interpreting  3 cr.**
Continuation of development and competency of the interpreting process between English and American Sign Language. Including interpretation of idiomatic cultural expressions and linguistic variation. Team interpreting will be introduced. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 3, Lab: 0.

**LANG 2170  Advanced Interpreting  3 cr.**
Development and demonstration of further mastery of advanced interpreting principles and techniques. Platform interpreting, team interpreting, and applications of the code of ethics to interpreting situations. Prerequisite: LANG 2160. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 3, Lab: 0.

**LANG 2210  Advanced American Sign Language  3 cr.**
This is the final course in the study of ASL; an intensive study of the linguistic structure of English and ASL. Students explore the syntactic similarities and differences between the two languages and learn how to find functional equivalence between the two languages. The course focuses on student's receptive and productive mastery of using multiple grammatical features, narrative and explanatory discourse, specialized and targeted vocabulary. Principles of self-assessment of both productive and receptive abilities demonstrated. The course is designed to achieve fluency of the most basic and complex grammatical features of ASL. Activities include incorporating into sign production the necessary adjustments for registers, emotive components, and cultural background. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp; Blended: Sp. Lecture: 2, Lab: 2.

**LANG 2400  Non-educational Interpreting  3 cr.**
A study of interpreting in medical, mental health, religious, technical employment and legal settings and the terminology/signs unique to each. Practice and performance of the vocabulary used in these settings. Prerequisite: LANG 2800. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 3, Lab: 0.

**LANG 2500  Interpreting Practicum I  1 cr.**
The first of two interpreting practica. Students are required to complete a minimum of one hundred and five (105) clock hours at an assigned mentored site to develop interpreting skills, knowledge of the interpreting profession, and the role of the interpreter in various settings. Prerequisite: LANG 2100 and LANG 2100 with "C" or better. Co-Requisite: LANG2510 and LANG2160. Day: Fa, Sp; Eve: Fa, Sp. Lecture: 0, Lab: 7. ♦

**LANG 2510  Interpreting Seminar I  1 cr.**
Students will attend weekly seminar meetings to review and discuss practicum experiences at their assigned placements. Prerequisite: LANG 2010 and LANG 2100. Co-Requisite: LANG2500. Day: Fa, Sp; Eve: Fa, Sp. Lecture: 1, Lab: 0.

**LANG 2520  Interpreting Practicum II  1 cr.**
The second of two, progressive, interpreting practica. Students are required to complete a minimum of one hundred five (105) clock hours at an assigned mentored site to develop interpreting skills, knowledge of the interpreting profession, and the role of the interpreter in various educational settings to include optimum hands on training including team interpreting. Prerequisite: LANG 2500. Co-Requisite: LANG2210 and LANG2530. Day: Fa, Sp; Eve: Fa, Sp. Lecture: 0, Lab: 7. ♦

**LANG 2530  Interpreting Seminar II  1 cr.**
Students will attend weekly seminar meetings to review and discuss practicum experiences at their assigned placements. This seminar must be taken in the last semester of the program. Prerequisite: LANG 2510. Co-Requisite: LANG2520. Day: Fa, Sp; Eve: Fa, Sp. Lecture: 1, Lab: 0.

**LANG 2600  Transliterating  3 cr.**
A preparatory course for the Registry of Interpreters for the Deaf Certificate of Transliteration exam. The Signing Exact English System of manually coded English is introduced, and conceptual accuracy is stressed for educational interpreting. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 3, Lab: 0.

**LANG 2800  Educational Interpreting  3 cr.**
In-depth investigations into American Sign Language vocabulary related to specialized educational interpreting including but not limited to Sciences, sexual behavior and drug use/abuse. This course is designed to increase student's comfort and skill level for interpreting in educational, substance abuse treatment, and counseling settings. Prerequisite: LANG 2100. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 3, Lab: 0.

**LITERATURE (LITR)**

**LITR 2000  Special Topics-Literature  0.5-6 cr.**
By permission only. In-depth study of a specific topic(s) pertinent to literature. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

**LITR 2010  Introduction to Fiction  3 cr. TM-H**
Students study the forms and techniques of fiction. Selections may include short stories or short novels. Prerequisite: ENGL 1510 or ENGL 1520 or permission. Co-Requisite: None. Day: Fa on demand; Eve: Fa on demand; Online: Fa on demand. Lecture: 3, Lab: 0.

**LITR 2020  Introduction to Poetry  3 cr. TM-H**
Study of poetry from various periods of literature. Covers forms and techniques that poets use. Prerequisite: ENGL 1510 or ENGL 1520. Co-Requisite: None. Day: Sp; Eve: Su. Lecture: 3, Lab: 0.

LITR 2030 Introduction to Drama 3 cr. TM-H
Students study plays from various periods and cultures. Students will examine different dramatic forms including tragedy, comedy, historical, or others. Prerequisite: ENGL 1510 or ENGL 1520 or ENGL 1530. Co-Requisite: None. Day: Sp on demand; Eve: Sp on demand. Lecture: 3, Lab: 0.

LITR 2040 World Literature I 3 cr. TM-H
Critical study of a variety of international works of poetry, prose, and drama to the 16th-17th Century. Prerequisite: ENGL 1510 or ENGL 1520 or permission. Co-Requisite: None. Day: Sp even yrs; Eve: Sp even yrs; Online: even yrs. Lecture: 3, Lab: 0.

LITR 2050 World Literature II 3 cr. TM-H
Critical study of a variety of international works of poetry, prose and drama from the 17th century to the present. Prerequisite: ENGL 1510 or ENGL 1520 or permission. Co-Requisite: None. Day: Sp even yrs; Eve: Sp even yrs; Online: even yrs. Lecture: 3, Lab: 0.

LITR 2100 Survey of American Literature I 3 cr. TM-H
Historical and critical study of American authors from colonial period to the Civil War. Prerequisite: ENGL 1510 or ENGL 1520 and SPCH 1510 or SPCH 2060 or permission. Co-Requisite: None. Fa: On demand; Eve: On demand; Online: On demand. Lecture: 3, Lab: 0. TAG: OAH053.

LITR 2110 Survey of American Literature II 3 cr. TM-H
A historical and critical study of American authors from the Civil War to the present. Prerequisite: ENGL 1510 or ENGL 1520 and SPCH 1510 or SPCH 2060 or permission. Co-Requisite: None. Day: Sp odd yrs; Eve: Sp odd yrs; Online: Sp odd yrs. Lecture: 3, Lab: 0. TAG: OAH054.

LITR 2200 Survey of British Literature I 3 cr. TM-H
Historical and critical study of British authors from the Old English period through the 18th century. Prerequisite: ENGL 1510 or ENGL 1520 or permission. Co-Requisite: None. Day: All; Eve: All; Online: Fa, Sp. Lecture: 3, Lab: 0. TAG: OAH055.

LITR 2210 Survey of British Literature II 3 cr. TM-H
Historical and critical study of British authors from the 19th century to the present. Prerequisite: ENGL 1510 or ENGL 1520 or permission. Co-Requisite: None. Day: On demand; Eve: On demand; Online: On demand. Lecture: 3, Lab: 0. TAG: OAH056.

LITR 2600 Children's Literature 3 cr.
Survey course focusing on literature for children from birth to age 12. Students study the history of children's books, child development as it relates to literature, evaluation and selection of appropriate print media, and children's responses to literature. Ten hours of field application is included for education majors. Prerequisite: ENGL 1510 or permission. Co-Requisite: None. Day: Fa; Eve: On demand. Lecture: 3, Lab: 0.

LITR 2620 Adolescent Literature 3 cr. TM-H
Survey course focusing on literature for the adolescent in which students study the evaluation and selection of books for adolescents, the relationship between literacy and adolescent development, the history and various genres of adolescent literature, and the Internet as a research tool. Prerequisite: ENGL 1510 or ENGL 1520 or permission. Co-Requisite: None. Day: Sp. Lecture: 3, Lab: 0.

LITR 2700 Introduction to Shakespeare 3 cr. TM-H
Critical study of selected Shakespeare plays from the comedies, histories, and tragedies. Prerequisite: ENGL 1510 or ENGL 1520 or permission. Co-Requisite: None. Day: Sp on demand; Eve: Sp on demand; Online: Sp on demand. Lecture: 3, Lab: 0.

LITR 2720 Survey of Women's Literature 3 cr.
Study of literature by women from the 1600's to the present. The course includes readings by female authors, various documentaries, the writing of response papers that examine ideas and themes discussed in class, an oral presentation, and the writing of a critical research paper. Prerequisite: ENGL 1510 or ENGL 1520 or permission. Co-Requisite: None. Day: Fa, Sp. Lecture: 3, Lab: 0.

MARKETING (MKTG)

MKTG 2000 Special Topics-Marketing 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to marketing. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

MKTG 2130 Sales 3 cr.
Basic course on planning and delivering a sales presentation. Covers preparation of a sales presentation including prospecting, approach, body, demonstration and close. Course includes a student project to plan and deliver an individual sales presentation. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Sp. Lecture: 3, Lab: 0.

MKTG 2160 Advertising 3 cr.
The course introduces advertising theory and preparation. Topics include: media strategy, creating the advertising message, the use and selection of advertising media including newspaper, magazines, radio and television.
Student prepares a rough draft through final copy of print, radio, and television ads. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 3, Lab: 0. ♦

MKTG 2510 Marketing 3 cr.
Introduction to the marketing process. Study the framework of marketing in the organization, the marketing concept, the marketing mix, target marketing, consumer decision making, marketing research, physical distribution, channels of distribution, product concepts, promotion, pricing concepts, global marketing. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 3, Lab: 0.

MATHEMATICS (MATH)

MATH 0106 Math Essentials 4 cr.
A review of the essentials of math and an introduction to algebra. Topics include the four basic operations with fractions, decimals, natural numbers, whole numbers, and integers; ratio, proportion, percent, some basic geometry topics, metric and English conversions, scientific notation, and an introduction to solving equations and problem solving. Prerequisite: Mandatory Accuplacer Score. Co-Requisite: None. Day: All; Eve: Fa, Sp. Lecture: 3, Lab: 2. ♦

MATH 0940 Introduction to Quantitative Literacy 4 cr.
Viewing life mathematically: This course will provide the tools needed to gain practical knowledge and develop problem-solving skills in everyday real-world contexts. Regardless of chosen discipline, the ability to analyze and interpret data is essential to become informed citizens of a complex, technological world. Prerequisite: MATH 0106 or placement. Day: All; Eve: All; Online: All. Lecture: 3, Lab: 2. ♦

MATH 0955 Basic Algebra 4 cr.
This course covers simplifying and evaluating expressions, solving, graphing, writing of linear equations and inequalities, and solving systems of linear equations and inequalities. It also includes operations with exponents, polynomials, factoring, rational expressions and equations, simplifying radicals, solving radical equations, solving quadratic equations by various means, and graphing quadratic equations. Prerequisite: MATH 0106. Co-Requisite: None. Day: All; Eve: All; Online: All. Lecture: 3, Lab: 3. ♦

MATH 1050 Math for Health Sciences 2 cr.
This course uses basic math and common equations used in respiratory care to solve problems. Prerequisite: MATH 0940 or MATH 0955 and Respiratory Therapy program acceptance. Day: Fa. Lecture: 2, Lab: 0.

MATH 1100 Pharmacology Math 2 cr.
Review of basic mathematical principles in addition, subtraction, multiplication and division are applied to whole numbers, fractions and decimals. Principles of percentage and ratio and proportion are also reviewed. Conversions within and between the metric, apothecary and household systems of measurement are taught. Calculate IV flow rates, computing medication doses, pediatric, insulin & heparin doses. Prerequisite: MATH 0955 with "C" or better. Co-Requisite: None. Day: Fa, Su. Lecture: 2, Lab: 0.

MATH 1101 Respiratory Math 1 cr.
This course uses basic math and common equations used in respiratory care to solve problems. Prerequisite: RESP 1330, RESP 2450, RESP 2610, and MATH 0955. Co-Requisite: RESP 2500. Day: Fa. Lecture: 1, Lab: 0.

MATH 1102 Applied Geometry 3 cr.
The study of plane and solid geometric figures with applications to measurement of length, area, and volume. Problems will include metrics, and equivalent areas and volumes. Prerequisite: MATH 0955 or placement. Co-Requisite: None. Day: Fa; Eve: Sp on demand. Lecture: 3, Lab: 0.

MATH 1104 Technical Mathematics 3 cr.
For automotive, diesel, and industrial technology majors. Includes a brief review of fractions, decimals, percents, and introduction to basic algebra with emphasis on evaluation of formulas and principles of ratio and proportion. Includes English and Metric systems. Selected topics from plane and solid geometry with emphasis on practical applications to measurement of length, area, and volume. A scientific hand-held calculator will be used to solve these problems. Prerequisite: MATH 0106 with "C" or better or placement. Co-Requisite: None. Day: Fa, Sp; Eve: Sp on demand. Lecture: 3, Lab: 0.

MATH 1105 Math for Pharmacy Technicians 3 cr.
This course is intended for Pharmacy Technician students. The course will be a review of basic mathematical principles in addition, subtraction, multiplication and division as applied to whole numbers, fractions and decimals. Principles of percentage and ratio and proportion are also reviewed. Conversions within and between the metric, apothecary and household systems of measurement are taught. Calculate IV flow rates, computing medication doses, pediatric, insulin & heparin doses. Prerequisite: MATH 0940 or MATH 0955 or placement. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 3, Lab: 0.

MATH 1106 Business Mathematics 3 cr.
Introduction to business calculations applied to selected topics from retailing, finance, banking, and accounting. This course includes a brief review of basic arithmetic and percents, followed by trade and cash discounts, mark-up, payroll, depreciation, inventory, and simple and compound interest. Prerequisite: MATH 0940 or MATH 0955 or placement. Co-Requisite: None. Day: All; Eve: Fa. Lecture: 3, Lab: 0.

2017 - 2018 CATALOG 117
MATH 2000  Special Topics-Mathematics  0.5-6 cr.
By permission only. In-depth study of a specific topic(s)
pertinent to mathematics. May be repeated. Prerequisite:
Permission. Co-Requisite: None. Day: On demand; Eve: On
demand. Lecture: TBD, Lab: TBD.

MATH 2110  Principles of Statistics  3 cr. TM-M
Introduction to the vocabulary, concepts, formulas, and
presentation of statistics as applied to business and the
sciences. This course focuses on measures of central
tendencies and dispersion; probability; sampling practices
and theory, and probability distributions with emphasis
on binomial and normal distributions. Calculator usage
will be incorporated into this course. Prerequisite: MATH 0955 with "C"
or better. Co-Requisite: None. Day: Fa, Sp. Lecture: 3, Lab: 0.

MATH 2120  Trigonometry  3 cr. TM-M
Topics from trigonometry and analytical geometry including
identities will be discussed. Application of mathematical
skills to develop mathematical models and problem solving
will be emphasized. Prerequisite: MATH 0955 with "C" or
better or placement. Co-Requisite: None. Day: All; Eve: Fa.
Lecture: 3, Lab: 0.

MATH 2130  College Algebra  4 cr. TM-M
Application-based course on functions and graphs, systems of
linear equations, 3x3 determinants, factoring, quadratic equations
and inequalities, exponents and radicals, and logarithms.
Prerequisite: MATH 0955 with "C" or better or placement. Co-
Requisite: None. Day: All; Eve: All. Lecture: 4, Lab: 0.

MATH 2140  Quantitative Reasoning  3 cr.
This course focuses on using real world application to
build quantitative reasoning and problem solving skills.
It is designed for students in majors that do not require
College Algebra, PreCalculus, or Calculus. Topics include
ratios, rates, percentages, units, descriptive statistics, linear
and exponential modeling, correlation, and probability.
Prerequisite: MATH 0940 with "C" or better or placement.
And BUSM 1600 or OAST 2220 with "C" or better. Day:
All, Eve: All. Lecture: 3, Lab: 0.

MATH 2150  Precalculus  5 cr. TM-M
This course is intended for the student needing a solid
mathematical background in order to take the Analytical
Geometry and Calculus sequence. Topics to be covered
include: functions, graphs of functions including polynomial,
rational, all powers, as well as logarithmic and exponential
functions, complex numbers, and systems of equations
and inequalities, operations on matrices ,trigonometric
definitions, right and nonright angle trigonometry,
trigonometric identities, law of sines and cosines, graphing
trigonometric and inverse trigonometric functions, vectors,
conics, and polar coordinates. Prerequisite: MATH 0955
with "C" or better or placement. Co-Requisite: None. Day:
Fa, Eve: On demand. Lecture: 5, Lab: 0.

MATH 2173  Survey of Math I  4 cr. TM-M
This course is the first of a series of two courses designed
for elementary education majors. Topics to be covered
are: Mathematical reasoning and problem solving, sets
and whole number operations and properties, estimation
and computation, number theory, integer operations and
properties, rational number operations and properties, and
ratio and proportion. Prerequisite: MATH 0955 with "C"
or better. Co-Requisite: None. Day: Fa; Eve: On demand.
Lecture: 4, Lab: 0.

MATH 2175  Survey of Math II  3 cr. TM-M
Continuation of MATH 2173. Includes topics in algebra,
geometry, statistics, and probability as they apply to an
elementary education. Prerequisite: MATH 2173 with "C"
or better. Co-Requisite: None. Day: Sp; Eve: On demand.
Lecture: 3, Lab: 0.

MATH 2200  Laboratory Math  3 cr.
Course includes the study and usage of scientific notation,
exponents, logarithms, algebraic equations, systems of
measurement, including Metric, US Customary Systems and
Systeme Internationale. The concepts of normality, molarity,
moality and percentage solutions are studied in relation to
preparation of solutions. Calculations pertinent to particular
areas of the clinical laboratory are addressed, including
Clinical Chemistry, Hematology, Immunohematology and
Molecular Diagnostics. Statistical analysis of data, including
making and reading graphs, is studied in relation to assessing
Quality Assurance in the laboratory. Prerequisite: MATH 0955.

MATH 2250  Elementary Linear Algebra  3 cr. TM-M
Solutions to linear systems, matrices and matrix algebra,
determinants, n-dimensional vector spaces and subspaces,
bases and dimension, linear mappings, matrices of linear
mappings, eigenvalues and eigenvectors, diagonalization.
Emphasis is on techniques and computational skills.
Prerequisite: MATH 2264 with "C" or better. Co-Requisite:
None. Day: On demand; Eve: On demand. Lecture: 3,
Lab: 0. TAG: OMT019.

MATH 2260  Introduction to Calculus  3 cr. TM-M
Math series is for general business, education, and
technology majors. Survey of basic concepts of calculus.
For student who want an introduction to calculus but do
not need depth. (Not open for credit to students who have
taken the MATH 2263 series) Prerequisite: MATH 2130 or
MATH 2150 with "C" or better. Co-Requisite: None. Day:
Sp, Su. Lecture: 3, Lab: 0.

MATH 2263  Analytical Geometry and Calculus I  4 cr. TM-M
For engineering and science majors. Introduction to the
Calculus sequence with emphasis on techniques and
their applications. Topics covered: functions and limits,
differentiations and integration, analytic geometry, vectors,
transcendental functions, multiple integrals, and infinite
series. Prerequisite: MATH 2120 and MATH 2130 or MATH 2150 with "C" or better. Co-Requisite: None. Day: Fa, Sp; Eve: On demand. Lecture: 4, Lab: 0.

MATH 2264 Analytical Geometry and Calculus II 4 cr. TM-M
This series is for engineering and science majors. Basic introduction to calculus with emphasis on techniques and their applications. Topics covered: functions and limits, differentiation and integration, analytic geometry, vectors, transcendental functions, multiple integrals, conics and infinite series. Prerequisite: MATH 2263 with "C" or better. Co-Requisite: None. Day: Sp on demand. Lecture: 4, Lab: 0.

MATH 2265 Analytical Geometry and Calculus III 4 cr. TM-M
This series is for engineering and science majors. Basic introduction to calculus with emphasis on techniques and their applications. Topics covered: functions and limits, differentiation and integration, analytic geometry, vectors, transcendental functions, multiple integrals and infinite series. Prerequisite: MATH 2264 with "C" or better. Co-Requisite: None. Day: Sp on demand. Lecture: 4, Lab: 0.

MECH 2000 Special Topics-Mechanical Engineering 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to mechanical engineering technology. May be repeated. Prerequisite: MATH 0955. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

MECH 2060 Statistical Quality Control 2 cr.
Introduces techniques to improve quality and reduce production costs: variable (X bar and R) and attributes (p, np, c, u); charting techniques using data from a variety of production cases; use of a variety of statistical analysis techniques: including frequency, distribution, measures of central tendency, and measure of dispersion. Prerequisite: MATH 0955. Co-Requisite: None. Day: Fa; Online: Sp. Lecture: 1, Lab: 3.

MECH 2150 Instrumentation I 3 cr.
Physical properties of matter and energy, the common types of measurement used in industry, instrument communication signals, common types of instruments used in industry, elements of control systems, thermocouples and RTD's. Types of level, flow, pressure, and weight sensors used in industry; use of transmitters and recorders in control systems. Prerequisite: None. Co-Requisite: None. Day: Fa. Lecture: 2, Lab: 3.

MECH 2170 Instrumentation II 3 cr.
Control loops, controllers, the types of control modes, controller tuning, and final control elements. All aspects of selecting, sizing, maintenance and repair of control valves and actuators and their proper use in different types of control systems, use a laptop to calibrate instruments and construct and tune control loops. Prerequisite: MECH 2150. Co-Requisite: None. Day: Sp. Lecture: 2, Lab: 3.

MECH 2300 Thermodynamics 3 cr.
Introduction to the fundamental concepts of energy transformation and transport. Covers the first and second laws of thermodynamics; properties of liquids and gases. Prerequisite: MATH 2120, PHYS 2010 and PHYS 201L. Eve: On demand. Lecture: 3, Lab: 0.

MECH 2800 Mechanical Engineering Capstone Seminar 2 cr.
In depth study/project of a student chosen topic pertinent to the field of mechanical engineering technology. Participants will study the topic in a structured format with a specific outcome. The project must be supported with documented research, a written project proposal, estimate, a proto-type product, PowerPoint presentation, and a physical display. Prerequisite: ENGL 1510 and SPCH 1510 or SPCH 2060 and MECH 1100 and ENGR 2210. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 2, Lab: 0.
MEDICAL LABORATORY TECHNOLOGY (MMLT)

MMLT 1010  MLT Orientation  2 cr.
This course presents an overview of the role of the MLT which includes ethics, employment areas, job opportunities, and some basic laboratory skills. The collection of blood specimens is taught. This course also includes a self-study course in medical terminology. Prerequisite: MLT Program Admission. Co-Requisite: None. Day: Su. Lecture: 1, Lab: 3. TAG: OHL008.

MMLT 1210  Urinalysis and Body Fluid Analysis  2 cr.
Quantitative and qualitative procedures for routine chemical, physical and microscopic examination of urine. Includes theory and application of renal function. Also included are the analyses of cerebral spinal fluid, seminal fluid, gastric secretions and feces. Prerequisite: MLT Program Admission. Co-Requisite: None. Day: Fa. Lecture: 1, Lab: 3. TAG: OHL010.

MMLT 1310  Hematology I  3 cr.
Course which studies the origin, formation and differentiation of blood cells. Erythrocyte, leukocyte, and platelet pathology as well as the mechanism of hemostasis, vascular integrity and platelet function in relation to disease states is discussed. Techniques in counting red cells, white cells, and platelets are included, as well as red blood cell indices. Clinical application of agglutination includes the study of various procedures such as prothrombin time, activated partial thromboplastin time, thrombin time, fibrinogen level, bleeding time and fibrinogen degradation products. Prerequisite: MLT Program Admission. Co-Requisite: None. Day: Fa. Lecture: 2, Lab: 3. TAG: OHL009.

MMLT 1320  Hematology II  2 cr.
Course which studies the various types of anemias, leukemias, lymphomas, proliferative disorders and storage syndromes. Techniques include reticulocyte counts, ESRs, normal differentials and abnormal differentials. Prerequisite: MMLT 1310. Co-Requisite: None. Day: Sp. Lecture: 1, Lab: 3.

MMLT 1410  Immunology and Serology  3 cr.
A study of the formation, characteristics and reactions of antigens and antibodies. The serological applications of these principles are investigated in theory and application in agglutination, flocculation, and precipitation reactions. Also includes principles of immunodiffusion and the study of complement. Prerequisite: MMLT 1010. Co-Requisite: None. Day: Su. Lecture: 2, Lab: 2.

MMLT 1420  Immunohematology  3 cr.
Course which includes the study of blood group systems, phenotyping, atypical antibodies and cases of crossmatching incompatibilities. Time is spent studying investigations of transfusion reactions, the use of blood components in therapy, fetal-maternal incompatibilities and other immunological procedures. ABO and Rh typing, antibody screening and crossmatching of patient and donor blood are some of the procedures practiced. Topics of safety in immunohematology laboratory are addressed. Prerequisite: MMLT 1010. Co-Requisite: None. Day: Su. Lecture: 2, Lab: 3.

MMLT 1510  Diagnostic Microbiology  5 cr.
Course which provides the study of bacteriology, parasitology, mycology and virology. Procedures include the cultivation and identification of organisms via the use of primary and secondary culture techniques, aerobic and anaerobic techniques, biochemical techniques, serological techniques and microscopic examination. Antibiotic sensitivity testing, blood cultures, concentration of mycobacteria and the preparation of culture media and stains are also studied. Parasitology, host parasite relationships, as well as the various types of fungi, are included in the course. Prerequisite: MMLT 1010. Co-Requisite: None. Day: Sp. Lecture: 3, Lab: 4.

MMLT 1610  Clinical Chemistry  4 cr.
Course which provides the student with an introduction to manual and analytical techniques used in a clinical laboratory. Includes information about the procedures used in clinical chemistry in relation to principle, reagents, specimens, controls, procedures, instruments, normal and abnormal test results and correlation with clinical conditions. Topics of safety in the clinical chemistry laboratory are addressed. Prerequisite: MMLT 1010, CHEM 1220 and CHEM 122L. Co-Requisite: MMLT 2210. Day: Fa. Lecture: 3, Lab: 2.

MMLT 2000  Special Topics-Medical Laboratory Technology  0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to medical laboratory technology. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

MMLT 2210  Instrumentation and Laboratory Skills  3 cr.
Provides an integration of the theory, application, and laboratory skills learned during the first three semesters of the program in an on-campus clinical laboratory. Areas of emphasis include: instrumentation, quality control, time management, and laboratory information systems. Designed to increase proficiency in laboratory techniques. Student competency will be assessed by comparison with known results in coagulation, hematology, immunohematology, microbiology, serology, and urinalysis. Prerequisite: Completion of the first 3 semesters of MLT Program. Co-Requisite: MMLT 1610. Day: Fa. Lecture: 1, Lab: 6.

MMLT 2310  MLT Seminar  1 cr.
Student participation in discussions about their progress...
and challenges in the Directed Practice. Projects include preparation of a patient case study report and a research project describing medical laboratory practice in a non-US country. Guest lecturers, technical workshops, field trips and discussion of timely topics in the field are utilized. Students learn the importance of continuing education in the medical laboratory field. Prerequisite: Completion of the first 4 semesters of MLT Program. Co-Requisite: None. Day: Sp. Lecture: 1, Lab: 0.

MMLT 2410 MLT Directed Practice 6 cr.
One semester of an off-campus directed practice where the student applies the principles and practice skills learned in the first four semesters of the program in an actual clinical laboratory. Students progress through 3 levels: observation of laboratory procedures, practice of laboratory procedures with maximum supervision, and practice of laboratory procedures with minimal supervision. Competency in laboratory procedures is assessed by comparison with known results. Prerequisite: Completion of the first 4 semesters of MLT Program. Co-Requisite: None. Day: Sp. Lecture: 1, Lab: 32. ♦

MUSIC (MUSC)

MUSC 1010 Fundamentals of Music 3 cr.
Fundamentals of Music is a basic introduction to the mechanics and structure of the components of the Western harmonic system. The course is designed to give the non-music major a background in the perception and reading of musical symbols. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp on demand. Lecture: 3, Lab: 0.

MUSC 1200 Music Appreciation 3 cr. TM-H

MUSC 1250 Survey of American Music 3 cr. TM-H
Survey of Americans musical heritage, including recognition of the different evolutions in music, such as operetta, jazz, blues, and country. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: On demand. Lecture: 3, Lab: 0.

MUSC 1400 Beginning Piano 2 cr.
Group instruction on piano at the beginner’s level during two-75 minute classes per week plus practice time. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Fa on demand. Lecture: 1.5, Lab: 1. ♦

MUSC 1500 Chorus 1 cr.
This course is designed to be a performance ensemble to develop choral singing skills, and to perform literature from the Renaissance to the 20th Century. Open to college and community at large. Ability to read music helpful but not required. At least three rehearsal hours per week will be required. Course may be repeated for additional credit. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 0, Lab: 3. ♦

MUSC 1600 Instrumental Ensemble 1 cr.
The student must audition and be proficient on an orchestral instrument. A chamber orchestra uses many string performers but only uses one to a part in the wind section. Instruments that may be used in the WSCC Orchestra include: violin, viola, cello, bass, flute, oboe, bassoon, clarinet, trumpet, horn, trombone, tuba, and percussion. The director may choose to keep more than two players per part and rotate players on various compositions. Other instruments are used when required of the music score. Prerequisite: Audition only. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 0, Lab: 3. ♦

MUSC 1610 Applied Musical Instrument or Voice 1 cr.
Private Instruction on an applied instrument or voice. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp; Eve: Fa, Sp on demand. Lecture: 0.5, Lab: 1. ♦

MUSC 2000 Special Topics-Music 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to music. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

NURSING EDUCATION, ASSOCIATE DEGREE (NADN)

NADN 1100 Introduction to Nursing 1 cr.
This theory course is a one hour course to introduce students to concepts concerning the practice of nursing. The learning activities are designed around the interaction of the person, the environment, and society in the changing health care system. This course will explore nursing education and diverse nursing roles, roles and responsibilities of health team members, the political process and its effects on nursing practice, financing of healthcare, and ethical and legal practice parameters. Prerequisite: Admission to ADN program. Co-Requisite: BIOL 2310, BIOL 231L, NADN 1110, NADN 1115, ENGL 1510 and PSYC 1010. Day: Fa. Lecture: 1, Lab: 0.

NADN 1110 Foundations of Medical Surgical Nursing 4 cr.
This foundational course provides a theoretical basis to clinical nursing practice. It emphasizes assessment of functional health patterns in the use of the nursing process, safety, health promotion, communication skills, and basic medical-surgical nursing content. It is designed to cultivate a

**NADN 1115 Foundations of Clinical Nursing Practice 2 cr.**
This course is designed to build a foundation for nursing practice using evidence based practice while emphasizing rationale for simple to complex essential nursing skills. This course emphasizes assessment of functional health patterns in the use of the nursing process to cultivate safe care practices for a level 1 nursing student. This course includes: assessment, mobility, hygiene, asepsis, wound care, urinary elimination, bowel elimination, gastrointestinal functioning and medication administration. Prerequisite: Admission to ADN Program. Co-Requisite: BIOL 2310, BIOL 231L, NADN 1100, NADN 1110, ENGL 1510, and PSYC 1010. Day: Fa. Lecture: 0, Lab: 6. ♦

**NADN 2000 Special Topics-ADN 0.5-6 cr.**
By permission only. In-depth study of a specific topic(s) pertinent to associate degree nursing. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

**NADN 2050 Role Transition to ADN 2 cr.**
Designed to enhance the transition of Practical Nursing Education program graduates to the Associate Degree Nursing Program. Focuses on the transition from Licensed Practical Nursing to Associate Degree Nursing: introduces program philosophy, functional health patterns, nursing process, and clinical skills. Prerequisite: LPN Program graduate, BIOL 2310, BIOL 231L, PSYC 1010, and ENGL 1510. Co-Requisite: NADN 2120, BIOL 2320, BIOL 232L, and PSYC 2700. Day: Sp, Su; Online: Sp, Su. Lecture: 2, Lab: 0. ♦

**NADN 2120 Applying NP Across the Lifespan 8 cr.**
This course is a continuation of Discovering Nursing Process and is designed to strengthen the student’s ability to apply the nursing process to common and altered functional health patterns, in order to prevent illness and maintain or regain health. This course is designed to cultivate a safe level 1 nursing student in developing assessment, nursing and communication skills while processing medical surgical nursing information in acute care and community settings. The student role as a beginning provider of care, manager of care and member of the nursing profession will be expanded as knowledge and value clarification increases. Prerequisite: NADN 1100, NADN 1110, NADN 1115, BIOL 2310, BIOL 231L, PSYC 1010 and ENGL 1510. Co-Requisite: NADN 2150, BIOL 2320, BIOL 232L and PSYC 2700. Day: Sp. Lecture: 4, Lab: 1.5, Clinical: 10.5. ♦

**NADN 2150 Nursing Process in Pharmacology 3 cr.**
This theory course is an introduction to the use of pharmacological interventions in relationship to functional health patterns. Identified classes of drugs will be discussed. The nurses’ role in drug therapy will be explored. The nursing process will be reviewed as a means for assessing, diagnosing, intervening, and evaluating clients’ responses to drug administration. Individual responses to drug therapy and variables which affect responses will also be explored. Prerequisite: NADN 1100, NADN 1110, NADN 1150, BIOL 2310, BIOL 231L, PSYC 1010 and ENGL 1510. Co-Requisite: NADN 2120, BIOL 2320, BIOL 232L and PSYC 2700. Day: Sp. Lecture: 3, Lab: 0.

**NADN 2240 Applying NP Patterns Emotional Distress 3 cr.**
Mental health concepts and selected theoretical frameworks are used to understand adaptive and maladaptive coping behaviors in response to alterations in psychological functioning. This course explores psychiatric illnesses and mental health concepts consistent with the roles of the professional nurse. Emphasis is on the nursing process, DSM-IV criteria, therapeutic communication, therapeutic relationships, self awareness, treatment modalities, community resources, and inter-related client needs in a variety of health care settings. Current relevant research and the sociocultural, legal and ethical implications of providing nursing care to clients experiencing patterns of emotional distress is discussed. Prerequisite: NADN 2120, NADN 2150, BIOL 2320, BIOL 232L and PSYC 2700. Co-Requisite: NADN 2320. Day: Su. Lecture: 3, Lab: 0.

**NADN 2320 Applying NP Maternal/Newborn Clients 3.5 cr.**
This nursing course will provide the student with the knowledge and skills needed in the care of women from the perinatal period through postpartum, including newborn care. Utilizing functional health patterns, the student will apply the nursing process in family centered care addressing physiological and psychosocial adaptation of the family during normal as well as complex pregnancies and newborn life. Women’s health throughout the lifespan will be discussed as well as legal and ethical dimensions specific to maternal-newborn family. Prerequisite: NADN 2120, NADN 2150, BIOL 2320, BIOL 232L and PSYC 2700. Co-Requisite: NADN 2240. Day: Su. Lecture: 2.5, Lab: 0.5. Clinical: 2.5. ♦

**NADN 2330 Applying NP Pediatric Clients 3.5 cr.**
This course is designed to assist the Associate Degree Nursing student in the comprehension of pathophysiological and psychosocial concepts as they relate to pediatric clients experiencing complex alterations in functional health patterns. Emphasis will be placed upon assisting clients and their support persons to attain, maintain and regain health in advanced technological settings. The student will utilize the nursing process and evidence-based practice to enhance and refine their clinical decision-making skills. Prerequisite: NADN 2350, BIOL 1510 and MATH 2130 or MATH 2110. Co-Requisite: NADN 2400. Day: Sp. Lecture: 2.5, Lab: 0.5. Clinical: 2.5. ♦
NADN 2350 Applying NP Complex Clients 8 cr.
This course is designed to assist the Associate Degree Nursing student in the comprehension of pathophysiological and psychosocial concepts as they relate to clients experiencing complex alterations in functional health patterns. Emphasis will be placed upon assisting clients and their support persons to attain, maintain and regain health in advanced technological settings. The student will utilize the nursing process and evidence-based practice to enhance and refine their clinical decision-making skills. Prerequisite: NADN 2320, and NADN 2240. Co-Requisite: BIOL 1510 and MATH 2130 or MATH 2110. Day: Fa. Lecture: 3, Lab: 2. Clinical: 13. ♦

NADN 2400 Nursing Care of Groups of Clients 5 cr.
This course is designed to assist the Associate Degree Nursing student in developing a theoretical foundation for the professional practice of nursing and implementing the role of “member of the profession” in clinical practice. The course focuses on discovering, discussing and writing about issues and trends which affect nursing practice. The scope of nursing practice, laws which govern nursing, ethical considerations, and managerial concepts will be explored. Prerequisite: NADN 2350, BIOL 1510 and MATH 2130 or MATH 2110. Co-Requisite: NADN 2330. Day: Sp. Lecture: 2, Lab: 9. ♦

NURSING EDUCATION, PRACTICAL (NPNT)

NPNT 1410 Nursing Fundamentals I 6 cr.
This course explores the use of basic nursing skills combined with the nursing process to develop safe entry level nursing students. This course encompasses, asepsis, hygiene, medication administration, while introducing basic medical –surgical nursing skills in the lab and later in the clinical setting. Prerequisite: NPNT 1610. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 3, Lab: 3. Clinical: 6. ♦

NPNT 1420 Nursing Fundamentals II 5 cr.
This course emphasizes more complex nursing skills with continued use of the nursing process to develop competent and safe nursing students. Complex Skills to be performed include skills related to the respiratory, perioperative, circulatory, endocrine, integumentary, reproductive and neurological systems, as well as the skills and principles of IV therapy in the state of Ohio. Prerequisite: NPNT 1410. Co-Requisite: NPNT 1910. Day: Sp; Eve: Sp. Lecture: 2, Lab: 1.5. Clinical: 7.5. ♦

NPNT 1510 Practical Nursing Trends & Ethics 2 cr.
Offered to provide an understanding of past, current, and future issues which impact nursing, end of life issues and various capstone topics. Included are: historical perspectives, legal & ethical issues, roles and responsibilities of the practical nurse. The role of the Ohio Board of Nursing will be explored. The student will be assisted in formulating a letter of application and a resume, applying for licensure, and preparing for the NCLEX-PN examination using the computer lab. Prerequisite: NPNT 1410. Co-Requisite: None. Day: Sp; Eve: Su. Lecture: 2, Lab: 0. ♦

NPNT 1560 Nutrition and Diet Therapy 2 cr.
This course presents an introduction to nutrition and the study of diet therapy. Information on the understanding of nutrients and their functions in the body will be presented. Diet is presented as treatment and prevention in conjunction with other therapies. Prerequisite: Practical Nursing program admission. Co-Requisite: None. Day: Su; Eve: Fa. Lecture: 2, Lab: 0. ♦

NPNT 1610 Introduction to Practical Nursing 2 cr.
This course will introduce the student to Practical Nursing beginning with growth and developmental tasks of adulthood and aging. Also covered will be diabetes mellitus, perioperative nursing, pain, the immune system, fluid & electrolytes, IV therapy, shock, and acid-base balance. Prerequisite: Practical Nursing program admission. Co-Requisite: None. Day: Su; Eve: Fa. Lecture: 2, Lab: 0. ♦

NPNT 1620 Practical Nursing I 3 cr.
This course continues with nursing care of adults with various needs. Includes nursing care, assessment and teaching for lymphatic and hemopoietic, gastrointestinal, musculoskeletal, endocrine, renal, and reproductive systems. Prerequisite: NPNT 1610. Co-Requisite: None. Day: Fa; Eve: Sp. Lecture: 3, Lab: 0.

NPNT 1630 Practical Nursing II 3 cr.
This course is the third in a series which develops the art and science of nursing care of adults. It includes nursing care of adults with problems of Cardiovascular, Respiratory, Neurological, Special Senses, & Integumentary systems. Prerequisite: NPNT 1620. Co-Requisite: None. Day: Sp; Eve: Fa. Lecture: 3, Lab: 0.

NPNT 1710 Pharmacology 4 cr.
This course is a comprehensive study of drugs; including pharmacology math, drug classifications, pharmaceutical preparations, site of drug actions and physiological responses of the body to drugs. Responsibilities of the practical nurse in relation to the care of the client receiving the medication will be stressed. Prerequisite: NPNT 1610 and MATH 1100. Co-Requisite: None. Day: Fa; Eve: Sp. Lecture: 4, Lab: 0. ♦

NPNT 1910 Maternal Child Health 5 cr.
Study of the maternity cycle including the common deviations from the normal obstetrical course and the sick child, including common deviations from normal for each age group. Prerequisite: NPNT 1410 and NPNT 1560.
OAST 1110  Word Essentials  1 cr.
Word Essentials is a graduated instruction approach that moves students from early modeling instruction through project-based problems similar to situations they will encounter in the workplace, and requires students to use their thinking and problem-solving skills. Prerequisite: None. Co-Requisite: None. Online: Fa, Sp. Lecture: 0, Lab: 2.

OAST 1200  Voice Recognition  2 cr.
Focuses on mastery of voice recognition skills including: user profile files, building vocabulary files, dictating documents, editing and formatting, correcting recognition errors, and cursor control. Voice recognition skills will be used with a popular software package. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp; Eve: Fa. Lecture: 2, Lab: 2.

OAST 1300  Records Management  3 cr.

OAST 1330  Medical Office Procedures  2 cr.
Comprehensive basic knowledge in medical office procedures. Topics include the medical environment, staff, ethics, and law, interacting with patients, telecommunications, scheduling appointments, computers and information processing, and computers and financial management. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa odd yrs. Lecture: 2, Lab: 0.

OAST 1400  Electronic Health Records  2 cr.
An overview course that focuses on the fundamental concepts, terminology and functions of the electronic health record. The course will emphasize the principles of creating and maintaining electronic health records in acute and ambulatory settings. EHR history, benefits, standards, functionality, security, and confidentiality in a variety of healthcare settings will be examined. Students will have hands-on training using the common functions of an electronic health record system. Prerequisite: None. Co-Requisite:

OAST 1410  Keyboarding I  3 cr.
Designed for beginning typing students at the college level. Students must have previous keyboarding skills. Emphasis on developing speed and accuracy in timed writings. Students will format various documents including emails, letters, memos, tables, and reports. Prerequisite: Pre-Keyboarding Placement. Co-Requisite: None. Day: Fa, Sp; Eve: Fa, Sp. Lecture: 2, Lab: 2.

OAST 1520  Keyboarding II  3 cr.
Continuation of OAST 1510 Keyboarding I. Continued emphasis on developing speed and accuracy in timed writings. In basket projects, previewing correspondence, itineraries, agendas, manuals, multipage documents, memo reports, and advanced tables. Prerequisite: OAST 1510. Co-Requisite: None. Day: Sp; Eve: Fa, Sp. Lecture: 2, Lab: 2.

OAST 1550  Windows Concepts  2 cr.
The course provides an in-depth study of a graphical user interface (GUI) operating system, Windows. Topics covered will include Introduction to Windows; managing files and folders; customizing file and folder management; securing the computer; control panel; backing up and restoring your files, creating DVD videos, working with Windows media. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: On demand. Lecture: 2, Lab: 0.

OAST 1551  Google Apps  2 cr.
Designed as an overview course to provide open source application skills. Topics include: creating/managing Google accounts, Gmail, calendar, and using documents, spreadsheets, and presentations. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp; Eve: On demand. Lecture: 2, Lab: 0.

OAST 1670  Office Procedures  2 cr.
Designed to give a basic knowledge in general office procedures in the electronic office. Topics include: virtual office, business ethics, telephone etiquette, travel arrangements, planning meetings, and mail responsibilities. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: On demand. Lecture: 2, Lab: 0.

OAST 1810  Business Editing and Proofreading  2 cr.
Business-related exercises to improve proofreading and editing skills for business or personal use. Topics covered include grammar, punctuation, format, sentence construction, and editing for content, conciseness and clarity. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Sp on demand. Lecture: 2, Lab: 0.

OAST 2000  Special Topics-OAST  0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to office administrative services technology. May
be repeated. Prerequisite: Permission. Co-Requisite: None.
Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

OAST 2210 Microsoft Word 3 cr.
Use Microsoft Word to create documents, select and edit text, format characters, use AutoCorrect, move and copy text, find and replace, printing and page formatting, page numbers, headers and footers, footnotes and endnotes.
Prerequisite: None. Co-Requisite: OAST 1510. Day: Fa;

OAST 2220 Microsoft Excel 3 cr.
Use Microsoft Excel to create and enhance simple worksheets, copy data, create named ranges, change fonts, patterns, colors, and formats. Create and use formulas and functions, both basic and advanced.
Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Sp.
Lecture: 2, Lab: 2. ♦

OAST 2230 Microsoft Access 3 cr.
Introduces Access databases, adding and editing data, using AutoCorrect, copy and paste, filters and queries, creating forms and reports, and creating relationships. Students will design and build a relational database.

OAST 2490 Desktop Publishing 3 cr.
An introduction to creating, editing, formatting, and layout of sophisticated documents including: internal, letterheads, envelopes, business cards, personal, brochures, specialty promotional, newsletters, and design elements. Use proper desktop publishing software.
Prerequisite: OAST 2210. Co-Requisite: OAST 2210. Day: Fa;

OAST 2520 Workplace Technology 2 cr.
Designed for students to develop skills necessary to use various workplace technologies. Upon completion, students should be able to demonstrate proficiency using a scanner, fax, digital camera, laptop, video conferencing, software, telephone/voice mail, smartphone, iPad, etc.

OAST 2871 OAST Practicum I 1 cr.
Practicum provides placement of an individual into an office to observe and participate in its operation. Students will spend 105 hours per semester with respective office. Students will participate in reviews and assessments of work experience.

OAST 2872 OAST Practicum II 1 cr.
A second practicum provides placement of an individual into an office to observe and participate in its operation. Students will spend 105 hours per semester with respective office. Students will participate in reviews and assessments of work experience.

OAST 2881 OAST Seminar I 1 cr.
Students will participate in reviews and assessments of work experience as related to the practicum. Seminar will include forums. Students will gain knowledge and experience for initial understanding of office concepts and software presented in OAST technical courses.

OAST 2882 OAST Seminar II 1 cr.
Students will participate in reviews and assessments of work experience as related to the practicum. Seminar will include forums. Students will gain knowledge and experience for initial understanding of office concepts and software presented in OAST technical courses.
Lecture: 1, Lab: 0.

OAST 2910 Microsoft PowerPoint 3 cr.
Students learn design concepts and computer skills needed to develop effective presentations for meetings, seminars, lectures, or business meetings. Text charts, number charts, and picture charts will be incorporated in order to create slide show presentations that communicate a multitude of business concepts. Design elements will include SmartArt, WordArt, ClipArt as well as sound and animation.
Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Sp even yrs. Lecture: 2, Lab: 2. ♦

OAST 2960 Capstone Seminar 2 cr.
Capstone Seminar focuses on job search skills, portfolio development, graduates banquet, and professional development, and certification for administrative assistants.
Prerequisite: 27 OAST/HLTH course hours. Co-Requisite:

PERSONAL DEVELOPMENT (PERS)

PERS 0250 Essential Keyboarding Skills 2 cr.
A course designed for the person who has limited knowledge of the computer and keyboard. The course will include beginning computer skills and function of basic computer parts. The course will develop basic keyboarding skills for alphabetic keys, symbols, and numeric keypad. Basic formatting features will include margins, spacing, and text alignment. Students will learn to format letters, memos, and reports.
Prerequisite: None. Co-Requisite: None. Day: Fa, Sp; Eve:
Fa, Sp. Lecture: 2, Lab: 0. ♦
PERS 1003 College Foundations 2 cr.
This course is designed to help students create greater success in college and in life. The student will learn many proven strategies for creating greater academic, professional and personal success through cooperative learning activities, guided journal activities and reflection. Prerequisite: None. Co-Requisite: ENGL 0800 or ENGL 0900. Day: Fa, Sp; Eve: Fa, Sp. Lecture: 2, Lab: 0.

PERS 1060 Personal Career Development 3 cr.
Prepares students for the world of work and future career plans. Students develop a career plan, practice job search skills and resume writing, complete job applications, learn interview strategies, and job market research. Covers global work issues, workplace diversity, personal budgeting, and continuing education opportunities. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: On demand. Lecture: 3, Lab: 0.

PERS 1080 Financial Literacy 1 cr.
Introduces concepts of financial responsibility, managing personal income, savings, debt, and charitable giving. Explores a broad spectrum of money management and financial planning options for use in protecting and growing one's assets. Prerequisite: None. Co-Requisite: None. On demand. Lecture: 1, Lab: 0.

PERS 1200 21st Century Workplace Skills 3 cr.
An introduction to basic skills and knowledge required for the 21st Century workplace. Topics include communication basics, interpersonal skills, teamwork, problem solving, ethics and personal responsibility, leadership skills, dealing with change, and planning for professional development. The course includes a capstone presentation that requires teamwork and application of the lessons learned in each module. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: On demand; Online: On demand. Lecture: 3, Lab: 0.

PERS 2000 Special Topics-Personal Development 0.5-6 cr.
By permission only. In-depth study in a specific topic(s) pertinent to personal development. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture TBD, Lab: TBD.

PHIL 1010 Introduction to Philosophy 3 cr. TM-H
This course represents humanity's attempts to understand the nature of the universe and the meaning and purpose of life. The class is divided into five topics: reasoning; epistemology; metaphysics; ethics; and, aesthetics. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp; Eve: Fa, Fa. Lecture: 3, Lab: 0. TAG: OAH045.

PHIL 1200 Principles of Reasoning 3 cr. TM-H
Basic concepts of logic and techniques for judging the validity of arguments. Topics include systems for symbolizing arguments and deriving conclusions from premises, formal and informal fallacies of reasoning, classical and contemporary theories of deduction - the syllogism and the enthymeme - as well as induction - generalization and hypothesis testing. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp; Eve: Fa, Sp, Online: On demand. Lecture: 3, Lab: 0.

PHIL 1300 Introduction to Ethics 3 cr. TM-H
Discussion of classic and modern philosophical views of human values, ideals, and morality. Provides some introductory problems, concepts, and results of ethics; includes selected philosophers of past and present. Lecture, reading and discussion. Prerequisite: ENGL 0900 or Accuplacer score greater than 69. Co-Requisite: None. Day: Fa, Sp; Eve: Fa, Sp, Online: Fa, Sp. Lecture: 3, Lab: 0. TAG: OAH046.

PHIL 2000 Special Topics-Philosophy 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to philosophy. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

PHYSICAL THERAPIST ASSISTANT TECHNOLOGY (PTAT)

PTAT 1010 Introduction to Physical Therapy 2 cr.
This course offers an introduction to the definition, history, and development of the physical therapy profession. Students learn the role of the physical therapist assistant, the laws, regulations, and policies of the American Physical Therapy Association, current issues, and special topics in the profession including pediatric, neurologic, orthopedic, cardiopulmonary, and geriatric physical therapy practice. Prerequisite: Acceptance into PTA Program. Co-Requisite: None. Day: Fa. Lecture: 2, Lab: 0.

PTAT 1550 Basic Exercise Physiology 3 cr.
This course covers all areas of basic exercise physiology. There is an emphasis on both cardiovascular and pulmonary exercise physiology as well as the basis of safe and effective exercise prescription in normal individuals, pulmonary, cardiac and special needs patients. This course is part of the progression for the ACSM's Group Exercise Leader or NSCA-Certified Personal Trainer. Prerequisite: BIOL 1310 and BIOL 131L or BIOL 2310 and BIOL 231L. Co-Requisite: None. Day: Sp. Lecture: 2, Lab: 2.

PTAT 2000 Special Topics-Physical Therapist Assistant Technology 0.5-6 cr.
By permission only. In-depth study of a specific topic(s)
pertinent to physical therapist assistant technology. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

PTAT 2210 Physical Therapy Procedures 4 cr.
Students will be exposed to basic theory and physiology of heat, cold, ultrasound, electrical stimulation, hydrotherapy, traction, and compression, light, and massage. The opportunity for development of skills in application of these modalities will be offered to students in the laboratory setting. Prerequisite: PTAT 1010. Co-Requisite: PTAT 2400. Day: Su. Lecture: 3, Lab: 3. ♦

PTAT 2250 Introduction to Clinical Setting 2 cr.
This course covers the interaction of Physical Therapy personnel within the physical therapy department, with emphasis on the physical therapist assistant. The Physical Therapist Assistant student will be introduced to basic patient care skills. These include: use of wheelchairs, crutches, and other assistive devices; body mechanics; patient transfer and positioning; gait training; evaluating vital signs; and other useful advice on patient’s/therapist’s problems. The course offers SOAP note documentation principles. Prerequisite: PTAT 2400 and PTAT 2210. Co-Requisite: PTAT 2410. Day: Su. Lecture: 1, Lab: 2. ♦

PTAT 2400 Functional Anatomy & Kinesiology 4 cr.
This course builds on the student’s knowledge gained by successfully completing BIOL 2310. The emphasis and focus, however, will be on the neuromuscular/skeletal anatomy of the extremities, spine and facial areas of the human body and on the normal kinematics of these structures. Detailed considerations are given to origin, insertion, nervous innervation, nervous and arterial supply to the muscles of the human extremities, trunk, and face. This course will also emphasize the basic kinesiological principles describing the science of joint motion and muscle action in the human body. The focus of the course will be describing the action of the commonly agreed upon prime movers, using terminology most widely accepted with the discipline of physical therapy. Students will also be introduced to goniometry and manual muscle testing. Prerequisite: BIOL 2310, BIOL 231L, PTAT 1010, PHYS 1320 and PHYS 132L. Co-Requisite: PTAT 2210. Day: Sp. Lecture: 3, Lab: 2. ♦

PTAT 2410 Musculoskeletal Dysfunction 3 cr.
This course covers the basic concepts and principles associated with musculoskeletal dysfunction and the types of physical therapy interventions utilized to treat common musculoskeletal disorders. Emphasis will be on recognition and understanding the dysfunction and disease process. Prerequisite: PTAT 2400 and PTAT 2210. Co-Requisite: PTAT 2250 and PTAT 2560. Day: Su. Lecture: 3, Lab: 0.

PTAT 2450 Directed Practice I 2 cr.
An introductory experience in clinical settings in which the student will be able to perform previously learned theories and techniques for patient care under the close supervision of a licensed physical therapist. Prerequisite: PTAT 2210, PTAT 2400, PTAT 2410, PTAT 2250, BIOL 2450 and CPR certification. Co-Requisite: PTAT 2500. Day: Fa. Lecture: 0, Lab: 10. ♦

PTAT 2500 Seminar I 1 cr.
Student participation in discussions related to clinical experiences in Directed Practice I. This course begins the review process for the National Physical Therapy Examination. Prerequisite: PTAT 2210, PTAT 2400, PTAT 2410, PTAT 2250 and BIOL 2450. Co-Requisite: PTAT 2450. Day: Fa. Lecture: 1, Lab: 0.

PTAT 2540 Neurological Conditions in PT 2 cr.
This is an entry level survey on principles of neurological rehabilitation course, for the conditions and their clinical presentations. Clinical management and physical therapy interventions will be discussed for the most common neurological problems that may be seen in physical therapy practice. Normal and abnormal neurodevelopment will also be covered. Prerequisite: PTAT 2410, PTAT 2250 and BIOL 2450. Co-Requisite: PTAT, 2560, PTAT 2620, and PTAT 2640. Day: Fa. Lecture: 2, Lab: 0.

PTAT 2550 Directed Practice II 3 cr.

PTAT 2560 Principles and Applications of Therapeutic Exercise 2 cr.
This course covers the basics behind exercise principles and the application of exercise programs. The student will be exposed to the principles of therapeutic exercise for a number of special exercise programs and activities of daily living with concurrent home programs. Prerequisite: PTAT 2400, PTAT 2410 and PTAT 2210. Co-Requisite: None. Day: Fa. Lecture: 1, Lab: 2. ♦

PTAT 2600 Seminar II 1 cr.
Student participation in discussions related to clinical experiences in Directed Practice II. This course continues the review process for the National Physical Therapy Examination. Prerequisite: PTAT 2450, PTAT 2540, PTAT 2620, PTAT 2640 and PTAT 2500. Co-Requisite: PTAT 2550. Day: Sp. Lecture: 1, Lab: 0.

PTAT 2620 Physical Therapy & Special Populations 3 cr.
This course is designed for the entry level student in Physical Therapist Assistant education. A survey of current practices in a pediatric and geriatric physical
therapy is offered. A wide range of disabilities including neurological, musculoskeletal, developmental, neuromuscular, and cardio pulmonary problems will be discussed. An overview of major problems in the older adult population with suggested procedures for treatment will be presented as well as information on evaluating and treating a child with the disability. Prerequisite: PTAT 2410, PTAT 2250, and BIOL 2450. Co-Requisite: PTAT 2540, PTAT 2560, and PTAT 2640. Day: Fa. Lecture: 3, Lab: 0.

PTAT 2640 Advanced Rehabilitation Concepts 3 cr.
Using selective topics from comprehensive sources, this course introduces the basic concepts of rehabilitation management of adult patients with differing special needs, including, but not limited to: obstetrics/gynecological, burns, amputees, and cardiovascular. Prerequisite: PTAT 2410, PTAT 2250 and BIOL 2450. Co-Requisite: PTAT 2560, PTAT 2540, and PTAT 2620. Day: Fa. Lecture: 3, Lab: 0.

PTAT 2650 Directed Practice III 4 cr.
Advanced final educational experience in a clinical setting in which the student will be able to perform learned theories and techniques for patient care under the guidance and supervision of a licensed Physical Therapist Assistant. Prerequisite: PTAT 2550 and PTAT 2600. Co-Requisite: PTAT 2990. Day: Sp. Lecture: 0, Lab: 20.

PTAT 2990 PTA Capstone 4 cr.
The first 8 weeks of this course is a summative course. It will provide a cumulative review of all courses in the PTA program. Students will take a cumulative computerized exam at the initiation and conclusion of the course to assess overall learning outcomes. Students will be provided with individualized feedback regarding strengths and weaknesses to better prepare them for the national physical therapist assistant examination for licensure. During the last 2 weeks of this course, students present the Evidence Based Research Project that was presented at the clinical sites during the third Directed Practice. Special topics in the last 2 weeks of the course include, but are not limited to: job placement and career development, evidence-based journal reviews, round table discussions, professionalism in physical therapy, and final preparation for licensing and the national physical therapy licensing examination. Prerequisite: PTAT 2550 and PTAT 2600. Co-Requisite: PTAT 2990. Day: Sp. Lecture: 0, Lab: 20.

PHYSICS (PHYS)

PHYS 1010 Applied Physics 2 cr.
Introduction to the principles combined with its applications in industry today. Covers the broad fields of mechanics, heat, light, sound. Specific topics include atomic structure, flow of fluids, work, energy, simple machines, thermal expansion & gas laws. High school physics is not required. Prerequisite: MATH 1104 or MATH 1102. Co-Requisite: PHYS 101L. Day: Fa, Sp; Eve: Fa, Sp; Online: Fa, Sp. Lecture: 2, Lab: 0.

PHYS 101L Applied Physics Lab 1 cr.
The Laboratory portion of the course PHYS 1010. This includes an introduction to laboratory techniques, laboratory safety, significant figures as well as communicating scientific ideas. For non-science majors. Prerequisite: MATH 1104 or MATH 1102. Co-Requisite: PHYS 1010. Day: Fa, Sp; Eve: On demand; Online: Fa. Lecture: 0, Lab: 2.

PHYS 1100 Principles of Physical Science I 3 cr. TM-N
Covers basic principles and concepts of astronomy and physics. For non-science majors. Prerequisite: high school science. Prerequisite: High school science or equivalent. Co-Requisite: PHYS 110L. Day: Fa; Eve: On demand. Lecture: 3, Lab: 0.

PHYS 110L Principles of Physical Science I Lab 1 cr. TM-N
This course is the laboratory component of the PHYS 1100 course and deals with the basic principles and concepts of chemistry, geology and meteorology. This course is designed for non-science majors. Prerequisite: High school science or equivalent. Co-Requisite: PHYS 1100. Day: Fa; Eve: On demand. Lecture: 0, Lab: 2.

PHYS 1120 Principles of Physical Science II 3 cr. TM-N
This course covers the basic principles and concepts of chemistry, geology, and meteorology. For non-science majors. Prerequisite: High school science or equivalent. Co-Requisite: PHYS 1120L. Day: Sp; Eve: On demand. Lecture: 3, Lab: 0.

PHYS 1210 Survey of Astronomy 3 cr. TM-N
The history of astronomy, the nature of the solar system, common constellations and stars, galaxies and recent discoveries in the field. A few sessions held at night for telescope viewing. Prerequisite: None. Co-Requisite: MATH 0955 and PHYS 121L. Day: Sp; Eve: Fa, On demand. Lecture: 3, Lab: 0.

PHYS 121L Survey of Astronomy Lab 1 cr. TM-N
The course is the laboratory associated with the Survey of Astronomy course and includes proper laboratory and safety procedures, communicating scientific ideas as well as indentifying common constellations and stars. For the day class, a few sessions may be held at night.
**PHYS 1310**  Physics for Respiratory Therapy  1 cr.
This course is an introduction to the principles of physics combined with applications to medical fields with an emphasis on Respiratory Therapy topics. The course includes the study of Newton's laws, energy, waves, heat, and fluids. Detailed explanations are given of biological and medical applications of fluids. Prerequisite: MATH 0955 or MATH 2100. Co-Requisite: PHYS 131L.
Day: Sp; Eve: On demand. Lecture: 1, Lab: 0.

**PHYS 2010**  Introduction to Physics I  3 cr. TM-N
The course is a continuation of the PHYS 201L course and includes an introduction to laboratory techniques, laboratory safety, significant figures for engineers. Prerequisite: MATH 2120. Co-Requisite: PHYS 2010.
Day: Sp; Eve: On demand. Lecture: 0, Lab: 2. TAG: OSC014.

**PHYS 2030**  Introduction to Physics II  3 cr. TM-N
Continuation of PHYS 2010 including an introduction to optics, heat and thermodynamics, electricity and magnetism. The course covers the properties of electrostatics, the electric field, electric potential, direct current circuits, magnetism, electro-magnetic induction, electro mechanical devices and instruments, and alternating currents by combining lectures with demonstrations and labs. Prerequisite: PHYS 2010 and PHYS 201L.
Day: Fa; Eve: On demand. Lecture: 3, Lab: 0. TAG: OSC015.

**PHYS 2510**  General Physics I  4 cr. TM-N
This physics series is for science and engineering majors. Classical physics with calculus and vectors. Topics include Newtonian mechanics, rotational dynamics, gravitation, fluids and wave phenomena. Prerequisite: None. Co-Requisite: MATH 2263 and PHYS 251L.
Day: Fa; Eve: On demand. Lecture: 4, Lab: 0. TAG: OSC016.

**PHYS 251H**  General Physics I Honors  4 cr. TM-N
This honors physics course is for science and engineering majors seeking a deep understanding of physics. Students will solve problems involving classical physics with calculus and vectors. Topics in the course include Newtonian mechanics, rotational dynamics, gravitation, fluids and wave phenomena. The honors physics course will provide opportunities for students to get more experience with critical thinking and problem solving by being involved in a project. The project will hone the students skills by involving them with practical applications of physics. Prerequisite: Honors program acceptance. Co-Requisite: MATH 2263 and PHYS 251L.
Day: Fa; Eve: On demand. Lecture: 4, Lab: 0. TAG: OSC016.

**PHYS 251L**  General Physics I Lab  1 cr. TM-N
The laboratory section associated with the General Physics I class. The course includes proper laboratory and safety procedures, significant digits and communicating scientific ideas. This physics series is intended for science and engineering majors. Prerequisite: None. Co-Requisite: MATH 2263 and PHYS 2510.

**PHYS 2530**  General Physics II  4 cr. TM-N
Continuation of PHYS 2510. Classical physics with
calculus and vectors; thermal properties of matter, heat, and thermodynamics, electricity, magnetism and optics. Prerequisite: PHYS 2510, PHYS 251L and MATH 2263. Co-Requisite: MATH 2264 and PHYS 253L. Day: Sp; Eve: On demand. Lecture: 4, Lab: 0. TAG: OSC017.

**PHYS 253L General Physics II Lab 1 cr. TM-N**

**POLITICAL SCIENCE (POLS)**

**POLS 1010 Current Affairs 3 cr.**
This course includes discussion and analysis of current issues of public concern at the state and national level. Major emphasis is placed on the importance of the mass media in shaping opinions and influencing decisions. Prerequisite: None. Co-Requisite: None. Day: On demand. Lecture: 3, Lab: 0.

**POLS 1020 American National Government 3 cr. TM-S**
Survey of all aspects of our democratic system; emphasis on the Constitution, the three branches of government, civil rights and liberties, and foreign policy. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp; Eve: Fa, Sp. Lecture: 3, Lab: 0. TAG: OSS011.

**POLS 1030 State and Local Government 3 cr. TM-S**

**POLS 1500 American Foreign Policy 3 cr.**
An examination of American foreign policy from World War II to the present; consideration of external and domestic influences on American Foreign Policy behavior. Prerequisite: None. Co-Requisite: None. Day: Sp. On demand. Lecture: 3, Lab: 0.

**POLS 2000 Special Topics-Political Science 0.5-6 cr.**
By permission only. In-depth study of a specific topic(s) pertinent to political science. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

**POLS 2050 Global Issues 3 cr.**
Consideration of major problems such as environment, health, economics, war, population, human rights; discussion of possible political solutions. Writing Intensive Course. Prerequisite: ENGL 1515 or ENGL 155H or ENGL 1510 or ENGL151H. Co-Requisite: None. Day: Sp on demand. Lecture: 3, Lab: 0. TAG: OSS012.

**POWERSPORTS TRAINING (PSTP)**

**PSTP 1010 Introduction to Powersport Technology and Safety 1 cr.**
Students will learn the basics of powersport technology including history, types of motorcycles, and job opportunities. Included is an introduction to safety in the motorcycle shop with studies in personal safety, shop safety, and hazardous material laws. Prerequisite: None. Co-Requisite: None. Day: On demand. Eve: Fa. Lecture: 1, Lab: 0.

**PSTP 1020 Tools, Measuring Systems and Fasteners 2 cr.**
This course investigates the many various tools used in the powersports industry; how to select and use the correct tool. Measuring systems, fasteners, and thread repair are included as essential elements of tool use in motorsports. Prerequisite: None. Co-Requisite: None. Day: On demand. Eve: Fa. Lecture: 1, Lab: 2.

**PSTP 1030 Basic Engine Configuration and Operation 2 cr.**
This course explores the engines that are used in powersports, two-stroke and four stroke, the differences, primary components, various configurations, and cooling systems. Students will study the theory of operation of these engines. Prerequisite: None. Co-Requisite: None. Day: On demand. Eve: Fa. Lecture: 1, Lab: 2.

**PSTP 1040 Lubrication, Cooling and Fuel Systems 3 cr.**
Students will study engine lubrication, its purpose, lubricants, bearings, and systems; cooling systems and components used in Motorsports. This course examines motorcycle and ATV fuel systems, octane, carburetors, and fuel injection. Prerequisite: None. Co-Requisite: None. Day: On demand. Eve: Fa. Lecture: 1, Lab: 4.

**PSTP 1050 Electrical Fundamentals and Inspection 3 cr.**
Develops the knowledge and skills to work with the electrical systems used in powersports. Studies into charging systems. Ignition systems, and electric starting systems. Lab activities centered around inspecting and trouble-shooting electrical systems on motorsports equipment. Prerequisite: AUTO 1110. Co-Requisite: PSTP 1030. Day: On demand. Eve: Sp. Lecture: 1, Lab: 4.

**PSTP 1060 Chassis Components and Theory 2 cr.**
Studies of frame designs and suspension systems found in motorcycles and ATVs including oil damper and coil spring designs. Motorcycle braking systems, wheel, and tire design are investigated and classified. Prerequisite: None. Co-Requisite: None. Day: On demand. Eve: Sp. Lecture: 1, Lab: 2.

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 1000</td>
<td>Psychology of Human Relations</td>
<td>3 cr.</td>
<td>Study of human interaction and its effects on both the personal and professional levels. Course focuses on diversity, introspection, communication, groups, conflict management, with emphasis on practical application of acquired knowledge. Prerequisite: None. Co-Requisite: None. Day: All; Eve: On demand. Lecture: 3, Lab: 0.</td>
</tr>
<tr>
<td>PSYC 1010</td>
<td>General Psychology</td>
<td>3 cr. TM-S</td>
<td>Introduction to Psychology: Survey of topics in psychology including physiological bases of behavior, methods of psychology, cognition, social/organizational, developmental, and personality/psychology. Prerequisite: ENGL 0900 or Accuplacer placement. Co-Requisite: None. Day: All; Eve: All; Online: Fa, Sp. Lecture: 3, Lab: 0. TAG: OSS015.</td>
</tr>
<tr>
<td>PSYC 1030</td>
<td>Mental Health Concepts</td>
<td>2 cr.</td>
<td>This course presents an overview of mental health and mental illness as opposite poles of a continuum. Included for study are mental function and dysfunction, categories of mental illness and treatment modalities. Addictive disorders are also covered. Prerequisite: PSYC 1010. Co-Requisite: None. Day: Sp; Eve: Su. Lecture: 2, Lab: 0.</td>
</tr>
<tr>
<td>PSYC 2000</td>
<td>Special Topics-Psychology</td>
<td>0.5-6 cr.</td>
<td>By permission only. In-depth study of a specific topic(s) pertinent to psychology. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.</td>
</tr>
<tr>
<td>PSYC 2100</td>
<td>Social Psychology</td>
<td>3 cr. TM-S</td>
<td>Study of social interactions emphasizing a balance of research and application. Topics will include social cognition, attitude formation and change, conformity/obedience, group processes, pro-social behavior, aggression, and stereotyping/prejudice. Prerequisite: PSYC 1010. Co-Requisite: None. Day: On demand. Lecture: 3, Lab: 0. TAG: OSS016.</td>
</tr>
<tr>
<td>PSYC 2320</td>
<td>Abnormal Psychology</td>
<td>3 cr. TM-S</td>
<td>Survey of the major categories of psychological disturbance emphasizing a balance of research and application. Topics will include etiology, prognosis, and treatment modalities using the current DSM as a reference basis. Prerequisite: PSYC 1010. Co-Requisite: None. Day: Sp; Eve: On demand. Lecture: 3, Lab: 0. TAG: OSS017.</td>
</tr>
<tr>
<td>PSYC 2700</td>
<td>Developmental Psychology</td>
<td>3 cr. TM-S</td>
<td>Examines the life cycle of humans from conception to death. Applies developmental theories and research in the explanation of human behavior. Allows experiential learning opportunities that demonstrate research in the field. This course is considered a writing intensive course that has at least 20 pages of collegiate writing. Prerequisite: PSYC 1010. Co-Requisite: None. Day: All; Eve: Fa, Sp. Lecture: 3, Lab: 0. TAG: OSS048.</td>
</tr>
<tr>
<td>PSYC 2750</td>
<td>Educational Psychology</td>
<td>3 cr. TM-S</td>
<td>Applications of psychological theories and models to the classroom. Major topics include goals of education; cognitive, social and affective development in children; cognitive and behavioral models of learning; motivation; individual and cultural differences; effects of social class, ethnicity, and gender on learning and development; tests and evaluation. Prerequisite: PSYC 1010. Co-Requisite: None. Day: Fa; Eve: On demand; Online: Fa. Lecture: 3, Lab: 0. TAG: OED008.</td>

### RADIOLOGIC TECHNOLOGY (RADT)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>RADT 1010</td>
<td>Introduction to Radiologic Technology and Procedures I</td>
<td>2 cr.</td>
<td>This course introduces the student to specific medical, legal, ethical, and professional topics important for success in the profession, including professional issues in Radiologic Technology, patient care and safety, and instrumentation. This course also presents the student with the didactic material, laboratory demonstrations and practice necessary to develop the cognitive and psychomotor domains in order to be successful in the clinical setting. The course will teach the student how to perform specific radiographic procedures and allow the student to practice the procedures in the laboratory setting during clinical rotations, followed by performing them in the clinical setting under proper supervision. The student is required</td>
</tr>
</tbody>
</table>
to attend two lecture sessions per week. Prerequisite: Acceptance into RADT Program. Co-Requisite: None. Day: Fa. Lecture: 2, Lab: 0.

RADT 1110  Principles of Radiographic Exposure I  4 cr.
This is the first of two radiographic exposure courses. This course introduces the student to the fundamentals of X-ray exposure, anatomy and physiology of the X-ray tube, principles of X-ray production, interactions between X-rays and matter, and basic radiographic quality. This course provides the student with the prerequisite knowledge (cognitive domain) base required prior to operating the radiographic equipment in the clinical setting. This course presents the student with the study of X-ray film, film holders, intensifying screens, automatic exposure control, scattered radiation, and devices used to improve radiographic quality including stationary and moving grids, anode heel effect, and compensating filters. Prerequisite: Acceptance into RADT Program. Co-Requisite: None. Day: Fa. Lecture: 4, Lab: 0.

RADT 1120  Principles of Radiographic Exposure II  3 cr.
This is the second of two radiographic exposure courses. This course presents the student with the study of "radiographic quality" and the factors that control it. The course also covers recorded detail, density, contrast, distortion, and the factors controlling each. This course reviews and relates exposure principles to practical problem solving. It covers Quality Improvement, and exposure combination problems. Prerequisite: RADT 1110. Co-Requisite: None. Day: Sp. Lecture: 3, Lab: 0.

RADT 1220  Radiographic Procedures II  3 cr.
This is the second of four Radiographic Procedures courses. This course is a continuation of Radiographic Procedures I and presents the student with the didactic material and laboratory demonstration and practice necessary to develop the cognitive and psychomotor domains in order to be successful in clinical. The course will teach the student how to perform specific radiographic procedures and allow the student to practice the procedures in the laboratory setting prior to performing them in the clinical setting. Prerequisite: RADT 1210. Co-Requisite: None. Day: Sp. Lecture: 3, Lab: 0.

RADT 1230  Radiographic Procedures III  2 cr.
This is the third and final positioning course in the program. This course offers a comprehensive review of "routine" positions already taught, and "non-routine" positions not yet covered, but common to the profession and part of the A.R.R.T. certification exam test bank. Prerequisite: RADT 1220. Co-Requisite: None. Day: Su. Lecture: 2, Lab: 0.

RADT 1310  Applied Radiography I  2 cr.
This is the first of six Applied Radiography courses that provides the student with the exposure to the practice of Radiology necessary to develop competence in patient care, instrumentation, radiographic procedures, processing techniques, promote professional and ethical conduct, and develop the student's ability to function both independently and as a member of the health care team, develop critical thinking/problem solving skills, and develop and promote Life-Long Learning skills. The outcomes are measured by performance objectives, written objectives, competency evaluations, and adherence to policy and the professional code of conduct. This is a knowledge based course designed to develop and evaluate the cognitive and psychomotor Domains. Prerequisite: RADT 1010. Co-Requisite: None. Day: Fa. Lecture: 0, Lab: 0, Clinical: 14.

RADT 1320  Applied Radiography II  2 cr.
This is the second of six Applied Radiography courses that provides the student with the exposure to the practice of Radiology necessary to develop competence in patient care, instrumentation, radiographic procedures, processing techniques, promote professional and ethical conduct, and develop the student's ability to function both independently and as a member of the health care team, develop critical thinking/problem solving skills, and develop and promote Life-Long Learning skills. The outcomes are measured by performance objectives, written objectives, competency evaluations, and adherence to policy and the professional code of conduct. This is a knowledge based course designed to develop and evaluate the cognitive and psychomotor Domains. Prerequisite: RADT 1310. Co-Requisite: None. Day: Sp. Lecture: 0, Lab: 0, Clinical: 14.

RADT 1330  Applied Radiography III  2 cr.
This is the third of six Applied Radiography courses that provides the student with the exposure to the practice of Radiology necessary to develop competence in patient care, instrumentation, radiographic procedures, processing techniques, promote professional and ethical conduct, and develop the student's ability to function both independently and as a member of the health care team, develop critical thinking/problem solving skills, and develop and promote Life-Long Learning skills. The outcomes are measured by performance objectives, written objectives, competency evaluations, and adherence to policy and the professional code of conduct. This is a knowledge based course designed to develop and evaluate the cognitive and psychomotor Domains. Prerequisite: RADT 1320. Co-Requisite: None. Day: Su. Lecture: 0, Lab: 0, Clinical: 14.

RADT 2000  Special Topics-Radiologic Technology  0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to radiologic technology. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

RADT 2170  Radiographic Physics  4 cr.
This course includes the study of matter, electrostatics, electrodynamics, magnetism, electromagnetism,
electromagnetic induction, the generation of electricity, the production and control of high voltage, regulation of current, rectification, review of x-ray production, half value layer, pair production, review of the x-ray tube, and x-ray circuits. Prerequisite: RADT 1120. Co-Requisite: None. Day: Fa. Lecture: 4, Lab: 0.

RADT 2190 Special Procedures/Radiographic Imaging 2 cr.
This course covers all aspects of the radiographic dark room and film processing. The student is taught the physical aspects of the radiographic dark room, manual and automatic processing equipment, and lighting. The student is taught the principles of radiographic photography, radiographic chemistry, digital/electronic image processing, and dark room/processing problems and trouble shooting. This course also covers the equipment, positioning, and anatomy involved with "Special Procedures" radiography. Prerequisite: RADT 1230. Co-Requisite: None. Day: Fa. Lecture: 2, Lab: 0.

RADT 2310 Applied Radiography IV 3 cr.
This is the fourth of six Applied Radiography courses that provides the student with the exposure to the practice of Radiology necessary to develop competence in patient care, instrumentation, radiographic procedures, processing techniques, promote professional and ethical conduct, and develop the student’s ability to function both independently and as a member of the health care team, develop critical thinking/problem solving skills, and develop and promote Life-Long Learning skills. The outcomes are measured by performance objectives, written objectives, competency evaluations, and adherence to policy and the professional code of conduct. This is a knowledge/skills based course designed to develop and evaluate the cognitive, psychomotor, and affective Domains. Prerequisite: RADT 1230. Co-Requisite: None. Day: Fa. Lecture: 0, Lab: 0, Clinical: 21.

RADT 2320 Applied Radiography V 3 cr.
This is the fifth of six Applied Radiography courses that provides the student with the exposure to the practice of Radiology necessary to develop competence in patient care, instrumentation, radiographic procedures, processing techniques, promote professional and ethical conduct, and develop the student’s ability to function both independently and as a member of the health care team, develop critical thinking/problem solving skills, and develop and promote Life-Long Learning skills. The outcomes are measured by performance objectives, written objectives, competency evaluations, and adherence to policy and the professional code of conduct. This is a knowledge/skills based course designed to develop and evaluate the cognitive, psychomotor, and affective Domains. Prerequisite: RADT 1230. Co-Requisite: None. Day: Fa. Lecture: 0, Lab: 0, Clinical: 21.

RADT 2330 Applied Radiography VI 3 cr.
This is the last of six Applied Radiography courses that provides the student with the exposure to the practice of Radiology necessary to develop competence in patient care, instrumentation, radiographic procedures, processing techniques, promote professional and ethical conduct, and develop the student's ability to function both independently and as a member of the health care team, develop critical thinking/problem solving skills, and develop and promote Life-Long Learning skills. The outcomes are measured by performance objectives, written objectives, competency evaluations, and adherence to policy and the professional code of conduct. This is a knowledge/skills based course designed to develop and evaluate the cognitive, psychomotor, and affective Domains. Prerequisite: RADT 2320. Co-Requisite: None. Day: Su. Lecture: 0, Lab: 0, Clinical: 21.

RADT 2420 Selected Topics 3 cr.
This course covers the A.R.R.T. credentialing exam (Registry) content specifications for the current Radiography examination. It is intended to be a review of material from all previous semesters to prepare the student for the ARRT Registry exam. This course includes a separate 1 credit hour, 2-day Kettering A.R.R.T. Registry Review Seminar. Prerequisite: RADT 2510. Co-Requisite: None. Day: Su. Lecture: 3, Lab: 0.

RADT 2430 Kettering National ARRT Review 1 cr.
This is a 2 day course taught during the 6th semester of the program. It is a comprehensive review of the American Registry of Radiologic Technologists Certification Exam Content Specifications. It provides each student with a step by step method of preparing for the Certification Exam. Prerequisite: Enrollment in RADT 2420. Co-Requisite: None. Day: Su. Lecture: 1, Lab: 0.

RADT 2510 Pathology/Advanced Radiobiology & Radiation Protection 3 cr.
This course provides some review of anatomy and pathology, and a detailed study of radiographically diagnosed diseases and abnormalities. This course provides an introduction to cross sectional anatomy. This course also details the deleterious biological effects of ionizing radiation on cellular function and body systems, and the Dose Equivalent Limits of ionizing radiations. The course also reviews and details radiation protection procedures with Federal and state requirements. Prerequisite: RADT 2190. Co-Requisite: None. Day: Sp. Lecture: 3, Lab: 0.

REAL 1900 Real Estate Principles & Practices 3 cr.
Introduction to the U.S. real estate industry. Covers ethics, regulation; nature, importance, and character of land; real estate business and market; ownership and interest; contracts; surveying and property descriptions; transfer of title; mortgage instruments; title closing;
financing; investment; deeds, leases and other instruments. Prerequisite: None. Co-Requisite: None. Eve: Fa on demand. Lecture: 3, Lab: 0.

REAL 2400 Real Estate Law 3 cr.
Includes law of agency as applied to real estate brokers and sales agents; law of fixtures; estates (including leases); conveyance of real estate titles; license law of Ohio; zoning; cooperatives and condominiums. Prerequisite: None. Co-Requisite: None. Eve: Fa on demand. Lecture: 3, Lab: 0.

REAL 2410 Real Estate Appraising 2 cr.
Study of the professional approach to value estimation; economic, sociological, and political forces on real property; appraisal of single family residence; problem definition; how data is acquired, classified, analyzed, and interpreted into an estimate of value. Prerequisite: None. Co-Requisite: None. Eve: Sp on demand. Lecture: 3, Lab: 0.

REAL 2420 Real Estate Finance 2 cr.
Role of real estate financing in community development; financial instruments; nature of financial institutions in the mortgage market; and how the market is influenced by government policy. Includes risk analysis, procedures and methods in financing income properties. Prerequisite: None. Co-Requisite: None. Eve: Fa on demand. Lecture: 2, Lab: 0.

RECR 1200 Strength Training 1 cr.
Principles and practices of strength training, including the design of a basic workout, proper mechanics of using free weights, and appropriate exercises for the major muscle groups. May be repeated. Prerequisite: None. Co-Requisite: None. Day: Su; Eve: Fa, Sp. Lecture: 0, Lab: 2.

RECR 1210 Women's Strength Training 1 cr.

RECR 1230 Group Cycling 1 cr.
Group stationary cycling is a low-impact, highly motivating, vigorous fitness program. Group cycling bikes are specifically designed to allow the rider to adjust the degree of intensity to the appropriate health and fitness level of the individual. Prerequisite: None. Co-Requisite: None. Day: All. Lecture: 0, Lab: 2.

RECR 1310 Step Aerobics 1 cr.
Instruction and participation in step aerobic exercise and weight training. Two hours per week. Course may be repeated. Prerequisite: None. Co-Requisite: None. Day: All; Eve: All. Lecture: 0, Lab: 2.

RECR 1320 Cardiokickboxing 1 cr.
Cardiokickboxing is a high energy course that combines the skills of martial arts with aerobic movements. Prerequisite: None. Co-Requisite: None. Day: On demand. Lecture: 0, Lab: 2.

RECR 1330 Muscle Conditioning & Flexibility 2 cr.
This course will teach students about resistance training to strengthen and build muscles using equipment and/or one's own body weight. Stretching techniques to gain flexibility will also be practiced. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp. Lecture: 1, Lab: 2.

RECR 1340 Dance Aerobics 1 cr.
Instruction and participation in aerobic exercise integrated with various dance techniques. Two hours per week. Course may be repeated. Prerequisite: None. Co-Requisite: None. Day: On demand. Lecture: 0, Lab: 2.

RECR 1350 Zumba 1 cr.
This course is a fun upbeat aerobic class. This course is designed to increase coordination and cardiovascular fitness. Zumba is a nationally recognized exercise program. The objective is to teach a fun way to exercise by bringing students to a party setting for aerobic exercise. Prerequisite: None. Co-Requisite: None. Day: On demand. Lecture: 0, Lab: 2.

RECR 1360 Walking 1 cr.
This course will involve walking outside. This course is designed to improve cardiovascular fitness and assist with weight loss. The course will take place on the trails at Washington State Community College. There will also be walking on area sidewalks and steps, stairs & concrete surfaces. Prerequisite: None. Co-Requisite: None. Day: On demand. Lecture: 0, Lab: 2.

RECR 1750 Yoga 1 cr.
Yoga class offers instruction and practice in basic asana with emphasis on breath and the synchronization of breath and movement. Yoga class addresses and emphasizes the integration of body, mind, and spirit via a series of practices involving seven to ten postures and breathing techniques. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp. Lecture: 0, Lab: 2.

RECR 1760 Mat Pilates 1 cr.
Mat Pilates is an introductory class to core development. Pilates is a well researched exercise technique to strengthen core muscles, restore balance, improve flexibility and reduce stress and fatigue. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp. Lecture: 0, Lab: 2.

Updated April 14, 2017
RECR 1800 Karate 1 cr.
Learn Okinawan style Karate, Shorinryu, at all levels. Beginners are introduced to basic blocks, strikes, kicks and kata. Returning and advanced students set goals to be accomplished by the end of each term, as agreed to with their instructor (Sensei). Students also have options for extra instruction, seminars, tournaments, uniforms and testing for advancement in rank. Self defense and the spirit of martial arts are emphasized. Prerequisite: None. Co-Requisite: None. Day: Sp. Lecture: 2, Lab: 2.

RECR 2000 Special Topics-Recreation and Physical Education 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to recreation and physical education. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

RESP 1100 Introduction to Respiratory Care 2 cr.
History, organization, credential systems and job functions of the respiratory care profession; respiratory care theory and procedures including terminology, applied principles of physics, vital signs, ambulation and body mechanics, universal precautions, oxygen appliances and quality assurance procedures. Prerequisite: BIOL 1320, BIOL 132L, HLTH 1020, MATH 1050 and program admission. Co-Requisite: None. Day: Sp. Lecture: 1, Lab: 3.

RESP 1210 Cardiopulmonary Pharmacology 2 cr.
The course is an orientation to general pharmacology including drug groups, dosage, effects, and dispensing regulations. It is an emphasis on drugs used in the treatment and management of cardiopulmonary disease including bronchodilators, mucokinetics, steroids, and other drugs. Prerequisite: BIOL 1320, BIOL 132L, HLTH 1020, MATH 1050, and program admission. Co-Requisite: None. Day: Sp. Lecture: 1, Lab: 3.

RESP 1250 Medical Gas Administration Therapeutics 4 cr.
This course is a study of therapeutic modalities and physiologic monitoring practices used in the treatment and diagnosis of pulmonary diseases inclusive of: Arterial Blood Gas Analysis and puncture, Co-oximetry, Pulse-oximetry, End tidal CO2 monitoring and Oxygen analysis. This course includes material on the calibration, maintenance, function equipment used and an introduction to basic skills relating to patient care, including scientific principles of equipment operation, and basic oxygen administration, aerosol, bronchial hygiene therapy, humidification therapy and Airway management techniques inclusive of endotracheal intubation. Prerequisite: BIOL 1320, BIOL 132L, HLTH 1020, MATH 1050 and program admission. Co-Requisite: None. Day: Sp. Lecture: 3, Lab: 3.

RESP 1330 Cardiopulmonary Anatomy & Physiology 2 cr.

RESP 1350 Clinical Practice I 1 cr.
Experiences will include basic skills such as; medical asepsis, monitoring vital signs, charting in medical record and other record keeping, isolation techniques, and CPR. The student will become familiarized with Hospital and Respiratory Therapy Dept.(RT) policies and procedures for operations and emergency procedures. Also includes performance of medical gas administration and introduction to basic therapeutic procedures. The student will also be assigned to a physician’s office for involvement with patient History and physicals. Prerequisite: BIOL 1320, BIOL 132L, HLTH 1020, MATH 1050 and program admission. Co-Requisite: None. Day: Sp. Lecture: 0, Lab: 5.

RESP 1360 Advanced Cardiopulmonary Resuscitation 1 cr.
In-depth study of specific respiratory care issues in a group with a structured format. Prerequisite: HLTH 2400, RESP 2500 and program admission. Co-Requisite: None. Day: Sp. Lecture: 0, Lab: 3.

RESP 2000 Special Topics-Respiratory Therapy Technology 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to respiratory therapy technology. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

RESP 2450 Clinical Practice II 1 cr.
Continuation of the hospital clinical experience including basic patient care skills such as medical asepsis, vital sign monitoring, documentation of the patient’s response to procedures, CPR and other basic skills. Also performance of therapeutic and diagnostic modalities such as: Aerosol Therapies, I.P.P.B., Postural Drainage & Percussion, Medical Gas Administration, Pulse Oximetry, End Tidal CO2 Monitoring, Airway Care, and Arterial Puncture and analysis of Blood Gas Samples. Students will explore the Cultural Diversity and Age Specific requirements of the patient population and be introduced to the care of pediatric patients. In this semester the student will also be assigned to a hospital operating room under the supervision of the Anesthesia Dept to experience airway maintenance procedures. Prerequisite: RESP 1100, RESP 1210, RESP 1250, RESP 1350, RESP 1360, RESP 1360. Co-Requisite: None. Day: Su. Lecture: 8.

RESP 2460 Arterial Blood Gases 1 cr.
The course will review the fundamentals of acid-base respiratory physiology, interpretation and assessment of
blood gases and the clinical applications. Prerequisite: RESP 2500, RESP 2610 and RESP 2450. Co-Requisite: None. Day: Fa. Lecture: 1, Lab: 0. ♦

RESP 2500  Respiratory Critical Care I  2 cr.
Initial studies of the care of the critically ill patient with an emphasis on Mechanical Ventilation. In this session the student will study the principles, effects, and modes of mechanical ventilation as well as the techniques of initiation, monitoring, and weaning patients. The course will conclude with a study of the principles of Neonatal ventilation. Prerequisite: RESP 1100, RESP 1210, RESP 1250, RESP 1350, RESP 1330 and RESP 1360. Co-Requisite: None. Day: Su. Lecture: 1, Lab: 3. ♦

RESP 2510  Cardiopulmonary Pathology I  3 cr.
Diseases and disorders affecting the cardiopulmonary systems emphasizing diagnosis, selection and implementation of therapeutic modalities, and the role of the respiratory care practitioner treatment. Prerequisite: RESP 2500, RESP 2610 and RESP 2450. Co-Requisite: None. Day: Fa. Lecture: 3, Lab: 0. ♦

RESP 2520  Cardiopulmonary Pathology II  1 cr.
Practical application of the principles obtained in Cardiopulmonary Pathology I, as they apply to the National Board for Respiratory Care (NBRC) examination process, with emphasis on the Clinical Simulation Exam. Prerequisite: RESP 2510. Co-Requisite: None. Day: Sp. Lecture: 0, Lab: 3. ♦

RESP 2550  Clinical Practice III  2 cr.
Additional Hospital experience and continuation of patient care skills, providing therapeutic modalities: Small Volume Nebulizer, Postural Drainage & Percussion, IPPB, Incentive Spirometry, etc. In addition the student should be able to perform Arterial puncture and analysis of blood samples as well as non-invasive diagnostic procedures; pulse oximetry, capnography, etc. The student will begin to explore aspects of Mechanical Ventilation and Critical Care environments in this semester as well as provide care to the Pediatric Patient. The student will also apply various modes of mechanical ventilation to adult patients in the hospital setting toward the end of the semester. Prerequisite: RESP 2500, RESP 2610 and RESP 2450. Co-Requisite: None. Day: Fa. Lecture: 0, Lab: 15. ♦

RESP 2600  Respiratory Critical Care II  3 cr.
Continuation of the care of the critically ill patient, beginning with a review of adult and neo-natal ventilation procedures. This semester will deal with aspects of managing a patient on mechanical ventilation, inclusive of hemodynamic monitoring, ventilator waveform interpretation, and pharmacological interventions for the ventilator patient as well as ventilation of the patient in the home. The course will conclude with a discussion on classification of mechanical ventilators and patient care studies. Prerequisite: RESP 2500, RESP 2610 and RESP 2450. Co-Requisite: None. Day: Fa. Lecture: 2, Lab: 3. ♦

RESP 2610  Respiratory Pediatrics and Neonatology I  2 cr.

RESP 2620  Respiratory Pediatrics and Neonatology II  2 cr.
This course is a continuation of RESP 2610 and involves more advanced Respiratory Care of neonatal and pediatric patient care preparation. Prerequisite: RESP 2610 and RESP 2450. Co-Requisite: None. Day: Fa. Lecture: 1, Lab: 3. ♦

RESP 2700  Assessment of Pulmonary Function  2 cr.
Advanced pulmonary physiology and pathology related to pulmonary function, test interpretation emphasizing performance of testing protocols, interpretation of results, equipment maintenance and quality assurance, computer applications, special procedures, and pulmonary function calculations and math. Prerequisite: RESP 2510 and RESP 2600. Co-Requisite: None. Day: Sp. Lecture: 1, Lab: 3. ♦

RESP 2730  Pulmonary Rehabilitation & Subspecialties & Math  2 cr.
This course encompasses areas of Respiratory Care that are considered subspecialties such as Hyperbaric Oxygen, Thoracic Imaging, Bronchoscopy, Cardiac/Pulmonary Rehabilitation, Alternative Respiratory Care sites/Home Care, Respiratory care administration, responsibilities and basic math with common equations used in respiratory care. Prerequisite: RESP 2510 and RESP 2600. Co-Requisite: None. Day: Sp. Lecture: 2, Lab: 0. ♦

RESP 2750  Clinical Practice IV  2 cr.
Final experiences in the practical application of Respiratory Care. The student will be assigned specific areas of clinical experience in: Pulmonary Function, Pulmonary Rehabilitation, Sleep Lab, Home care, and Neonatal and Pediatric Intensive Care. During this semester the student will also be assigned to sites outside of the acute care hospital for clinical experience. The student will also apply various modes of mechanical ventilation to adult patients in the hospital setting. Prerequisite: RESP 2600, RESP 2510, RESP 2550, RESP 2620, RESP 2460 and MATH 1101. Co-Requisite: None. Day: Sp. Lecture: 0, Lab: 15. ♦

RESP 2800  Cardiology and Hemodynamic Monitoring  2 cr.
This course encompasses areas of Respiratory Care Hemodynamic Monitoring in critical care and cardiology. Prerequisite: RESP 2510 and RESP 2600. Co-Requisite: None. Day: Sp. Lecture: 2, Lab: 0. ♦
COURSE CATALOG

RESP 2850  Polysomnography  2 cr.
This course encompasses areas of sleep disorders and the polysomnography testing procedure used to diagnosis these disorders. Therapeutic procedures and test interpretation is also included and the appropriate therapy for specific sleep disorders. Prerequisite: RESP 2510 and CRT or RRT. Co-Requisite: None. Day: Sp. Lecture: 2, Lab: 0. ♦

RESP 2990  Respiratory Capstone  3 cr.
This course is a summative course in which several summative evaluations (knowledge & affective domains) are performed prior to graduation. It is also a continuation of writing and verbal communication skills and summative evaluation. This is a writing intensive course. Prerequisite: ENGL 1510 and ENGL 1515. Co-Requisite: None. Day: Sp. Lecture: 3, Lab: 0. ♦

SOCIOLOGY (SOCI)

SOCI 1010  Introduction to Sociology  3 cr. TM-S
Introduction to the nature of human society and its development. Covers fundamental concepts and ideas: culture, personality, socialization, social organization, groups, and institutions. Prerequisite: None. Co-Requisite: None. Day: All; Eve: All; Online: All. Lecture: 3, Lab: 0. TAG: OSS021.

SOCI 101H  Introduction to Sociology Honors  3 cr. TM-S
Introduction to Sociology Honors provides overview understanding to the nature of human society and its development. Covers fundamental concepts and ideas: culture, personality, socialization, social organization, groups, and institutions. Required drill down assignments and projects will give the honor student real time data relating to community, state, and global issues. The issues will be identified in assigned reading, class discussions and outside community work. Using data, research methods, group discussion, reflection or response papers the honors student will go beyond surface issues. Using key community groups, agencies or leaders the honor student will interview and review plans to address focus issues. Prerequisite: Acceptance in Honors Program. Co-Requisite: None. Day: All, Evening: All. Lecture: 3, Lab: 0. TAG: OSS021.

SOCI 2000  Special Topics-Sociology  0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to sociology. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

SOCI 2010  Social Problems  3 cr. TM-S

SOCI 2200  Sociology of the Family  3 cr. TM-S

SOCI 2250  The Sociology of Race and Ethnic Relations in America  3 cr. TM-S
Social, economic and political survey of America’s diverse racial, ethnic and religious groups; immigration and residential patterns; subcultural characteristics and histories of the groups in the United States. Special attention to African-Americans, Asian-Americans, Native Americans and Latino peoples. Prerequisite: SOCI 1010 or one American History course. Co-Requisite: None. Day: Sp. Lecture: 3, Lab: 0. TAG: OSS024.

SOCI 2300  Introduction to Criminology  3 cr.
Introduction to major concepts, theories and empirical data that make up criminology and corrections. Emphasis on types and rates of crime, definitions of criminal deviance, explanations of criminal behavior, jails/prisons and community programs. Prerequisite: CRJU 1010 or SOCI 1010. Co-Requisite: None. Eve: Sp; Online: Sp. Lecture: 3, 0. TAG: OSS025.

SOCI 2400  American History  3 cr.

SOCI 2500  Cross Cultural Communication  3 cr.
Examines the communication issues associated with transactions between people from different cultures. Discussions focus on differences in perception and cognitive patterns, value systems and hierarchies, and symbolic meaning as expressed through various verbal codes and nonverbal cues. The issues of ethnocentrism and conflict management are also considered. Students cannot receive credit for both SPCH 2500 and SOCI 2500. Prerequisite: SOCI 1010 or SPCH 2060 or SPCH 1510. Co-Requisite: None. Day: All; Eve: All; Online: All. Lecture: 3, Lab: 0.

SOCIAL SERVICES TECHNOLOGY (SOSV)

SOSV 1005  SOSV First Year Experience Seminar  1 cr.
This course is designed to help the social services student make an effortless and successful transition to Washington State Community College. Students are introduced into the mission of the profession of social work practice, current and anticipated socioeconomic and cultural conditions and emerging research findings. The social services student will identify social work skills and competencies that are consistent with the social work profession, its core values and ethics. Students will recognize that education extends far beyond what takes place within the classroom and also includes the extracurricular life of the community college as
well as the experience as a practicum student representing Washington State Community College. Prerequisite: None. Co-Requisite: None. Day: Fa, Sp. Lecture: 1, Lab: 0.

**SOSV 1110 Introduction to Social Work & Social Welfare** 3 cr.
Introduces social services through examination of social problems, community resources, and practice methods from both historical and contemporary perspectives. Discusses professional roles of generalist social work practice. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 3, Lab: 0. TAG: OSS029.

**SOSV 1130 Casework Practice** 3 cr.
Emphasizes the importance of the interpersonal relationship between worker and client. Basic concepts of generalist practice provide foundation. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 3, Lab: 0.

**SOSV 1140 American Social Welfare Institution** 3 cr.
A general overview of the nature of social welfare as a social institution. The course will focus on social welfare acts, historical development of programs and services, value and diversity orientation, issues in social policy and the emergence of social work as a profession. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 3, Lab: 0. TAG: OSS030.

**SOSV 1680 Social Service and the Law** 3 cr.
Study of basic legal concepts and procedures as they affect social service policies, practices and service delivery. Develops legal understanding necessary to guide social service workers through the complications encountered in a profession increasingly regulated by law. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 3, Lab: 0.

**SOSV 2000 Special Topics-Social Services Technology** 0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to social services technology. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

**SOSV 2100 Crisis Intervention** 3 cr.
Designed to acquaint the student with practical strategies of crisis intervention and the knowledge and skills needed to deal with these situations. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 3, Lab: 0.

**SOSV 2110 Family Intervention** 3 cr.
Introduces various skills, theories, techniques and factors in family intervention; role of the worker and client as related to individuals, families, and specific problems; relationships, client-worker contacts, and confidentiality. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 3, Lab: 0.

**SOSV 2120 Gerontology** 3 cr.
Study of gerontology with emphasis on the ways in which social structures and institutions help to shape our concepts of the aging process. The behavior patterns of aging, the effects of the aging process on health, problems related to aged persons and a consideration of appropriate worker roles will be studied. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 3, Lab: 0.

**SOSV 2150 Domestic Violence** 3 cr.
Introduces key issues of domestic violence and evaluates policy responses of public and private criminal justice and social services. Assessment of intervention methods and measures that can be taken to prevent abusive behavior. Prerequisite: None. Co-Requisite: None. Day: Sp; Eve: Sp. Lecture: 3, Lab: 0.

**SOSV 2200 Social Services Practicum I** 1 cr.
Basic principles acquired in social services put into practice through direct delivery of social services in an approved community agency under the direction of a qualified supervisor. Student works in an agency twelve hours per week and attends a one-hour seminar weekly on campus. College faculty and agency supervisor work closely to ensure broad experiences in direct service to people. Prerequisite: 15 hours of General Education courses, 15 hours SOSV courses and SOSV 1120 and SOSV 1130. Co-Requisite: SOSV 2210. Day: Fa; Sp; Eve: On demand. Lecture: 0, Lab: 7.

**SOSV 2210 Social Services Seminar I** 1 cr.
First of two seminars. Under the direction of the college faculty, the student participates in a one-hour weekly review and assessment of the work experience as related to the practicum situation. Input from the agency supervisor will be used as an integral part of this weekly review. Prerequisite: 15 hours of General Education courses, 15 hours SOSV courses and SOSV 1120 and SOSV 1130. Co-Requisite: SOSV 2200. Day: Fa; Eve: On demand. Lecture: 1, Lab: 0.

**SOSV 2220 Social Services Practicum II** 1 cr.

**SOSV 2230 Social Services Seminar II** 2 cr.

**SOSV 2310 Addictive Behavior** 3 cr.
Explores the process through which individuals develop addictions. Covers similarities between particular addictive behaviors and examines the common effects of addiction on family life and society. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 3, Lab: 0.
SPANISH (SPAN)

SPAN 1110  Beginning Spanish  3 cr.
Development of comprehension, speaking, reading, and basic writing skills through grammar exercises, oral and written communication activities, and on-line work. Beginning course of a 2 semester, first year sequence. Prerequisite: None. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 3, Lab: 1.

SPAN 1130  Intermediate Spanish  3 cr.
Continuation of basic skills in Spanish. Prerequisite: SPAN 1110 or 1 year high school Spanish. Co-Requisite: None. Day: Fa; Eve: Fa. Lecture: 3, Lab: 1.

SPAN 2110  Advanced Spanish  3 cr.
First course of a 2-semester intermediate level sequence. Continued study of advanced concepts of Spanish grammar; includes readings, discussions and compositions in Spanish, as well as cultural material. Prerequisite: SPAN 1130 or 2-3 years high school Spanish. Co-Requisite: None. Day: Fa, Sp; Eve: Fa, Sp. Lecture: 3, Lab: 1.

SPAN 2130  Conversational Spanish  3 cr.

SPAN 2000  Special Topics-Spanish  0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to Spanish. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

SPEECH (SPCH)

SPCH 1510  Speech  3 cr. TM-C
Introduces students to both the general principles of communication and the specific process involved in the preparation and presentation of informative and persuasive one-to-many messages. Prerequisite: None. Co-Requisite: None. Day: All; Eve: All; Online: All. Lecture: 3, Lab: 0. TAG: OCM004.

SPCH 2000  Special Topics-Speech  0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to speech. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.

SPCH 2050  Professional Communication  3 cr.
This course emphasizes the development of oral and written communication skills most often used in business and professional settings: interviewing; decision making in small group and organizational contexts; team building; and formal individual and group presentation. Prerequisite: SPCH 1510. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: 3, Lab: 0.

SPCH 2060  Interpersonal Communication  3 cr.
Focuses on such factors as gender, age, and social position as they influence the most common form of human communication: the dyadic encounter. Discussion topics include: perception; self-concept; nonverbal cues; verbal codes; listening skills; and, conflict management techniques. The course also examines the basic stages in significant interpersonal relationships involving family, friends, and intimates. Prerequisite: ENGL 0900. Co-Requisite: None. Day: All; Eve: All; Online: All. Lecture: 3, Lab: 0. TAG: OCM002.

SPCH 2500  Cross Cultural Communication  3 cr.
Examines the communication issues associated with transactions between people from different cultures. Discussions focus on differences in perception and cognitive patterns; value systems and hierarchies; and, symbolic meaning as expressed through various verbal codes and nonverbal cues. The issues of ethnocentrism and conflict management are also considered. Students cannot receive credit for both SPCH 2500 and SOCI 2500. Prerequisite: SOCI 1010 or SPCH 2060 or SPCH 1510. Co-Requisite: None. Day: All; Eve: All; Online: All. Lecture: 3, Lab: 0.

THEATRE (THEA)

THEA 1200  Introduction to Theatre  3 cr. TM-H
Overview of theatre as an art form. Includes historical and production points of view. Students will effectively view and critique plays and musicals. Writing intensive course. Prerequisite: None. Co-Requisite: None. Day: On demand; Eve: On demand; Online: All. Lecture: 3, Lab: 0.

THEA 1400  Fundamentals of Acting  3 cr.
Performance-based study and practice of basic techniques in building a character: body control, interpretation, scene work, warm-up exercises, games, improvisations, and monologue exercises. Prerequisite: None. Co-Requisite: None. Day: Fa; Sp. Lecture: 3, Lab: 0.

THEA 2000  Special Topics-Theatre  0.5-6 cr.
By permission only. In-depth study of a specific topic(s) pertinent to theatre. May be repeated. Prerequisite: Permission. Co-Requisite: None. Day: On demand; Eve: On demand. Lecture: TBD, Lab: TBD.
